

E. CHANNEL LAKE ADDED TO ANTIOCH SCHOOL DISTRICT

Simpson Gives Ruling in Favor of Channel Lake Petitioners

County Superintendent T. Arthur Simpson, in a hearing yesterday, on the matter of the annexation of the east Channel lake unit of district number 35 ruled in favor of the petitioners that their part of the district should be detached from the old district and annexed to Antioch township grade school district.

Original action in the matter arose from the conditions in which the Channel Lake residents were placed. Because of the topography of the country, it was impracticable for children in the east Channel Lake region to attend the school, which was situated on the other side of the lake and was at a distance ranging from three to ten miles from the homes in the district. They were, therefore, forced to send their children to Antioch to school and pay an annual tuition of \$67.50 per child for their education, and, at the same time, pay taxes in their own district without deriving any benefit therefrom.

In the course of the hearing before County Superintendent Simpson petitioners showed that their withdrawal from the original district would not work a hardship to that district in that the tax which the district would have to levy, even after their withdrawal, would be considerably under the maximum. While the petitioners would pay in Antioch township the maximum levy, Spring Grove district had, up to the withdrawal of the Channel Lake region, paid the smallest school levy known to exist in any township in the United States, and it was the contention of the region succeeding that, since after their withdrawal their tax levy would still remain reasonable in amount, no hardship was involved, while on the other hand they had been at a disadvantage for many years.

An attempt made on the part of the Spring Grove district to assert that their school system was superior to that of the Antioch district was ruled out by Supt. Simpson as being undemonstrable.

This is the third attempt made to consolidate the Channel Lake and Antioch districts, the first two having failed.

CHICAGO MAN MEETS DEATH BY DROWNING

Youth Sink Without An Outcry— Is Found After Search By His Companions

George Feldmann, 19 year old resident of 6026 S. Reber St., Chicago, Ill., was drowned Sunday in Channel Lake. Feldmann, who came out for the day with a group of friends from the city, had been seen a few minutes before swimming about near the slide.

Apparently he had gone to his death with no outcry as many bathers were comparatively close to him. As soon as his disappearance was discovered bathers formed a cordon round the spot and tramped the lake in an effort to find him. When this proved unavailable expert divers of the party began diving, and the body was found in weeds about 60 feet out and in about 7 feet of water by a companion, Thomas A. Oglin.

First aid was applied unsuccessfully and Feldmann's body was brought to the Strang undertaking parlors at Antioch where a coroner's inquest returned the verdict of accidental drowning. The remains were taken to Chicago Monday for burial.

It was believed that drowning was due to a cramp which made it impossible for Feldmann to cry out and that when he went down he became entangled in the weeds and never came to the surface.

Mr. and Mrs. Ralph James of Chicago spent the week end with Mr. James' parents, Mr. and Mrs. J. C. James.

Winners of Rhodes Agricultural Awards

JOE ANZINGER

ELMER BARTHEL

EMIL HALLWAS

Twenty-one boys of the Agricultural Department of the Antioch Township High School produced \$11,123.64 worth of farm produce during the past year under the supervision of their teacher, C. L. Kuttel. This production was at a cost of \$6,136.91 leaving a net profit of \$4,986.73. Several other boys had farm book-keeping projects. These are not included in the above figures, as only production projects are tabulated.

These home projects bring to the farm new practices and improve the conditions on the home farm. Today it is agreed on every hand that the progress and security of a nation depends upon the kind of people who live on the farms. When the soil, from which the greatness of the county springs, is once impoverished the cities will disappear from the map. Through the home project work of the schools of the nation it is hoped that the conditions on the farm will be bettered.

Mr. Rhodes of the Chicago Footwear Company, annually awards three medals to the boys who have the best projects completed. A committee consisting of Harold Minto, George White and G. W. Jensen examined the projects and made the awards.

Elmer Barthel had a poultry project, producing 665 dozen eggs and increasing his flock during the year from 130 to 229. This was done at a profit of \$282.74. Elmer has done much in improving the flock of Barred Plymouth Rocks that he has. He made a good showing at the Antioch-Lake Villa Poultry Show and won the Farm Bureau cup for having the best male shown by a 4 H club member. Elmer was awarded the gold medal this year. Emil Hallwas won the silver medal by producing and marketing \$156.90 worth of garden produce from one fourth of an acre of land. Emil has bettered his record over that of two years ago. This shows that experience is a necessary factor for efficient production.

Joe Anzinger won the bronze medal by producing \$252.77 worth of garden truck from one and one half acres of land. His garden was the most attractive in this region, but he did not develop the marketing end of the project as Emil Hallwas did.

Some very good projects were handed in this year, and one of the judges said, "It was a difficult proposition to make the awards, there should be more prizes given."

This summer some thirty boys are again working on projects and it is hoped that as good or better projects will be handed in next spring.

Mrs. Miller and daughter, Adele, went to Chicago Tuesday to be present Wednesday at the wedding of Mrs. Miller's nephew, Sidney Clark to Miss Helen Schmidt of Chicago which took place at St. Margaret Mary's Catholic church.

A. T. H. S. JUDGING TEAMS LEAVE TODAY FOR STATE CONTEST

Will Meet Boys From 100 Schools at University of Illinois

Members of the Antioch High School Judging Teams left this Thursday morning for Urbana where they will compete in the judging of livestock and grain against teams from 100 or more schools.

Philip Simpson, Donald Cremin, and Gordon Martin will represent the school in the judging of dairy cattle.

Harlan Craft, Roy McNeil, and Lloyd Atwell make up the fat stock team, Elmer Monnier and Harold Kennedy will judge grain; and Elmer Barthel and Wm. Schwenk will judge poultry.

The boys will also make a tour of the University and the College Farm. C. L. Kuttel, director of the local Agricultural department will accompany the boys. Mr. Kuttel will remain a week longer after the contest to attend the summer conference of agriculture teachers. He will also take a special three day course in farm mechanics.

Prof. Nielson And Choir Give Program

The choir of the M. E. church, under the direction of Prof. C. H. Nielson of Kenosha, gave a pageant Milestones of Life at the church on Sunday evening. The entertainment took the form of reminiscences of a grandmother, with Mrs. D. A. Williams in the role of grandmother.

Mrs. Blackman and family portrayed School Days, Mrs. A. M. Krahl and daughter pictured College Days and Mrs. Harry Messing the scene Motherhood. Miss Vida Palmer, Mrs. H. B. Gaston, Homer Tiffany and Prof. Nielson sang songs appropriate to the story of the pageant.

Daily Vacation Bible School Enrolls Many

Forty-eight students between the ages of six and fifteen enrolled for the vacation Bible school being conducted under the auspices of the Methodist and Episcopal churches of Antioch at the class rooms at the M. E. church. Four departments are being conducted, beginners, primary, junior and intermediate. The school is under the direction of Reverend A. M. Krahl. Reverend H. C. Dixon, and the Misses Mary Stanley, Florence Moore, Mary Tiffany, Esther Wells, and Mrs. R. Ritchie.

ROY W. BRACHER EXPLAINS LOSS OF \$100,000 FUND

Five Men Arrested Are Charged With Stealing County Funds

County Treasurer Roy W. Bracher, accused by authorities of being a party to the embezzlement of \$100,000 belonging to Lake county, denied complicity this week in an open letter to Lake county citizens.

Subsequent to the statement he turned over a list of his assets to C. E. Staley of the People's bank of Waukegan for liquidation in restitution of the shortage. Property estimated in excess of \$125,000 was listed.

Yesterday Bracher informed B. C. Thompson, chairman of the board of supervisors, that he is willing to resign if the majority of the county board desire him to leave the office. Thompson expressed his confidence in the honesty of Mr. Bracher saying:

"Mr. Bracher's past reputation in Lake county speaks for itself and he owes it to the county and himself to serve out his term as county treasurer."

"This is simply a case where he was misled and the victim of the crooked work of a slicker. He has shown the best of faith by making plans to take care of the entire shortage without any outside help. It will not cost his bondsmen a cent. He will be able to take care of the shortage, although in doing so he will use every cent of his resources."

Ray Padlock, former chairman of the board of supervisors and a leader on the board for many years said that the entire affair was most unfortunate. He said Mr. Bracher has always been an honest and most capable official and that there was no question but what he was wrongly influenced, having had no intention of swindling the county. He voiced the opinion that Bracher should remain in office.

Supervisor Arthur Vercoe, chairman of the finance committee of the board, who caused the arrests of Bracher, Ira Pearsall, Harold Martin, Caleb Busick and Clark Nye, in connection with the alleged \$100,000 embezzlement, is said to share their opinion.

According to Bracher in the spring of 1922 he sent \$100,000 to be deposited in the now defunct Se-

(Continued on page 8)

DUMPS GARBAGE ON STATE HIGHWAY; TOURIST ARRESTED

Highway Officials Complain of the Practice of Dumping Rubbish on the Roadside

Harry Dahlquist, a visitor to the region from Chicago, so far forgot his manners on last Sunday afternoon as to dump an accumulation of broken glass and tin cans on the state highway near Lake Villa, and thereby incur the pursuit of Constable Hamlin who arrested him after a four mile chase.

Dahlquist was taken before Justice Reinbeck of Lake Villa where he was fined \$25 and costs. Hamlin first saw Dahlquist on the road along the east shore of Fox Lake as the latter was about to get into his car after dumping the junk. When Dahlquist saw Hamlin coming he speeded up his car and gave the constable a four mile race.

Highway officials report much abuse of this sort throughout Lake county. On the Fox Lake road alone more than 15 tons of junk was picked up last year. Besides this a great number of advertising signs posted against the law are removed annually by officials.

A good deal of the abuse comes from summer residents who do not care whether the roads in the lake region are a credit to the region or not, according to Mr. Hamlin, but some instances have been found where residents of the county have been guilty of the offense.

ANTIOCH DENTIST WRECKS AUTO TO AVOID COLLISION

Dr. and Mrs. F. S. Morrell had their car demolished and narrowly escaped serious injury Sunday when they were crowded off the road into a ditch to avoid collision on the road between Tama and Hustler, Wis.

They were enroute to northern Wisconsin and had gone a distance of about 240 miles on their journey when the accident took place. Just out of Tama they were forced to turn into the embankment at the side of the road in order to avoid a direct collision with a car driven by a lumber dealer from Tama.

Dr. Morrell sent to Waukegan for a car to get them back and put his own car in a box car and sent it home.

CHILD HAS NARROW ESCAPE FROM DEATH BENEATH MOVING CAR

Son of Mr. and Mrs. S. B. Nelson Severely Injured Crossing Street

Wendell Nelson, six year old son of Mr. and Mrs. S. B. Nelson of Antioch, was severely injured Sunday afternoon when he darted in front of a moving car and was thrown into the air and dragged by the bumper of the car.

The child, with his parents, and a party of relatives and friends was returning from the Antioch flyo field when the accident occurred. The party drew up opposite the Nelson home on Main street and started across the street. The little boy who was in the Peters car, ran out and, before anyone could stop him, darted across in pursuit of his brothers who had already crossed safely. A car belonging to Calvin Reitz, of 4817 Kimball avenue, Chicago, ran into him.

When picked up the child was unconscious but prompt first aid rendered by a Doctor Meyer, who happened to be in a car just behind, revived him and he was taken to Victory Memorial hospital at Waukegan. There it was found that he was suffering from a fractured skull, and from a punctured lung as well as innumerable bruises. He was in a critical condition for a time, but made a sturdy recovery.

He was sufficiently recovered to be able to be moved to his home on Tuesday evening and is reported as getting along as well as can be expected at the present time.

Former Richmond Boy Dies After Collision

Elmer Bell of Winthrop Harbor died at the Victory Memorial hospital Monday morning as the result of a skull fracture sustained Sunday evening when the car which he was driving collided with a truck. Bell was known to many people in this vicinity as he formerly made his home at Richmond. He was 19 years of age. The accident occurred on Wisconsin state highway No. 42.

Visitor Changes Mind Twice Regarding Bond

Eustace Gazis of Chicago, Ill., learned to his regret this week that being arrested for speeding and released on bond for appearance at the appointed time carried with it both the obligation to appear and to make good the bond. Gazis was taken up by motor cycle cop. Frank Valenta Sunday and put up a bond in the form of a check for \$15.00. Returning to Chicago, he apparently changed his mind as to the nature of the obligation and decided the appropriate thing to do was to stop payment on the check. Upon learning of this fact, local authorities issued a warrant for his arrest and had him brought to Antioch for a hearing. He was taken before Judge Tarbell where he was fined \$25 and costs and admonished to remember that the law did not permit citizens to change their mind in the particular fashion that he had attempted. When the costs had been met the experience had cost him an additional \$25.00.

ROAD TO CHANNEL LAKE REOPENED VIA ORCHARD ST.

W. O. Winch Secures the Right of Way and Will Gravel Detour

W. O. Winch of Channel Lake came to the rescue in the matter of the blocked traffic on Lake street this week, when he secured right of way through the property of Barney Naber and George Golwitzer for a temporary road to connect Orchard street with the Channel Lake road, during such time as the Channel Lake road is blocked by paving operations on Lake street.

Mr. Winch himself has defrayed the cost of laying 500 feet of gravel on the temporary road and the village will improve the part on Orchard street which connects with this temporary highway. The detour is necessitated by the fact that Lake street extends a short distance beyond the intersection of Lake and Orchard street, thus cutting off Channel Lake from the village. Previous to this arrangement it was necessary to take a circuitous detour to reach the Channel Lake road.

County Road Work Nears Completion With Fair Weather

The fairly favorable weather of the past two weeks has enabled road contractors working in the vicinity of Antioch to make much progress toward the completion of paving projects.

Grading and steam shovel work on Wisconsin route 83 is reported as progressing rapidly and forms will be laid for cement this week. Route 83 connects with Illinois 21 and forms the connecting link on the route to Lake Geneva and Keosauqua. By the time the paving of this strip of road is completed it is expected that the paving on the intersecting road, Wisconsin highway 50, part of which was opened to travel recently, will be completed.

Work is also reported as progressing rapidly on the Millburn road. Twenty trucks are on the job hauling materials and the cement pouring has been begun.

The Fox Lake road is also well under way. Most of the grading has been done and the culverts made. With favorable conditions the largest part of the paving projects now under way will be completed and in use by the first of August.

Bairdston Is Bound Over to Grand Jury

George H. Bairdston, former Waukegan supervisor, waived preliminary hearing last week on a charge of withholding township money and was released on bonds of \$5,000 furnished by his son, Fred, and Mark Redfern.

Bairdston was arrested on complaint of Supervisor Matt Dilger who defeated Bairdston at the polls this spring. Dilger claimed that a sum of \$49,659.89 had been due the township had not been turned over by Bairdston. The township is protected by a bond of \$150,000.

Sheriff's Office

Nets Bootleggers

Officers from the sheriff's department paid visits this week and last to a number of places in the lake region and in Waukegan and made arrests for the possession and sale of intoxicating liquors. In most instances samples of beer were obtained and defendants pled guilty to the minor charge of having intoxicating liquor in their possession and paid the fines attached to conviction therefor.

Village Board of Local Improvements Meets

The board of local improvements held a short meeting Wednesday morning. The only business outside of strictly routine matters to come before the board was the approval of the engineers estimate of the amount of money the contractors at work on the Lake and Hardin street projects were to receive for the completion of a certain amount of the work.

HAPPENINGS IN NEARBY TOWNS

Waukegan Realty operators announced recently that the first mortgage bonds to back the erection of a new \$250,000 hotel building on the corner of Washington and Utica streets had been sold to eastern capitalists and work would be begun soon.

Clayton Hepner, of Crystal Lake, lineman for the Public Service company of Northern Illinois, met his death Monday afternoon almost instantly when he accidentally touched a 22,000 volt high tension wire while placing a crossarm on a new electric power pole on the shores of Pistonee Bay, two miles east of Johnsonburg.

Libertyville playgrounds were opened in Central park Monday with an elaborate seasonal program for the children of sports and events including a pet show, doll show, lantern show, community sing, roller skating races, juvenile circus, track and field meet, recreation kindergarten, horseback and playground ball club, and many other activities.

A Building and Loan Association has been chartered to operate in Libertyville. Capitalization will be at \$100,000.

The Kenosha advancement association has asked the city council of Kenosha to regulate flying over the city. It is pointed out that aviators should be required to fly high enough over the city so that if forced to alight they will be able to fly clear of the congested area.

Plans are under way for the construction of a new \$50,000 school building at North Chicago. Part of the funds are to be raised by general taxation and part by bond issue.

Hans Lundstrom, a motorcycle deputy of Walworth county, met death at the hands of unknown assailants near Elkhorn last week. The body was found astride his motorcycle, beside a gravel road connection between highways 61 and 20, a mile northwest of Elkhorn. No clue to the murderers has been unearthed except that people living nearby heard a car go by at about the time that the shooting occurred and that he was seen a short time before talking to three men in a Ford coupe.

Lake Geneva is to have a new \$125,000 theatre building erected on the site of the present armory. The building will include office and store space. Movies and vaudeville will be regular features during the summer months.

BRISTOL

Miss Ida Stevens entertained the following ladies to a Vanishing Tea Tuesday: Mesdames Pike, Jacobson, Elvaug, Jones, Jorgensen, Thorne, Brown, Laura Lavey, Alderson, McVicar, Van Liere, Watkins and Bacon. Rummy was played. Mrs. Jessie Watkins received first prize, Mrs. Laura Lavey, second prize, and Mrs. Jean Thorne and Mrs. W. C. Bacon each received a consolation prize.

Mrs. Jessie Watkins, who spent the winter in Biloxi, Miss., will spend the summer here.

William Long of Bristol was married Saturday to Miss Waldron, who is well known here for her successful work this year as principal of the Bristol state graded school. They will reside in the village here after their return home.

Francis Foulke, Alfred Pohlman, Allan Higgins and Ward Rowbottom spent the week end with Rev. and Mrs. F. E. Frankson in Milwaukee.

Rev. and Mrs. David Johnson entertained relatives from Milwaukee Sunday.

Mrs. Frisbie and daughter from Riceville, Iowa, and Rev. and Mrs. Andrew Deenick from Milwaukee spent the past few days with the E. L. Stonebraker family.

Mrs. Heindel and two sons visited Mrs. Pike Thursday.

Mr. and Mrs. F. Gethen are spending a few days in Milwaukee.

A small company of friends gave Samuel Fitchow a surprise Thursday evening in honor of his birthday.

Science of Geology

Geology is the science that investigates the formation and nature of the earth's crust. It aims at explaining the changes that have taken place while the earth has been gradually assuming its present surface, and it treats of the changes that are now in course of operation.

NEWS OF WILMOT COMMUNITY

A stove demonstration conducted by Miss Bernice Lowe was given at the Wisconsin Gas and Electric office Thursday and Friday. The demonstration was given on a Hot Point electric stove and many delicious dishes were made and raffled off.

At the same time a contest was conducted to find the best cake baker in this community. The prize was an elaborate Dolly Madison Percolator set valued at sixty dollars and was won by Mrs. J. Buckley. Mrs. Alfred Reynolds won second place and Mrs. R. C. Shottliff third place.

The members of the American Legion cleaned and painted the Woodman hall the first of the week. William Hartman, brother of Mrs. J. Hasselman, fell while working at the gravel pit and broke his arm. W. Dobyns, Gene Dobyns, and Thomas Brownell motored to Fond du Lac Tuesday.

The parents of Mrs. Roy Blood are visiting at their home in Wilmet. Donald Tyler is recovering from an operation at the Kenosha hospital.

Mr. and Mrs. Arthur Holtdorf spent Sunday at the home of Mr. and Mrs. Frank Mecklenburg at Richmond.

Mr. and Mrs. Ray Hutton motored to Grayslake Saturday to get Mrs. Hutton's father, Fred Sherman, who had been spending several days there with J. Sherman.

Mr. and Mrs. Louis Reynolds visited Sunday in Kenosha. Mr. and Mrs. Louis Anderson of Crystal Lake spent Saturday evening at the home of Mr. and Mrs. F. Kruckman.

Mr. and Mrs. Louis Beath and son of La Crosse are spending several days at the Boulder home.

Irva and Sylvia Dowell have returned home from the Whitewater Normal where both were students.

Dwain Dowell spent the week end with friends in Chicago.

Miss Blanche Carey and Miss Ermine Carey spent Monday in Chicago.

Valmar beat Hub Market eight to nothing Sunday.

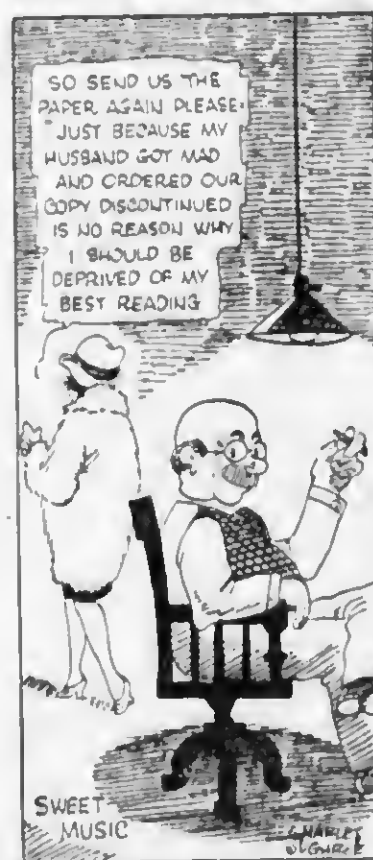

Patricia Jean, daughter of Mr. and Mrs. J. Carey, was baptised at the Holy Name church Sunday by Rev. J. Brasky. Sponsors were Mrs. J. Ludwig of Silverlake and Mr. Capavay of Kenosha.

Mr. and Mrs. E. Thomas of Greenwood were Sunday guests of Mr. and Mrs. A. C. Stoen.

Mr. and Mrs. W. Dobyns and son, Gene of Quincy are visiting the Carey home.

Mrs. Walter Carey has been taken to the Kenosha hospital.

PRINT SHOP CALLERS

Franklin First Cartoonist

Rare Ben Franklin has been adopted as the patron saint of the cartoonists of America. It is claimed that he drew the first cartoon ever published in this country. He published it in his Pennsylvania Gazette May 9, 1754.

Origin of "By-Law"

"By" is an old Scandinavian word meaning town and survives in the names of many towns such as Derby, Whitby, etc. By-laws were originally town laws; that is, local laws contrasted with national laws.

Wild Drive

A Philadelphia golfer made a world's record by driving a ball that rang in a fire alarm. A wild hook went out of bounds, broke the glass of the box, hit the lever, and brought engines on the run. It was the "longest shot of his career."

Building Quality into Used Cars

Unusual facilities for re-conditioning automobiles make possible the high value found in our dependable used cars. In the first place, we can tell exactly what needs to be done to a car without tedious and expensive experimenting. Our mechanics are thoroughly competent — and, working with special tools, they accomplish a given task in the minimum time. Furthermore, we use only genuine parts for replacement purposes. As a result, our reconditioned cars simply cannot be matched for value.

QUALITY AT LOW COST

SALEM

Mr. and Mrs. Welmer of Chicago are spending a few days with Wm. Schultz, Sr.

Mr. and Mrs. Fred Richards and son, Loudd, were callers at the Chas. Schultz home Sunday.

Mr. and Mrs. Harold Hansen of Kenosha spent Thursday at Byron Patrick's.

The Booster Club met with Miss Schade. The first prize was awarded to Mrs. Wm. Krahn, second to Mrs. Rose McVicar and third to Mrs. Arthur Hascabart.

Mr. and Mrs. Louis Reimer spent Sunday at Paul Romie's at Burlington.

Mr. and Mrs. Charles Curtiss and daughter, Ruth, of Kenosha attended church here Sunday.

Mr. and Mrs. Godfrey Nelson and daughter, Jean, Mrs. Hattie Curtiss and son, Lyle, of Kenosha, visited at the Berry home Sunday afternoon.

Harry Olsen and his mother, Mrs. Peter Olsen, drove to Ed Halde-mann's home at Harvard Sunday. Miss Lydia Rehner returned home with them.

Peter Olsen spent last Friday in Kenosha.

Mr. and Mrs. Fred Schonscheck were surprised Saturday by a number of their friends. 500 was played.

Mr. and Mrs. Charles Richards of Silverlake spent Sunday at the Carl Richards home.

Mrs. Harry Olsen and children spent last Sunday with her mother, Mrs. Clara Hartnell of Brass Hall.

The electric ice cream sign was completely demolished at the Johnson store by the steam shovel while working on the street.

Mrs. Sarah Campbell entertained her granddaughter, Miss Williams and her friend of Chicago Sunday.

Mr. and Mrs. A. L. Cull of Nebraska, are visiting relatives here.

Harry Root spent the week end with relatives in Hebron.

Miss Anna Biesch spent Sunday with her aunt, Mrs. Mary Acker.

Dr. Selberg of Genoa City called to see his little daughter, Lucille, at Miss Root's on Friday evening.

Miss Margaret Scholz of Kenosha spent Sunday at home.

Mr. and Mrs. Ray Hutton and Miss Mary Britton, Clarence and Clifford Seamon called on Mrs. Gookin and Miss Lulu Root Sunday.

Miss Mary Fleming and Thomas Fleming, Elizabeth Elkerton, Mrs.

Arthur Bloss, and Miss Florence Bloss were in Madison Friday. Charles Forbrick and Mr. Burton of Chicago are spending a few days at the Bloss home.

Little Elouise Campbell was ill several days last week.

Mrs. Florence Bloss is visiting her brother, N. J. Crowley, at Antioch.

Jerome Murray was among the 8th grade graduates from St. James school of Kenosha Wednesday night.

Olive Hope, Florence Bloss and Arthur Bloss were in Kenosha on Wednesday evening.

Mrs. Louis Romie caught her hand in the electric ringer. Dr. Fletcher took several stitches.

The church yard and road have been treated to a new coat of gravel which has made a great improvement.

S. Dibble and family have moved from Antioch to Paddock's Lake where they are building.

Sunday's Results

Westside, A. C. 9; Renehans, 6.
Slovakia, 13; Kellers, 8.
Boosters, 20; Cardinals, 10.
Foresters, 9; Avon, 7.
Antioch, 9; Johns-Manville, 8.

The Antioch Baseball team continued its drive for the Lake County Amateur title by beating the highly touted sluggers from Johns-Manville by the score of 9-8. The victory advanced the local boys into a tie for third place, 2 games behind the West Side A. C., leaders since the opening game.

The visitors got off to a 3 run lead in the first two innings but the Antioch boys tied the score in the fifth inning, due mostly to the timely and lengthy wallops of Sullivan, Morley and Simpson. The locals scored twice to take the lead in the 6th on a triple by Sullivan, a single by Morley, a sacrifice by Hardin and a couple of infield outs.

The lead was increased to 7-3 in the next inning on singles by Drom and Sullivan and a double by Morley. The way Bill Steininger was going this looked like a safe lead but he suddenly exploded in the eighth. Drom mused up H. Robarge's grounder for a starter, Luby was hit by a pitched ball and when the next two struck out it looked better for Antioch but C. Bourdeau's double, Gavin's homer, Maunehach's double and A. Robarge's triple gave the Waukegan aggregation five runs and a one run lead.

Drom then went in and struck out Young with a runner on third. For the second time Antioch showed its fighting spirit by scoring from behind and winning the game in the ninth. Drom helped win his own game by opening with a double in left center, Halwas, batting for Laeco hit a fly to center but Sullivan came through with another long triple to right to tie the score. Sullivan then scored the winning run while Morley was being thrown out at first, the catcher having dropped the third strike. Drom held the visitors safe, in the last inning, Shannon tossing out the third out with a man on third going home with the run which would have tied the score. The locals wore their new suits, purchased by the business men of Antioch and presented a much better appearance on the field. They played hard baseball throughout and were rewarded with a winner before a good crowd. Sullivan and Morley with 4 hits and Simpson with 3 hits and a walk led the attack for the winners. Gavin knocked out a pair of doubles and a home run to lead the losers.

The relief pitching of Drom, former Illinois star, which saved the game for Antioch was another fine feature of the game. This will probably give him the honor of starting next Sunday's game, with Morley ready to relieve him if necessary.

The Slovak A. C., composed mostly of Zion boys, will furnish the opposition next Sunday, June 26, at Antioch Ball Park. They are only a game behind the homo boys and a good battle is predicted. Antioch must win to remain in the running for the championship, which carries with it a trip to Detroit to compete in the National Amateur Tournament, and various medals.

LAKE VILLA NEWS NOTES

Mrs. Albert Douglas visited in Chicago several days last week with her son, Walter, and his wife.

Mrs. Grace Wilkerson and three younger daughters of Elburn, Ill., spent the past two weeks here with relatives, the Galliger family. Mr. Wilkerson drove up Sunday for them.

Mrs. Margaret Galliger has been quite ill at her home west of town, and her condition remains much the same.

Rev. McKelvey spent Monday at his home here and made several pastoral calls.

Mrs. Paul Avery entertained the Bridge club at her Cedar Lake home last Thursday.

The Keller Cafe, Mrs. Murrell's store, and John Effinger's store were fitted out with new awnings last week.

The large plate glass window in the Effinger store, which was broken by a pebble thrown by a passing car, was replaced last week by a new window.

Mrs. S. M. Sherwood is very ill at her home here, and her daughter, Mrs. Hendricka of Ingleside has been with her.

Benjamin Hamlin is recovering nicely from the scarlet fever, and is out of danger. The nurse is still with her, and quarantine cannot be lifted for some time.

Harold Cribb of Waukegan was at his home here on Sunday.

Mrs. Ballenger and Mrs. McKelvey were Waukegan visitors one day last week.

Miss Anna Snyder, who lives in California, spent a few days last week with her relatives, the Seeger family at Lindenhurst farm.

The Mother's club will meet with Mrs. Fred Hamlin on Friday of this week, and all interested are cordially invited to attend.

Mrs. N. I. Nelson of Lindenhurst farm entertained her sister and a friend from Waukegan last Thursday.

Mr. and Mrs. Chas. Bailey and four children of Sheridan, Wyoming, were guests of Mr. and Mrs. James Kerr over this week end. They were on their way to points in the New England states and Canada to visit relatives.

Church News

Children's Day was fittingly observed at the Lake Villa church on Sunday, June 19th.

Fourteen young folks who have been in a class of instruction for several weeks were received into full membership in the church. Each was given a set of envelopes for contributions to the work of the Kingdom and Rev. McKelvey explained the duties, responsibilities, and privileges as members of the church "which is Christ's body" with his work to do here upon earth.

The Primary boys and girls gave a fine demonstration of the work in their department. This included a service of worship, songs, and dramatization of some Bible story. It gave the congregation an opportunity to see what constructive training is being given these little boys and girls by the Primary teachers.

The Juniors and Intermediates under the leadership of Miss Richards, and Mrs. McKelvey, gave a fine program of music and readings. The songs especially were worth mentioning, because in this group of young people we see the foundation for a Junior choir immediately, and it is hoped that it can be worked out.

Church School 10 a. m.
Morning Worship 11 a. m.
We invite all to participate in our Church School and worship.

District Superintendent Dr. J. Hebble Ogden will be with us next Sunday to conduct quarterly conference at 2:30 Standard time, at the church. Reports of the various departments of the church will be given and the public is cordially invited to attend this meeting.

Mrs. Martha Dauha is improving from her recent illness, and is able to be up a little while each day.

Mr. and Mrs. Wm. Wilmington of Round Lake spent Saturday with their daughter, Mrs. Lee Sherwood.

Wild Creatures' Eyesight

The biological survey says mountain sheep probably have the keenest eyesight of all animals. Wolves and foxes are among the most cunning.

Feed Your Mixed Oats

And make more money by marketing quality grain

QUALITY brings price. Millers and dealers alike require good quality grain. Your quality or carelessly mixed grain is always a drag on the market and sells at sacrifice prices. The proper rotation of crops, the preparation of seed bed, and careful selection of seed oats would quickly eliminate barley mixture and result in a crop salable to millers and all classes of consumers, giving the producer a much broader market.

FAN seed oats, treat for smut and test for germination. The labor and expense involved is little if any greater and the crop harvested is more likely to result in a good yield. Better quality will insure a market and a more satisfactory compensation.

SOCIETY NEWS

Hillebrand-Rosing Wedding Comes As Surprise to Friends

Miss Martha Hillebrand and Herman Rosing sprung a complete surprise on their friends last Sunday when an invitation to take dinner at the Hillebrand home at Lake Catherine turned out to be an invitation to a wedding. The immediate relatives and most intimate friends among the younger set of the bride and groom had been invited to dinner. Although an atmosphere of expectancy prevailed, none of the party suspected that the ceremony was to take place until they were summoned to the sun parlor to dinner. There at once they found a beautiful floral arch and the young couple and their attendants.

The wedding was performed by Rev. J. J. Williams of Wilmett, with Frank Williams of Oklahoma as best man and Miss Hilma Rosing as maid of honor.

The bride wore a white georgette gown with tulle lace trimming and the maid of honor was crowned in a pink georgette frock.

After the wedding dinner the bride and groom left by auto for Rhineland and other points in northern Wisconsin where they will spend their honeymoon in a combined fishing and sight seeing tour.

The bride is the younger daughter of Mr. and Mrs. William Hillebrand of Antioch and Lake Catherine, and the groom is the son of Mr. and Mrs. Wm. Rosing of this place. Both have a wide circle of friends in Antioch and vicinity as they have both grown up in the community and have been associated with the business interests of the village. Miss Hillebrand in her position as clerk in the Hillebrand and Shultz store and Mr. Rosing in his work at the Antioch oil station.

DAUGHTERS OF G. A. R. OFFER BUNCO PARTY

Members and friends of the Daughters of the G. A. R. are invited to a Buncó party given by the Daughters at the Somerville restaurant, Monday evening, June 27, immediately following the regular meeting of the fortress which will be adjourned as quickly as possible on account of the party. Play will begin at 8:30 Standard Time. Price, 25 cents.

UNIVERSITY PEOPLE GUESTS OF LABDON'S

Mr. and Mrs. Nelson John Conway of Oak Park were dinner guests at the home of Mr. and Mrs. J. W. Labdon on Lake street Monday. Mr. and Mrs. Labdon are students at the university of Illinois and were en route home from Madison where they went to attend the commencement activities.

CHICAGO GIRLS VISIT AT W. F. LASCO HOME

Miss Anna Maher and Miss Sylvia Prusinski of Chicago were house guests at the home of Mr. and Mrs. W. F. Lasco for the past week. Among the activities given in their honor was a dinner party Sunday at which Mr. and Mrs. William Maher and Harley Brown, George Braun and family, and Mr. and Mrs. Augustine were guests. On Monday afternoon Mrs. Lasco and sons, Harry, Raymond, Lyle, and Robert, accompanied by Miss Maher and Miss Prusinski motored to Fox Lake to visit Miss Lucille Hanke.

LOCAL PEOPLE ATTEND PARTY AT WAUKEGAN

Mr. and Mrs. H. F. Beebe, Messrs. and Mesdames E. O. Hawkins, F. L. Middendorf, and James Dunn motored to Waukegan last Thursday to attend a Five Hundred party given by Mr. and Mrs. Edward Anderson of North County street. First prizes went to Mr. Alcohoun of Waukegan and Mrs. Hawkins with seconds to Mrs. Beebe and Mr. Hawkla. After the awarding of the prizes refreshments were served and the grand prize of the evening was bestowed upon James Dunn.

CARD CLUB MEETS WITH MRS. RAY PREGENZER

The Thursday Five Hundred club met this week at the home of Mrs. Raymond Pregenzler, Jr. Mrs. W. C. Olson, Mrs. Vincent Dupre and Mrs. Irving Elms were the recipients of the prizes. After the awarding of the honors refreshments were served by the hostess. Mrs. H. Mickle of Trevor will be the hostess to the club next week.

BIRTHDAY DINNER TENDERED A. HARRISON

Mrs. Andrew Harrison entertained a few relatives at a seven o'clock dinner on Friday evening, June 17, in honor of Mr. Harrison's birthday.

O. E. S. OFFICERS AND COMMITTEES ENTERTAINED

Mr. and Mrs. Hugo Michell celebrated their 17th wedding anniversary at their home on Bluff Lake on Tuesday evening. Officers and committee members of the Eastern Star and their husbands were the guests of the occasion. Arriving at the Michell home the visitors were conducted to the log cabin situated at the foot of the bluff among the pines along the shore of beautiful Lake Bluff. There the evening was spent in dancing and playing cards.

Miss Barnstable Is Bride of Karl Strauss of Rockford, Illinois

Saturday, June 18th, at twelve o'clock noon, at the home of Mr. and Mrs. Albert T. Barnstable occurred the marriage of their daughter, Arlene Alberta to Mr. Karl J. Strauss of Rockford, Illinois. Rev. A. M. Krahl, pastor of the M. E. church, performed the ceremony in the presence of immediate relatives and friends, under a floral arch and bell decorated with syringa, snow balls and roses. The many other beautiful floral decorations added to the splendid June day, making it a scene long to be remembered. Miss Hazel Strauss, sister of the groom was bridesmaid, and the bride's brother acted as best man. Miss LaBarna Strauss played the wedding march.

The bride wore a white satin gown trimmed with beaded silk Spanish lace, and carried a shower bouquet of white roses and lilies of the valley. The bridesmaid wore a gown of yellow georgette and carried a colonial bouquet of yellow tea roses.

A wedding dinner was served at the Blue Willow Inn. Miss Barnstable has been a teacher in Wisconsin schools, and has taught the past two years in the Emswold school, and has many friends in this vicinity. Mr. Strauss is District Service manager of the Nash Service Company of Freeport, Illinois.

After a wedding trip to the Dells and other Wisconsin places of interest Mr. and Mrs. Strauss will be at home to their friends at Freeport, Ill., after July 15th.

Former Antioch Man Takes Nashville, Tenn. Girl As His Bride

Announcement is made of the marriage of Miss Alice Pettus of Nashville, Tenn., youngest daughter of Mr. and the late Mrs. L. M. Pettus of Nashville, to John D. Bohrn of Chicago, eldest son of the late Mr. and Mrs. John Bohrn, formerly of Antioch. The marriage ceremony was performed Saturday, June 18th, by the Rev. J. L. Crowe of the St. Louis church.

Miss Pettus is a graduate of the Ward Belmont College of Nashville. Mr. John Bohrn is well known throughout Kenosha and Lake counties. He spent his childhood at the home of his parents near Channel Lake and is a graduate of the Wilmett high school.

The wedding was followed by a dinner and reception given at the Edgewater Beach hotel. After an extended motor trip through the south they will reside in Chicago.

CHANNEL LAKE C. C. TO BEGIN SOCIAL SEASON

Social activities at the Channel Lake Country Club are to begin next week. A series of Tuesday luncheons for the ladies of the club will be begun next Tuesday, with cards as the feature of the affairs. Evening dancing parties will be held on Saturday evenings for members and their friends. The first of these will be held Saturday evening.

SCHILKE FAMILY ENTERTAIN GUESTS

Mr. and Mrs. Schoock of Chicago were the guests of Mr. and Mrs. Gus Schilke last week. On Friday Mr. and Mrs. Schilke, accompanied by Mr. and Mrs. Schoock visited with friends in Kenosha.

FORMER ANTIOCH GIRLS GO ABROAD

The Misses Dorothy and Louise Roeschlein of Chicago, formerly of Antioch, Illinois, left on June 15th, for a trip abroad. They will remain for three months and will visit England, France, Germany, Switzerland and Italy.

Stonebreaker-Benedict Nuptials Solemnized at Bristol June 14th

The wedding of Miss Emily Grace Stonebreaker to Roland D. Benedict, both of Bristol community, took place Saturday afternoon, June 18, at 4:00 p. m. at the home of the bride's parents.

The bride and groom attended by Miss Norma Unland and Lorin Bishop of Somers, and the bride's father, Edwin D. Stonebreaker, who gave the bride in marriage, took their places to the strains of Mendelssohn's wedding march played by Mrs. Eva Lewis of Kenosha. The ceremony was performed by Rev. Andrew Burnick of Milwaukee, (former pastor in Bristol) who stood in an archway of green foliage dotted with peonies. Vocal music preceding the ceremony was furnished by Rev. David Johnson, who sang, "Oh, Perfect Love," "Oh, Promise Me," and "I Love You Truly."

The bride was attired in blue crepe and carried a bouquet of pink roses, sweet peas and baby breath. The maid of honor wore tan crepe and carried pink roses. The double ring ceremony was performed. After the service luncheon was served. The dining table was decorated in pink and white.

About seventy guests were present. Those from out of town were: Mr. and Mrs. Ralph Benedict of Woodworth; Mr. and Mrs. W. C. Cull, Salem; Mr. and Mrs. Frost, Rochester; Mrs. Nellie Joslyn, P. W. Roberts, Woodworth; Mr. and Mrs. Howard Higgins, Geneseo; and Irene, Mr. and Mrs. Clarence Benedict, Miss Olive Carter, all from Kenosha; Paul Thornton, Salem; Miss Beatrice Benedict, Woodworth; Rev. and Mrs. Burnick, and Mrs. Orra Fluk from Milwaukee; Mrs. Schriener and daughter, Carla, from Monroe, Wis.; Mrs. William Wolfe, Mrs. Eva Lewis, Kenosha; Mrs. Fritsle and daughter, Florence, from Itasca, Iowa; the Misses Norma and Alva Unland and Lorin Bishop from Somers.

Both of the young people are well known and highly esteemed in Bristol and the community surrounding. Miss Stonebreaker is a graduate of Kenosha high school and Kenosha Union Grove Rural Normal and has taught school in the county for the past two years. Mr. Benedict is a graduate of the University of Madison and is employed by the Birmingham Lumber company of Kenosha. They left for a motor trip through Wisconsin. Their gifts were both useful and beautiful.

ANTIOCH PEOPLE ATTEND FUNCTION AT FOX LAKE C. C.

Mrs. James McMillan of Grayslake spent Monday and Tuesday at the home of her parents, Mr. and Mrs. John Morley. Tuesday afternoon Mrs. Morley and Mrs. McMillan attended a bridge luncheon given at the Fox Lake Country Club.

INDIANA PEOPLE VISIT AT BLUFF LAKE

Mr. and Mrs. J. Arthur Lee of Lafayette, Indiana, visited this week at the Hasty cottages at Bluff Lake. Mrs. Lee is a sister of Mr. Harry W. Hasty.

RAY WINDFELD MADE A BUSINESS TRIP TO CHICAGO WEDNESDAY

Ray Windfeld made a business trip to Chicago Wednesday.

PERSONAL MENTION

Mr. and Mrs. A. Harrison accompanied by Mr. and Mrs. C. H. Harrison were callers at Genoa City, on Sunday.

Mrs. Ada Groth and daughter of Spencer, Iowa, were guests of her aunt, Mrs. Homer Stevens, the first of this week.

Mr. and Mrs. Frank Dunn and Mr. and Mrs. James Dunn motored to Lake Mills, Wisconsin, where they visited Mr. and Mrs. E. Miller there. They went on to Fort Atkinson for a short visit with Mrs. Rose Carney.

Mr. and Mrs. Herbert Carey from South Bend, Indiana, are expected today for a visit at the home of Mrs. Carey's parents, Mr. and Mrs. H. A. Radtke. They will remain for a month.

Norman Ames and his mother, Mrs. Inez Ames left today for Montana where they will visit at the home of Gordon Jamieson, a brother of Mrs. Ames.

Mrs. John C. Nixon, Lester Nixon, and Mr. and Mrs. Fred Loof motored to Milwaukee Thursday to spend the day visiting friends.

Mr. and Mrs. Richard P. Cavanaugh of Kenosha spent several days last week at the home of Mr. and Mrs. H. A. Radtke.

Mrs. Albert Hanke visited in Waukegan Wednesday with her daughter, Miss Lillian Hanke.

Miss Panny Westlake entered the Oak Park hospital Monday to have her tonsils removed and returned on Tuesday none the worse for the loss of the diseased members.

Miss Katherine Krahl returned home last Friday from Evanston where she has been attending school at Northwestern University for the past year.

Mr. and Mrs. Laurel Powles of Antioch, Illinois, were guests last week at the home of Mr. and Mrs. J. W. Van Patten. They have just been married and are spending their honeymoon touring northern Wisconsin. Check Alert.

Mr. and Mrs. Horregard of Wau-

JUNIORS CELEBRATE AT BIRTHDAY PARTY

A number of little folks, friends of little Miss Marion Peter from Chicago who is spending the summer at the home of her brother, Fred Peter, Jr., were entertained at the Peter's home in Antioch in honor of Marion's fourth birthday.

Games were played and the lunch which followed featured the big white birthday cake with its four pink candles. Guests of the occasion were Dorothy Monnier, Katherine Becker, Roy, Ray, and Ralph Monnier, Betty Hanke, and Charles Le Roy Anderson.

MR. AND MRS. HAYNES HAVE VISITORS

Miss Myrtle Haynes of Oak Park is spending a two week's vacation at the home of her parents, Mr. and Mrs. R. M. Haynes in the village. A niece of Mrs. Haynes, Miss Donna May Hancock of Superior, Wis., also is here spending her vacation at the Haynes home. Miss Hancock will remain until the first of the month. Mr. and Mrs. Haynes and the Misses Haynes and Hancock have been making short motor trips this week, visiting Chicago on Tuesday and Lake Geneva Wednesday.

COOPERATION ASKED OF EVERYONE TO HELP POOR CHILD

United Charities Seeks Aid of Antioch People for Little Folks

If you only saw fields of grass, and corn and cows and hogs in the movies, and if you were forced to live on a hot, noisy street in a crowded, stuffy tenement, where a cool breeze in summer is only a thing to dream about—what would you think if you got a chance to spend two glorious weeks out in the country? Thousands of boys and girls in Chicago are living under these conditions, and their chance for a healthful, fun filled outing depends upon the generosity of the farmer and downstate city and town folk of Illinois.

The United Charities of Chicago has sent an appeal to The Antioch News of this city, asking for cooperation in this good work. The railroads are doing their part by offering free transportation to the kids lucky enough to be sent to the country. Will you do your part by opening your home to these unfortunate youngsters for two weeks so they will get a chance to grow up to be better men and women? If you feel that you can help, fill in the coupon which is printed elsewhere in this issue.

As an example of the wonderful times these city children have in the country, read this letter that one of them sent to his mother last year:

Dear Mother: We are having a picnic and I want to come back next year, and we went fishing, and swimming and the horse got away on us and we have to catch him. We have a good time and mother all the milk we have to drink, so much. I will right you some more letters and hurry up and right me some more.

So goodbye,

Joe

Then here is a letter from a little girl who, apparently, was having the time of her life. She is asking about her baby sister:

Dear Mother: Just a few lines to let you know I am in good belt and hope you are the same. I have a good time. I am going to a picnic next Sunday. Can I stay to weeks longer? please, I went to Sunday School yesterday.

Does Florence walk? hers is eddie? I took a long ride yesterday evening. I have many dresses. I ride on my horse every day. Francis and Franklin are home and stay with me. the girls came after me Tues. evening.

Thursday we went to town. Well, we had company. There are five girls here. We have company most every day. I have milk every day. wed. night I am going to town. I suspect will go tomorrow too or this evening. I talk on the telephone quite often. We thrashed Oats Saturday. I love to see them thrash. I've got my hair cut again. I think I'll have my picture taken. I have four little kittens. I am to bring one home that is white and black, please answer this real soon.

With love,

yours Little Daughter Anna

Kisses to all from Anna

But these good times are not all confined to the kids. Read this letter to the United Charities from an Illinois farmer, whose heart is filled with that particular glow of satisfaction that comes only from doing good for others:

We reached home with the two boys you brought us, and we certainly wish to thank you personally for your splendid choice. In getting us such lovely little chaps—just the kind we wanted and we never saw two boys enjoy life any better. We have a large farm—lots of cows, horses, etc. They have all the milk they want—horseback rides—go swimming in the little brook in the pasture—and everything imaginable. What these boys don't find, isn't worth finding—and such good boys too.

Nearly every day they go for a drive in the auto—don't be surprised if these boys become farmers some day—they have the proper metal to be something—and I trust they will.

Will return the boys Sept. 1, as directed.

Yours for the boys' good,

Can you imagine the tales of their exciting adventures these tenement children will tell their less fortunate neighbors when they return from the country? Can't you just see Henry, whose letter is quoted below, in the center of a spellbound crowd of boys, telling them of his adventures, of which he wrote his mother as follows:

Dear Mother: Having free time. I got my soaking today. We went swimming to day and a boy, the

Local Bowlers Get Win From Burlington

A local bowling team composed of Vincent Dupre, William Huber, Emil Stedehel, Philip Wolf and Charles Ehler, went to Burlington Tuesday evening and took on the fast Burlington bowling aggregation. The Antioch crowd won the contest with a narrow margin, totalling 55 more pins on the dual score than the Burlington team but losing the first and third games of the contest, each with a narrow margin. Richard Macek and Bernie Fields accompanied the team.

Arrangements are being made for a return contest to be played off at the Antioch Palace some time within the next two weeks and for a bowling tournament to be held here later.

water was over my head and I almost drown. Bob save me.

Besides that I am having a fine time riding a horse and falling off, taking the cows to the field.

I will be home soon and be at the station. I have some hole in my shoe.

Your loving son,

Henry

Fill out the coupon and send it in today, so that the children can begin to plan their life's greatest vacation. And we venture to say, too, that you will enjoy it as much as these youngsters of Chicago.

(Coupon)

To The Antioch News:

LOCATING THE FINANCIAL LEAKS THAT

TAKE THE PROFITS OUT OF FARMING

By DAN H. OTIS

Director Agricultural Commission, American Bankers Association

INDUSTRIAL lines suffer because of inefficient firms, whose officers cling to old methods and place goods on the market, even at a loss, to compete with the more efficient institutions.

Agriculture, too, has this problem to face. We find farmers who fight new methods. They retard the prosperity of other farmers by throwing on the market poor quality products, frequently produced at a loss.

The nature of the banker's business places him in a position to help this type of farmer as well as the more progressive farmer. At the same time the banker can assure himself of good loans based on the farm as a going concern.

A study of the investments, sources of income and expenses of the successful farmers in his community will give the banker a measuring stick by which to gage the hazard entailed in furnishing loans to other farmers. This study is readily accomplished through the use of summaries of farm records. In the absence of good records, survey blanks which can be obtained from the agricultural colleges, may be used for collecting the information.

A banker in a dairy district would use data similar to Farmer A's summary in the following table as a measuring stick to judge the condition of Farmer B:

	Farmer A	Farmer B
Farm receipts	15,465	12,214
Farm expenses	2,123	1,075
Receipts above expenses	13,342	11,138
Interest on total investment @ 5 per cent.	1,070	889
Net income after deducting interest	12,272	10,249
Assets	127	130
Total investment	121,400	119,773
Operating capital (machinery, livestock, equipment)	5,822	4,473
Number of cows	18	11
Investment in cows	12,202	11,205

The total investment of Farmer A is moderate with a large percentage (27 per cent) of operating or working capital. Farmer B is low in operating capital. The number of cows is also low, which is reflected in the farm receipts, these being \$3,251 less than those of Farmer A. The expenses of Farmer B, although about one-half of those of Farmer A, are, nevertheless, high in the ratio to receipts.

The only way to safeguard a loan to Farmer B is to consider assets and not income. Before any loan should be considered at all the banker and the farmer should go over the situation, uncover the leaks and outline a definite program of improvement.

	Farmer A	Farmer B
Income from crops	11,476	1,851
From dairy products	2,342	752
Sale of livestock (including increased inventory)	1,654	250
Miscellaneous income	227	151

A good diversity of income serves to protect the farmer against years of over-production of any one farm product. Farmer A has a good diver-

CHILDREN'S DAY IS OBSERVED BY CHURCH

Pageant Given by the Little Folks
Presents Those in Attendance
at Special Service

Children's Day was observed at the M. E. church last Sunday with a pageant given by the children of the Sunday School. Twenty-eight children took part in "Gretchen's Dream." Mrs. S. Hoyer Nelson and Rev. A. M. Krahl directed the program.

As part of the Children's services the baptismal ceremonies were performed for eight children.

A silver offering was taken up to be sent to the church board of education for the educational loan fund, maintained by the church to loan to deserving students for educational purposes.

Through the courtesy of the Pollock Greenhouses each child was presented with a potted plant.

DEPOT STREET PROJECT SET FOR COURT HEARING

Special assessment notice is published this week by village authorities giving date of final hearing on the special assessment for the paving of Depot Street.

LOCAL DEALER RECEIVES LARGE SHIPMENT OF CARS

The Wetzel Chevrolet Sales Co., received a shipment of two carloads of new Chevrolet cars today.

CARD OF THANKS

We wish to thank all those who assisted us during our recent bereavement. We are also grateful to those who gave flowers.

Mrs. Rose Engler and children.

Mrs. Jack Fowles of Lake Villa spent Tuesday with Mrs. Verrier.

Arthur McFarrell of Jacksonville, Illinois, arrived in Antioch the last of the week and is now employed at the Fanny May shop.

Mrs. Pete Laursen and Mrs. Chris Sorenson spent Thursday at Bristol visiting friends.

At The Churches

St. Ignatius' Church Notes

Epicopal

Kalendar Third Sunday after Trinity Day of the Sacred Heart of Jesus. 9:30 Church School.

10:00 Matins and Sermon. July 3rd, will be Communion Sunday and the service will be at 7:30 a. m. Breakfast will be served for all those who notify Esther Setters. It is hoped that many will take advantage of this opportunity to make their communion.

The sermon this coming Sunday will concern itself with the "Spirit of Confirmation." Why be confirmed and what church do you belong to after Confirmation?

The choir has been reorganized and any who would like to sing may do so by reporting at the church at 9:30 Sunday morning. Those interested in confirmation will please notify Mr. Dixon.

Methodist Church Notes

The Methodist church for many years, has been the place of worship for vacationists of the "Lake Region" and all indications point to a renewal of acquaintances this year. A goodly number of visitors were present last Sunday and more are looked for during the summer. Rev. A. M. Krahl, the pastor, expects to be on hand each Sunday throughout the summer to receive old friends as well as the new. A most cordial welcome awaits all who attend the service. The morning worship which is held at 10:45 will be dismissed in ample time for hotel guests to reach their destination for the noon meal.

Prof. S. Nelson, the director of the church choir, which meets every Wednesday evening at 7:30 Daylight Saving Time is anxious to meet all who seek voice cultivation. His services are offered to the community by the church and no adults need hesitate to attend the rehearsal.

Mr. Nelson will have a children's choir from 7 to 8 o'clock on Wednesday evening. All children from 10 years up are invited.

Allendale school has employed Prof. Nelson to teach music to the boys of the institution each Wednesday morning.

L. R. Watson, Harry Peetsky and Lester Nixon drove in to Chicago Sunday to take in the Cubs-Plattsburg game there.

Miss Emthma Mae Harmon of Indianapolis, Indiana, is a visitor this week at the home of Mr. and Mrs. Harry Hasty of Bluff Lake.

Mr. and Mrs. L. G. Strang left the last of the week for a two weeks auto trip in Iowa and South Dakota where they will visit with relatives of Mrs. Strang.

Mr. and Mrs. Wm. Ziegler were Racine visitors Sunday.

Mrs. Myron Olcott and daughter and children visited Myron Olcott at Victory Memorial hospital at Waukegan Sunday. They report that they found Mr. Olcott able to be up in a wheel chair. Mr. Olcott sustained a broken leg when a timber from the barn fell on him during the tornado in May.

Mrs. Nettie Welch of Libertyville

is a guest at the home of Mrs. A. O. Watson this week.

Lloyd Wetzel has been nursing a broken arm for the past week as a result of a collision in which he participated in person against a truck and was unable to hold up his own end of the game without casualty.

NEWS OF STATE CAPITAL IN BRIEF

Under the provisions of a bill introduced by Senator Harry Wilson, Ploekneyville, which has passed the senate, policemen of the state are placed under the provisions of the compensation law in support of the bill. Senator Wilson urged that the present law makes no provision for compensation.

"Let us select the best there is in quality as well as quantity of egg production." This was the comment offered by Stillman J. Standard, director of agriculture, when it was suggested that an egg show be added to the classes in the poultry department of the Illinois State Fair, August 20 to 27. The premium list, now undergoing revision, will contain a division for eggs, and the exhibition will be on display in the poultry pavilion.

The section of the premium list that will offer prizes for eggs divides the show into four classes. Adults and juniors may compete for honors, both in brown and white egg classes. Seven moneys are offered: \$10, \$7.50, \$5, \$4, \$3, \$2, and \$1. The sweepstakes prizes in brown and in white eggs, \$10 in each, is open to adults or junior poultry breeders. The funds set aside for this show total \$150.

The qualification requirements, and the standards of excellence by which the exhibits will be judged, will appear in the state fair premium list, from which prospective exhibitors may gain information that will serve as a guide in selecting their entries.

Senator Barr's bill, giving county boards authority to fix the time for opening polls in the rural districts, passed the senate. Under its provisions the hours may be from six to four or from seven to five.

Representative Thomas Fekete's bill placing mutual benefit associations under the control of the state department of trade and commerce, has been passed by the senate. The measure now goes to Governor Small.

Senator Adolph Marks, Chicago, introduced a bill providing that persons registering for elections with election commissions shall declare their party affiliations at the time of registering instead of at the election.

Mr. and Mrs. Harold Watson, Mt. Vernon, are the proud parents of a daughter, born Wednesday, June 8, according to announcement received in Springfield. Mrs. Watson, before her marriage, was Miss Dorothy Emerson, daughter of Secretary of State and Mrs. Louis L. Emerson.

Representative Frank McCarthy's bill, placing grain warehouses under the control of the Illinois Commerce commission, has passed the senate, and goes back to the house for concurrence in amendment. This measure is the outcome of the committee investigation of the Chicago board of trade. The Kessinger bill, which would place the board of trade under control of the department of agriculture, and which passed the senate some time ago, has failed to advance beyond the order of second reading in the house.

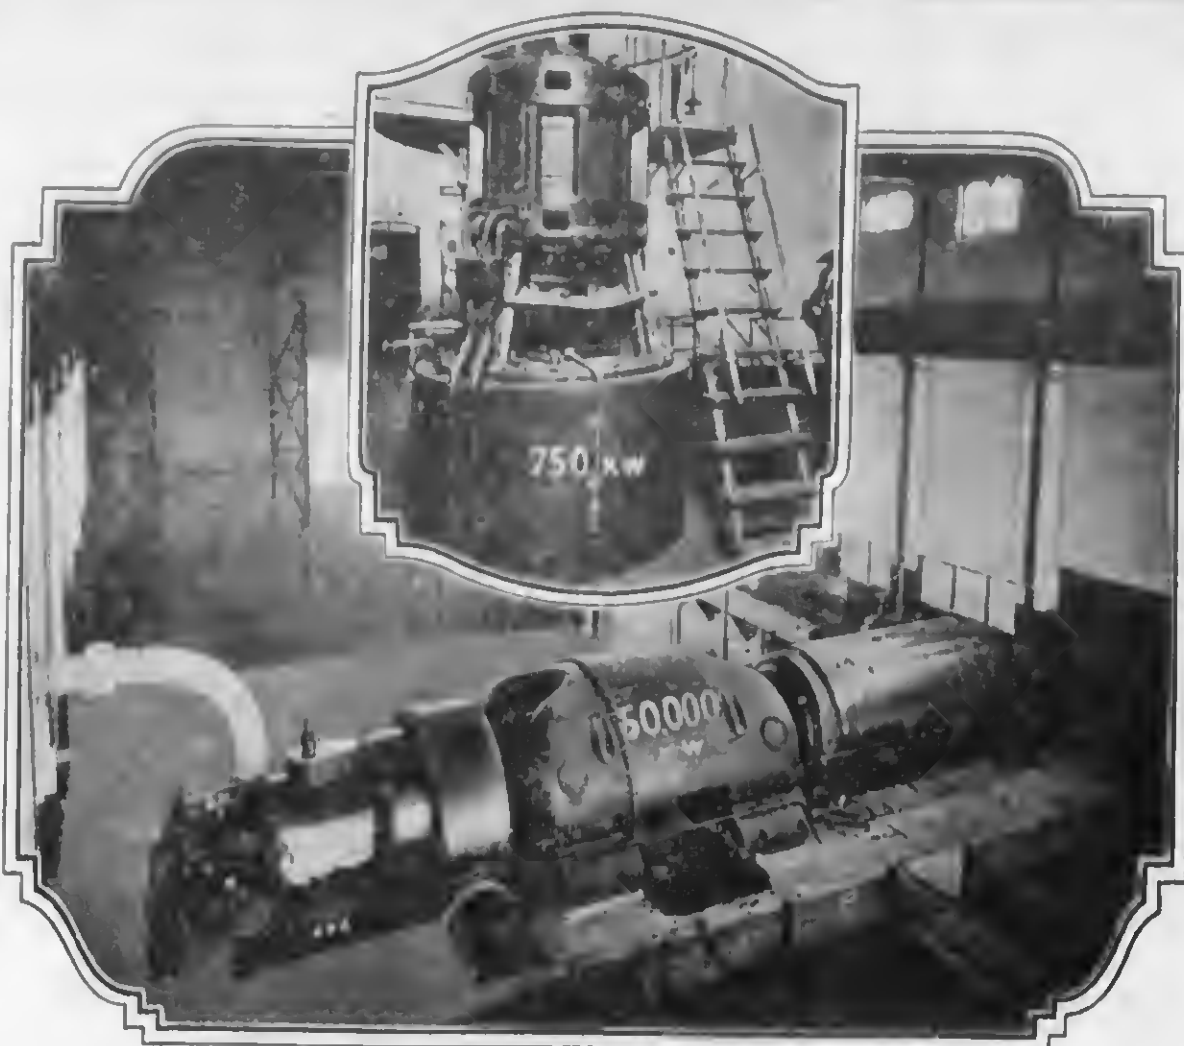

Representative Emil Johnson, Chicago, was presented with a basket of flowers by members of the house on the occasion of his thirty-ninth wedding anniversary.

Senator William Sneed's old age pension bill, which has the support of organized labor, mustered two votes short of a constitutional majority in the senate, and further consideration was postponed on motion of Senator Sneed. It may be given another call. The measure was defeated in the house.

The new primary election act, drafted to meet the possible emergency which would be created if the supreme court, in reviewing the case appealed from the Lee county circuit court, found the present primary law unconstitutional, has passed the senate and now goes to the house. Three companion bills which have to do with the printing of ballots and the filing of petitions, were passed, also.

Senator Starr's bill, limiting the working hours of women to forty-eight a week, has arrived at the order of third reading in the house, with only one change made, that to exclude public and private hospitals from the bill's provisions. Representative Lottia Holman O'Neill has championed the measure during its progress through the house, and has

New Public Service Power Producer

When the new 50,000 kilowatt electricity generating unit of the Public Service Company of Northern Illinois was put into service recently, the total generating capacity of the Company's Waukegan station was increased to 110,000 kilowatts. Although the huge unit shown in

the above picture will produce more than 66 times as much electricity as the smaller unit, it is designed to use only about one-fifth as much coal per kilowatt hour in its operation. The new generator is 80 feet long and nearly 29 feet wide. Inasmuch as the Company's Wau-

kagan station is interconnected with transmission lines extending to distant points of the Company's territory, customers throughout all of Northern Illinois are given added assurance of an unfailing supply of power and light.

succeeded in tabling a large number of amendments offered.

The biennial dinner of members of the house of representatives, was held at Hotel Abraham Lincoln. Representative Truman Snell, Carlinville, was toastmaster.

Justice Floyd E. Thompson of the Illinois supreme court, who was recently a delegate to the national convention of the order of Sons of the American Revolution held at Richmond, Virginia, in an address before a meeting of the local chapter outlined the history of the flag from June 14, 1777 to its 150th birthday anniversary.

The appointments of A. J. Clarity, Freeport, as chief justice and B. F. Thomas, Fairfield, as judge of the state court of claims have been sent to the senate by Governor Small. W. L. Leech, Ottawa, is the third member of the court.

The "Boys' State Fair School," according to S. J. Standard, director of agriculture, "is the most valuable means for dissemination of agricultural education that it is possible to present within the time limits of the fair. It is unfortunate that enrollment in this school must be limited to 322, when thousands of ambitious youths could benefit so much by attending these instructive sessions. The rules governing entrance requirements and the apportionment of representation between counties are just as fair as can be," the director commented. In accordance with the announce-

ment of the 1927 session, Cook county is entitled to 15 representatives. Fifteen counties, with population ranging from 60,000 to 100,000 may each send five students. Ten counties with between 40,000 and 60,000 inhabitants, send four, and the other counties of the state may send two each.

In each county the superintendent of schools, the president of the farmers' institute and the president of the board of supervisors or a county commissioner form a board to pass upon the qualifications of applicants. For their guidance a set of test questions is provided by the commission charged with the work of conducting the school.

County superintendents of schools, selected by congressional districts, who are to serve as assistant superintendents of the school, have been announced by the commission that conducts this educational feature of Illinois' annual agricultural exposition.

A. E. Gilpin, Centralia, A. W. Nolan, Urbana, and J. E. Hill, Springfield, have been appointed assistant principals of the school. The principal in charge is W. S. Booth, Springfield, assistant superintendent of public instruction.

The commission that conducts it is headed by the Hon. Francis G. Blair, state superintendent of public instruction. H. W. Mumford, dean of the college of agriculture, University of Illinois; E. C. Pruitt, superintendent of schools of Sangamon county; W. G. Curtis, Stockton, president of the Illinois Farmers' Institute, and W. W. Lindley, general manager of the fair, form the members of the

In the Market Place

IN certain parts of Europe some centuries ago, the farm laborer was wont to stand in the town market place holding a straw in his mouth as a sign that he was looking for employment.

Today the uninvested dollar places itself in the open market. As to an individual, it must be offered an occupation free from personal hazard, with steady employment and attractive wages.

In providing telephone facilities for nation-wide service, the Bell System has employed millions of such dollars. The savings of more than half a million American telephone users, invested in Bell System securities, have built the system that serves them. There is an investment in service, and they themselves have served by investing.

ILLINOIS BELL TELEPHONE COMPANY
BELL SYSTEM
One Policy • One System • Universal Service

Sullivan's health is improving rapidly.

The grade of state hard road No. 3 may be raised above flood stage at Mendon, if plans now under consideration by the state department of highways are consummated. This portion of the highway has been closed 26 out of the last 51 days.

The house has passed the two-cent gasoline tax bill, sponsored by Representative A. Otis Arnold, Quincy. This measure has been amended to provide that half of the revenue from the tax shall go back to the county from which it has been collected.

The senate passed Senator John Dalley's bill, amending the criminal code so as to change the penalties in a number of instances. Any one convicted of assisting a prisoner to escape from the penitentiary shall receive the same penalty as the prisoner he aids, except where that penalty is death, in which case the penalty for such assistance shall be life imprisonment. The penalty for manslaughter is changed from a sentence of from one year to life to from one to 14 years. An argument advanced in favor of the measure was that under its provisions it would be easier to secure conviction, as juries frequently vote to release suspected criminals because of the heavy minimum sentences.

The awarding of contracts totaling \$203,223 by the state division of highways for road and bridge construction in Tazewell and Ogle counties is announced.

The house passed three large appropriation bills introduced by Representative Corran, Chicago: the \$60,102,000 omnibus bill, \$542,000 court of claims awards; \$18,000,000 revenue bill.

The senate passed Representative T. J. Sullivan's bill authorizing school districts to employ dentists.

Attorney General Oscar Carlstrom in a patriotic address at Rockford criticized state universities for teaching pacifism and said the government should not reduce its defense forces under a program of false economy.

The senate passed Senator Smith's

\$1,500,000 flood relief appropriation bill.

The Weber-O'Grady bill, providing for a referendum vote in 1928 on the repeal of the prohibition and the search and seizure acts, was killed in the senate.

Representative David McClung's home rule bill has passed the house. This bill would permit any city to vote itself out from under control and regulation of public utilities.

Another home rule measure to pass the house was that sponsored by Representative Durso, creating a board of transportation to control public utilities in Chicago.

Superintendent Francis G. Blair of the state department of public instruction, and president of the National Education association, speaking before the National Editorial association at Omaha, appealed to that group to aid the educational association in its program "to insure a square deal for the youth of the nation."

A bill empowering highway commissioners to take land for hard road routes by eminent domain, when a price can not be agreed upon with the owners, received Governor Small's signature.

In the latest health report issued by Dr. Hawlings, director of the state department of public health, a total of 87 cases of diphtheria is shown for the state. The progress that is being made in checking this disease is indicated in the Illinois Health News, an informative bulletin issued by the department. It is there stated that "a total of 45 counties out of the 102 in the state report no deaths at all from diphtheria last year. There were 17 cities of 10,000 or more people that escaped without losing a single person to that treacherous disease."

Members of the senate and their ladies enjoyed a dinner party at the Illinois Country club.

Stroke of Luck

A woman's hat was blown off in a London street and run over by a bus. On recovering it, we understand, she wore it home and was the envy of every woman she met, as they all thought she had the very latest style. —The Humorist.

For Economical Transportation

Chevrolet has changed every idea of how fine a car you can buy for little money

Because it offers a host of costly car features and refinements, and a type of performance previously undreamed-of in a low-priced automobile—the Most Beautiful Chevrolet has changed every idea of how fine a car you can buy for little money.

Regardless of the car you may now be driving, regardless of the price you expect to pay for your next automobile—come to our salesroom and see the new Chevrolet models. CHRISTIAN SCIENCE CHURCHES

"IS THE UNIVERSE, INCLUDING MAN, EVOLVED BY ATOMIC FORCE?" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, Sunday, June 19.

The Golden Text was from Isaiah 45:22, "Look unto me, and be ye saved, all the ends of the earth: for I am God, and there is none else."

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "And the seventh angel sounded; and there were great voices in heaven, saying, The kingdoms of this world are become the kingdoms of our Lord, and of his Christ; and he shall reign for ever and ever. And the four and twenty elders, which sat before God on their seats, fell upon their faces, and worshipped God, saying, We give thee thanks, O Lord God Almighty, which art, and wast, and art to come; because thou hast taken to thee thy great power, and hast reigned" (Rev. 11:15-17).

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Either there is no omnipotence, or omnipotence is the only power. God is the infinite, and infinity never began, will never end, and includes nothing unlike God" (p. 249).

acted business in Bristol Saturday.

Mr. and Mrs. Klaus Marks and daughters, Nina and Marie, visited Mr. and Mrs. James Briggs at Racine.

Mrs. Johnson and grandson are spending a couple of weeks with relatives in the northern part of the state.

Mr. and Mrs. James Walsh were Racine callers Monday.

Mr. and Mrs. Fred Forster attended the play "The Birth of a Race" at Bristol Monday evening.

Hunch Defined

A "hunch" is just a man's counterpart for a woman's intuition.—Boston Herald.

Oats for Seeding

If you are not sure what variety is best for you, confer with county agent only.

OATS rank second in money value, being surpassed by corn only.

OATS for seed purposes should be well matured, clean, free from weed seeds and fungus spores. They should be run through a good fanning mill to take out all small kernels and seeds. To do this a number of cleanings are necessary. Only good-sized, plump, kernels should be sown. They should be of the same variety to secure evenness in ripening. The variety itself depends upon the soil, locality and the purpose for which it is grown. All in the same neighborhood should agree upon the same variety. Keep it unimixed and ship in carloads.

MICKIE SAYS—

BY GOLLY, WE LIKE TO GET ITEMS FOR THE PAPER, BUT WHEN THEY ARE TWO OR THREE WEEKS OLD WE DON'T WANT 'EM. NEWS IS LIKE EGGS—IT DON'T IMPROVE BY RIPENING!

Synthetic Rubber

During the World war when Germany was cut off from supplies of crude rubber a great effort was made to produce synthetic rubber. Toward the close of the war about 150 tons of synthetic rubber were being produced monthly in Germany from iso prene derivatives, but the product was inferior to natural rubber and really served well only in hard-rubber goods. The industry ceased at the close of the war.

Not the Real Thing

Much that passes for genius these days is merely talent with a good press agent.—Boston Transcript.

Uncle Eben

"Theazier a man is," said Uncle Eben, "de ez anxious he is to act like he was showin' somebody else how to work."—Washington Star.

Heroes and History

There are historians to whom the outstanding mystery of the past is how the great things could have been done by make-believe heroes.—Boston Herald.

Bulky Books

Too many people are impressed by sheer bulk in books. As often as not, the thicker the volume the dicker the author.—Farm and Fireside.

ing failed because of errors in the proceedings which made it possible to have them set aside. Action was begun for the third time in April, when the patrons of the Channel Lake region went before the Antioch and Spring Grove township boards to petition for their withdrawal from the old district and annexation to the new. The Antioch board accepted the proposal and the Spring Grove board refused. Following the refusal, appeal was made to County Supt. Simpson, who decided yesterday in favor of the petitioners. Annexation of the new district will not lower the tax rate in Antioch, according to authorities, because of the increase in numbers of children in attendance at the grade school, but it will enable the Antioch board to provide a school first class in every respect. The Channel Lake unit represents about \$100,000 and Channel Lake people expressed in taxable property.

Attorney E. V. Orris, counsel for the objectors who own about \$100,000 of the taxable property, stated that he would immediately ask for an injunction to stop the order from being carried out.

SPECIAL ASSESSMENT NOTICE

NOTICE IS HEREBY GIVEN to all persons interested that the President and Board of Trustees of the Village of Antioch, County of Lake and State of Illinois, having ordered that a local improvement be constructed on portions of Depot street consisting of paving, grading, draining and otherwise improving that portion of Depot Street from the Easterly edge of the concrete pavement on Main street to a point fifty feet westerly of the center line of the right of way of the Chicago, Minneapolis and Santa Fe. Rail-way Company, known as Antioch Special Assessment docket number 15, the ordinance providing for the same being on file in the office of the Village Clerk of the said Village and being attached to the petition on file in the office of the Clerk of the County Court of the County of Lake and State of Illinois.

And said President and Board of Trustees of said Village of Antioch having ordered that an assessment be levied for the cost of construction of such improvement entitled as aforesaid, and said Village having applied to the County Court of said Lake County for an assessment of the cost of said improvement according to benefits and an assessment roll and report having been made and returned unto said court, the final hearing thereon will be on the 9th day of July, A. D. 1927, at ten o'clock in the forenoon of said day or as soon thereafter as the business of the court will permit.

All persons desiring may file objections to said court on or before said time and may appear on said hearing and make their defense. Said assessment is payable in ten installments with interest at the rate of six per cent per annum on all installments from and after the date of the first voucher.

The total amount of such assessment as shown by the estimate is \$17,744.00 and the total amount assessed as benefits upon the public is \$3,000.00.

Dated at Antioch, Illinois, this 21st day of June, A. D. 1927.

WILLIAM F. ZIEGLER,
The person appointed by the President of the Board of Local Improvements of the Village of Antioch, to make said assessment. 4344.

RICHARDS FUNERAL HELD HERE TUESDAY

Aged Resident of Antioch is Laid to Rest in East Fox Lake Cemetery

The death of Charles S. Richards, for many years a resident of Antioch and vicinity, occurred here Sunday afternoon. The deceased had been in poor health for a considerable time but the end came suddenly as a result of heart failure and other complications.

Mr. Richards was born in Monmouth, Illinois, in 1863, and lived there until he was eighteen years of age when he moved with his parents to the Edwin Richards farm near here. He farmed for many years in the community and subsequently moved to the village, where he purchased a home on South Main street. He was a member of the Modern Woodmen lodge of Antioch and had a wide acquaintance to the community.

He is survived by a wife, a daughter, Miss Mabel Richards of Los Angeles, and one sister, Mrs. Norman Mattox of Chicago. Another sister, Mrs. Matt. Sorenson preceded him in death a short time ago.

The funeral services were held at the Methodist church Tuesday afternoon, the Rev. A. M. Krahl officiating and burial was in the East Fox Lake cemetery. Mr. and Mrs. Norman Mattox and Mr. and Mrs. Harry Thompson and son of Chicago were here for the obsequies.

Where Fruit Is Cheap

On the west coast of Africa pineapples can be grown by the hundred thousand without any attention. Bananas can be bought at a few pence a hundred, while oranges are as cheap.

Jud on Selfishness

Jud Tinkins says selfishness is what makes a man grab the dough before the pastry is properly cooked.—Washington Star.

Mosquito's Good Blood

The mosquito is born or poor but industrious parents but live to his veins sum up the best blood in the country.—Josh Billings.

FORMER SURGEON IS HONORED BY HIS ASSOCIATES

The late Dr. Wm. E. Schroeder, for many years a surgeon in Chicago and well known to everyone in Antioch and vicinity where he maintained his summer home and where Mrs. Schroeder still lives, was accorded honors by his profession in a memorial service held last week at Wesley Memorial hospital in Chicago. The occasion was the unveiling of a portrait of the doctor who, prior to his death on March 19, 1926, chief of staff of the hospital and professor of the medical school of Northwestern University.

In accepting the portrait on behalf of the trustees, George W. Dixon, president of the hospital board said:

"For thirty-five years Dr. Schroeder gave his life to the relief of the suffering. During his life time he performed more than 18,000 operations, fully one-half of which were without compensation.

"His influence upon the surgery of this country has been very marked, and the value of his instruction cannot be computed."

ROY W. BRACKER EXPLAINS LOSS

(Continued from page 1)

curly Savings bank of Eureka, Kansas. This was done, he said, at the request of Harold Martin who asked him to do it in order to aid him and Clark Nye who was then an officer of the bank Nye had weakened his Kansas bank through investments made with Martin and Caleb Busick of Winnetka in an oil company known as the Harrington Oil Co.

The money was transferred by certificate of deposit through a Chicago bank. In the transfer the amount deposited by the county treasurer was credited as \$100 instead of \$100,000 but Bracker was furnished a certificate naming the full amount. Subsequently the bank failed.

Ira Pearsall, who succeeded Bracker as treasurer is also under custody charged with having concealed the shortage and rumors today indicated

Lake County Outdoor Relief Claims Passed

The board of supervisors of Lake County last week allowed claims for care of the poor for the past quarter amounting to \$16,210.13. Waukegan township claims for \$3,908.40, were highest with other claims allowed as follows: Shiloh, \$1,153.20; Deerfield, \$2,030.42; Benton, \$1,174.97; Newport, \$96.22; Lake Villa, \$176.30; Antioch, \$85.39; Avon, \$138.39; Libertyville, \$114.09; Waukegan, \$172.31; Cuba, \$26.12; Vernon, \$21.96; West Deerfield, \$23.36.

that two other prominent Waukegan officials were involved. Nye, Cusick, Martin have also been involved.

Bracker hopes to regain some of the sum from the now defunct bank was their official at the time of the of Kansas on the grounds that Nye swindle and they are therefore liable for his actions.

A claim for the county has also been advanced for \$33,000 interest 000 deposit but which he deems having money which it is claimed that ing received.

Confidence and Quiet

Among the common people whom we know it is not necessarily those who are busiest, not those who, meteor-like, are ever on the rush after some visible change and work. It is the lives like the stars, which simply pour down on us the calm light of their bright and faithful being, up to which we look, and out of which we gather the deepest calm and courage.—Philip Brooks.

Human Derelicts

Beach combers are vagrants at benches and seaports, especially unclassied white men living as loafers in the Pacific islands. The word is also used to describe long waves rolling up the beach.

Cherishing the Aged

It is claimed that furniture made of a new wood is unbreakable. We are of the opinion that in future all antique furniture should be made of this.—The Humourist

Bracker got an interest on the \$100,000 deposit but which he deems having money which it is claimed that ing received.

VOLUME XL

ANTIOCH, ILLINOIS, THURSDAY, JUNE 23, 1927

NUMBER 43

C. E. Bairstow Cadillac Sales and Service

See the new Cadillac and La Salle at 115 South Sheridan Road in Waukegan, or call 1723 on the telephone and Mr. Bairstow will have a salesman bring the model you want to your home.

This is one of the modern and up-to-date automobile establishments of this section and enjoy a large patronage.

The Cadillac again came forward and set the "standard of the world" in high class motor cars. The power plant in the Cadillac V. Type 90 degree eight cylinder engine that moves with such precision and quietness that one knows that it is the ideal that has been attained. Then the four wheel brakes which have been perfected by their engineers provide the utmost in safety. The new body designs are wonders of modern coach building. It represents power, speed, flexibility and control, luxury, ease and comfort and can be seen and purchased at C. E. Bairstow's in Waukegan.

The result is revealed in Cadillac show rooms—La Salle, a fine motor car built wholly within Cadillac's plants, but, in the widest sense of the term a "product of General Motors."

Never was a car so rigidly tested in advance of its presentation to the public as La Salle has been tested at

the General Motors proving ground. It is a new car to you; it is a tried and proven car to them—as distinguished in performance as it is different in appearance. We present La Salle with very great pride and invite you to view its six models.

For almost half a century Cadillac has striven for supremacy in American motordom. The latest products of Cadillac confirm the universal opinion of past years that the ideal has been attained. More than two and a half million has been spent in figs, tools and dies alone to produce the finest Cadillac in history. Providing by means of new engineering, a new standard of beauty, a new measure of ease and a new brilliancy unequalled in Cadillac history, a NEW and BETTER Cadillac, they have sustained the past policies of this organization. Every motorist aspires to drive a "Cadillac" and the present prices make possible this worthy ambition.

In their service department they employ only expert mechanics and have all the necessary equipment for turning out first-class work at the C. E. Bairstow Garage in Waukegan.

At the head of this institution are men of unusual automobile experience as well as unquestioned ability. Adv.

Waukegan Glass Company Glass and Glazing Contractors

With their office at 6 South County Street in Waukegan, this firm has a complete line of plate and window glass, windshields, auto glass, mirrors and art glass. They will also resilver your old mirror. Phone 3481.

There are countless articles that we could get along without in this world of ours and still have comfort. But how many of us could get along without glass and its allied products. We might say this is a glass world for we use glass for hundreds of sanitary purposes and comforts daily.

When we see a large plate glass window, usually in some large downtown store windows, little do we realize the time, effort and expense necessary to produce that glass. We all realize that such a glass cost considerable money, but few of us know why. The material, fine sand is cheap, but the heat and blowing necessary to bring it out into a flat surface requires energy, time and skill.

At the Waukegan Glass Co. in Waukegan, Ill., they know the glass business from A to Z. Being thoroughly experienced in how glass is made they consequently know how to handle it. Possibly you would like

to have a desk top to be made so as to fasten same to desk. They will cut a hole just large enough for screw for making it a permanent part of the desk.

This glass company can cut glass for you most any way you desire it. To cut glass is one task, but rounding the edges is another. Here also will be found machinery for this purpose. Such machinery is costly to install, but it is only part of the high grade service rendered.

Here you will find a superior quality of glass, having clearness, and will not check. To look at glass the layman could not tell if it was O. K. or not, but by driving back of it all day long a serious headache might develop. Not so with glass from the Waukegan Glass Co. in Waukegan for they guarantee their glass and all products including Plate Glass, Window Glass, Mirrors and glass for every purpose.

We in this Annual Farmers' and Business Men's Review wish to give this enterprising firm commendable mention for the wonderful glass service they are offering the public of this section. Adv.

Hearst W. Cady General Insurance

You will find all lines of insurance, including auto, bond, fire and life, in American companies at 223 Washington Street in Waukegan. Also automobile financing and commercial loans.

With American people, insurance has become an institution. Today as never before, insurance is recognized as one of the essentials which the responsible man cannot get along without. This is probably true because people are realizing more and more that there are certain elements over which they have very little or no control. No man can be sure that he will not get sick and die next week. No individual is certain that he is not going to drive in front of a train. Fate takes men mysteriously, and no responsible man is willing to run this risk without insuring his family of some protection in case of accident.

No business with the possible exception of the automobile industry, has had a greater growth during the past ten years than the insurance business. The great insurance companies of the country are recognized as true commercial assets to our nation. This local company is an outstanding example of all that an insurance agency should be. It deals in all types of insurance, representing only first rate companies in every line.

Insurance requires close study and is a matter to be learned not in a month or a year but through long and thorough experience. No man engaged in business or working at a

profession or occupation has time to study insurance any more than he has time to study law. He cannot know the particular kinds of insurance which best suit his particular needs any more than he knows what kind of medical treatment is good for him. All these things are work of experts. And it is here that the modern insurance agents, such as represent this office do their work.

You consult a representative of this office just as you consult your lawyer. You tell him your situation, your resources and the amount you wish to spend for insurance and he will tell you just the kind of insurance you need. The firm believes in this way they can build up a clientele acquired entirely by so-called high power selling methods.

So whether you wish to insure your car, or simply a plate glass window, you cannot go wrong by consulting a representative of this firm. They will study your problems just as a successful lawyer studies a case. They will tell you exactly what your need is and how you can meet that need at a minimum cost.

The owners of this agency are men of particular high standing in the business world. Their word is always as good as their bond in the true sense of the saying. By their honest efforts to serve and their square dealings they have given their business an enviable dignity. These men are recognized too, as indispensable in the life of the community. Adv.

SPRING WHEAT PRODUCTION IN ILLINOIS

(By Robert W. Stark, Associate in Crop Production)

Spring wheat is one of the minor cereals in Illinois. Notwithstanding its limited production, however, there continues to be considerable interest manifested in the crop, judging by the requests for information about it received by the Experiment Station each year. Interest naturally is greater in years when unfavorable weather has prevented farmers from sowing their usual acreage of winter wheat.

As a cash grain crop spring wheat deserves a more important place in Illinois agriculture than it now has. Illinois farmers are in need of a spring-sown cereal which may displace at least a portion of the oat acreage. Spring wheat is well suited for this purpose since it usually makes an excellent pasture crop for the clovers and also is capable, under favorable conditions, of yielding a larger cash return to the acre than oats.

On the field at DeKalb winter wheat ranks first in gross acre value, corn second, spring wheat third, and oats fourth. The margin in favor of spring wheat as compared with oats amounted to nearly \$7 an acre. Compared with corn, the gross acre value of spring wheat was only about \$4.50 less. It is true that the yield of corn was considerably reduced two years of the ten, because of its immaturity when caught by freezing temperatures, but this a hazard which has to be reckoned with in northern Illinois. At Urbana, located in the heart of the corn belt, corn and winter wheat were practically on a par in gross acre value, spring wheat ranked second, while oats yielded nearly \$8.50 less than spring wheat.

Inasmuch as the cost of growing an acre of spring wheat is not greatly in excess of that of growing oats, and both crops require labor at the same season of the year, a larger production of spring wheat as a substitute for oats in central and northern Illinois would seem justifiable.

Spring wheat may be used at any place in the rotation where it is desired to grow a small grain. It may at times prove a desirable substitute for winter wheat when weather conditions the fall before prevent sowing the latter. It is, however, usually sown as a substitute for oats following corn. In the latter case there is considerable danger of serious seed infection unless the corn stalks are removed or plowed under. Seed is produced by the fungus Gibberella sublineata, which also causes one form of root and stalk rot of corn. Old corn stalks infested with the fungus are one of the important sources of spores. These spores are distributed by the wind. Many of them lodge on the immature heads of wheat where, under proper climatic conditions, they grow, causing seed. Data secured during a season of serious seed infection showed that Illinois No. 1 was the least susceptible of the varieties being tested that year. The varieties ranked in the following order of susceptibility: Illinois No. 1, White Australian, Progress, Kota, Marquis.

Spring wheat is grown to a limited extent in all parts of Illinois but is a crop of some importance only in the northern and central sections. Data secured from the DeKalb and Urbana experiment fields indicate that it is less remunerative than corn and winter wheat but more profitable than oats.

Marquis is recommended for both the northern and central sections. Other red spring varieties which in recent years have given satisfactory yields are Blue Ribbon, Kota, and Progress. The latter has been tested one year only.

Rate-of-seeding experiments have yielded variable results. The Station uses approximately 2 bushels an acre in the variety trials and finds that a satisfactory amount. Wheat sown in 4-inch drill rows produced a three-year average of 18.7 bushels an acre compared with 16.8 bushels produced when sown in 8-inch drill rows.

In date-of-seeding experiments conducted at Urbana for five years, wheat sown March 1, or as soon

(Continued on Page Three)

SHIRLEY MAE BEAUTY SHOPPE Marceling and Permanent Waving

Gladys A. Coburn conducts a modern beauty shoppe at room 203 Waukegan National Bank Building in Waukegan. Here you will find specialists in all kinds of beauty treatments including shampooing, scalp treatments, manicuring, facial massage, hair tinting and dyeing. Marceling and water waving and permanent waving a specialty. Phone 3807 for appointment.

This Beauty Parlor is rated as one of the most up-to-date establishments of its kind in this section of the state, as is evidenced by their rapidly increasing patronage and gratified customers, not only from the city but from the more discriminating matrons and misses from the surrounding towns and country as well.

It is every woman's desire regardless of her age or surroundings to look her best, and the artists at this

beauty parlor can do wonders in the improvement of one's personal appearance. Therefore this modern beauty culture establishment is a valued asset to the community.

The Shirley Mae Beauty Shoppe is widely known throughout this section for they are artists throughout, skilled and equipped for shampooing, water waving and marceling.

Nothing softens the lines and improves the features more than the proper waving of the hair, "Milady's Growing Glory."

These beauty culturists are especially equipped, are thoroughly experienced in all branches of facial treatments in the cosmeticians art, and are competent to give expert advice as to the proper treatment to produce best results for the patron's own particular case. No matter how discriminating a patron may be, the

most advanced modes of beauty culture will be found here for their approval.

If through improper care, or impurities your features are marred by blemishes or blackheads, a few treatments at this Beauty Parlor will clear them away and your skin will regain that healthful mellow glow which comes only with a healthy skin.

The woman of today, whether in business or not demands the full value of her personal appearance and the modern beauty shop is a valuable item in the commercial life of any community. So in this business review we take pleasure in complimenting the Shirley Mae Beauty Shoppe in Waukegan upon their rapid progress and merited success in their line. Adv.

CHARLES JACOBS SHOES

Children's Shoes A Specialty

Located at 23 North Genesee St. in Waukegan, this firm is exclusive agents for Dr. Posner's shoes for girls and boys. They also handle a full line of Hanover shoes for men, and Nettleton shoes for women and girls. Phone 760.

In these times when all business is experiencing the reaction period which followed in the wake of the wild orgies of spending money during the war, the buying public is rapidly returning to more conservative and economical ways. This is causing every business man to awaken to a new realization in the operation of his business. The shoe business is no exception and the up-to-date shoe dealer has prepared to supply his patrons with dependable footwear at consistent prices.

Since opening their door for busi-

ness this well known firm has made it their policy to handle shoes that are made of the highest quality at a very reasonable price. For every dollar paid, you get a full dollar value. Their commodious store room is at all times completely stocked with nationally known brands of shoes, thus securing the prospective buyer from inferior qualities. Through their buying power, they are enabled to command concessions in a degree that the customer is much benefitted by the savings.

Their mammoth stock contains a shoe for every need. Men's and women's dress shoes, men's work shoes, etc., all marked at the very lowest prices, quality considered.

The salesmen at this popular shoe store not only sell you shoes—they go further—they fit them to your

feet. This proper fitting of the feet insures satisfaction with no extra cost to the purchaser. All their salesmen are expert shoe fitters, skilled in the art of fitting the human foot most comfortably.

Another feature of this place is the fact that the stock is kept up-to-date. The latest styles can always be found at Charles Jacobs in Waukegan.

We also wish to state that the management of this large progressive shoe house has always been a great booster for the community and through commendable civic pride and untiring efforts to conduct a business that their fellow citizens could point to with just pride. They certainly merit the leading position they now occupy in the commercial world of this section. Adv.

WISCONSIN'S OPPORTUNITY WITH ALFALFA

(R. A. Moore and L. F. Graber)

Alfalfa has become an economic necessity in Wisconsin's agriculture. With thirty years of steady growth the dairy industry of Wisconsin now stands at the lead in the production of cheese, butter, condensed milk and in the number of dairy cattle. With all these great strides, however, the production of the right kind of home grown feeds for live stock has lagged far behind. Clover, which once supplied protein in abundance, is now a general failure. The cropping strain of forty years or more has left the soil unfavorable to this old friend of the Wisconsin farmer. The soil must be fed with lime, phosphate and manure to bring back clover and to raise a much better hay crop—alfalfa.

Alfalfa Superior to Clover. Because of its great yields and drought resistance, alfalfa is superior where it can be successfully grown, to either red or alsike clover. New seedlings of alfalfa on favorable soils will most frequently live through a severe siege of drought when adjacent new seedlings of clover may be

completely killed. Established fields of alfalfa will produce good yields when drought is so severe that clover and timothy fail. In their first year's growth and later, alfalfa roots will penetrate the soil more than two and three times the depth of clover seeded under identical conditions. This deeper root growth makes alfalfa a much more certain and easier crop to grow than clover where soil conditions are favorable. Especially is this true on sandy soils where drought is a most important factor to be contended against.

The average yields of alfalfa hay in Wisconsin are nearly a ton per acre more than those of clover. However, on the newly cleared lands of northern Wisconsin, and other places where clover grows luxuriantly and is easily and readily established without using the extra precautions required by alfalfa, the clovers are often the most desirable crops for hay.

More High Protein Hay Needed.

Protein is one of the essential constituents of any feed. It takes protein to make milk and meat, and it takes feeds high in protein to grow healthy, vigorous, young livestock. Yet, for the past eight years an average of 86 per cent. of our tame hay land has been devoted to low protein mixed hay (timothy and clover) and to timothy hay—still lower in this essential.

Wisconsin's hay acreage, like many other dairy states, is high in low pro-

tein hays and low in high protein hays, such as alfalfa and good clover. Only 11 per cent. of the acreage has been given to high protein clover and only 3 per cent. to alfalfa, which is still higher in protein and feeding value. There is not enough protein in mixed hay, timothy and grain crops to satisfy the livestock needs. Consequently, protein is bought in the form of alfalfa hay, shipped at high transportation costs from the far West, or in the form of mill feeds and other concentrated feeds, to balance the low protein crops raised on the farm. Hence the enormous feed bills. With home grown alfalfa, these bills can be largely reduced and to a great extent the money now sent out of the state for high priced, high protein feeds, may be kept at home. Alfalfa Most Efficient Producer of Protein.

The average acre of alfalfa in Wisconsin will produce six times as much digestible protein as does timothy; four times as much as does mixed hay (timothy and clover) and twice as much as does clover alone. Alfalfa hay contains nearly as much digestible protein as does bran and is practically equal to it in feeding value. It will, therefore, in a large degree make possible the production of an economical and balanced home grown ration on the farm.

Wisconsin needs at least a million

(Continued on Page Two)

GLEN ROCK BOTTLING WORKS

Bottlers of Pure Beverages

This modern and metropolitan bottling concern is located at 834 Glen Rock Ave. in Waukegan. They are manufacturers and bottlers of all kinds of carbonated beverages. Phone Waukegan 405.

An air of sociability and good cheer is noticed every place where products of the Glen Rock Bottling Works in Waukegan are being served the patrons, as they are highly palatable and the sparkle and rich flavors produce a smile upon the faces of the ones served that makes for happiness and contentment.

They manufacture a complete line of carbonated beverages and in their very modern plant the bottle is rarely touched by human hands until ready to be put in the cases for delivery. Complete sterilizing is one

of the features of this very sanitary service.

The delivery service consists of a fleet of trucks that are kept constantly busy covering all of this part of the country. All you have to do is to call them over the phone and you will find how soon the order will be placed.

They make a specialty of refreshments for weddings, socials, dances, fairs, showers, clam bakes, ball games and all other gatherings. They offer excellent delivery service in affairs of this kind.

The manager is an excellent business man and a good authority on modern beverages. He continually studies the latest developments in the beverage world, a wide-awake reader and is a practical man at the busi-

ness. These combined qualities have brought the business of this present institution to the present prosperous basis. He believes in the highest quality, excellent service and fair prices.

It has stood as a commercial barometer in the community for some time. As quite a great deal of its business is transacted out of the city one might think that such a concern would take little interest in the affairs of the city in which it is located. Their activities have proven however, the Glen Rock Bottling Works is one of the most important features in local commercial affairs and that its management is at all times actively interested in the community's progress. Adv.

E. T. SARGENT'S**Sporting Goods**

With store room at 30 North Genesee Street in Waukegan, this store strives to have what you want when you want it. Give them a trial. Phone 6.

This modern establishment occupies a distinctive place in the life of the community. The general spirit of this store is that of the great outdoors, promoting the sports that bring the people closer to nature and suggest thoughts of the golf, angling, tennis, base ball, bathing and other of the sports that keep folks in good health, you will find a complete assortment at this store.

Here also will be found a most complete line of ammunition and

hunters' supplies.

For many years this store has been fishermen's headquarters, supplying the latest and best in rods, baits and other equipment, all of which has been approved by the sportsmen of the country.

If you find it inconvenient to come to town just drop this firm a card or phone them and your order will receive prompt attention. You will always find everything as represented and as reasonably priced as anywhere in the world.

They have the reputation of being authorities on the latest ideas in sporting goods. They make it a part of their business to keep themselves

thoroughly posted on the developments of the sports and when they visit the wholesale markets are prepared to make selections that insure their patrons the latest and best to be had. Whatever they say in reference to their stock of goods you can rely on as their word is authority.

In this Annual Business Review we are pleased to make commendable mention of this establishment and their high grade merchandise and predict that Sargent's Store in Waukegan, Ill., will long continue to be looked upon with favor by the buying public of this section. Adv.

FRANK BURKE HARDWARE**Wholesale and Retail**

The most modern hardware in Lake County is located at 18 South Genesee Street in Waukegan. Mr. Burke has been in the hardware business for 49 years and everything is hand-made and the best in the country. He carries a complete line of hardware, harness, tools, cutlery and paints. Phone 372 and 373.

This well known and reliable firm, located here has long entered to the farmers' needs in this section and specialize in better grades of hardware and paints. They supply a large territory and have come to be known in this country as the foremost in their line, and by reason of their satisfactory service are rapidly expanding, and justly merit their

rapidly increasing patronage. Being amply financed, they are enabled to buy in large amounts, thus demanding quantity discounts, which is quite a saving and is passed along to the patrons.

The people of the surrounding territory as well as in the city long ago learned that at this store they can always get what they want when they want it, which is a feature of great convenience.

Shelf hardware, tools, cutlery and a thousand and one specialties are featured in this stock, which they carry in endless array. They carry the best known brands of paints. If you wish to paint your house, barn, silo or anything on the farm, consult

this well known firm, and they will supply you with the best grades for the purpose at a moderate price. Through their long experience they are able to give advice on this subject.

For this reason the farmers of this section unite in a vote of appreciation of the magnanimous service of this aggressive establishment. The sales persons here will be found courteous and tireless in their efforts to serve you. In this business review of our progress we wish to commend the Frank Burke Hardware for their honorable business methods. Adv.

J. MEYER'S**Cigars, Tobacco and Candies**

Sole distributors of the nationally known Dutch Master and La Palina cigars. This is the largest jobbing house in Lake County, and is located on Sheridan Road at Water Street in Waukegan, Ill. Phone 670.

This progressive wholesale tobacco house enjoys a large and increasing patronage throughout this part of the state, meeting and satisfying the demands of the retailers in a most satisfactory manner. As lenders in their line they of course carry the best grades and most popular brands of goods in their line. They are recognized by the trade as dependable dealers with a superior service.

Among all other institutions of this community there is none that has

met with greater favor with both the trade and the consumer than this firm of aggressive business men. Their lines of both staple and specialties will be found standardized in quality and quantity and guaranteed fresh and wholesome.

The large volume of business transacted here does not permit of goods becoming old or stale as their stocks move rapidly and are kept complete only by the receipt of daily shipments direct from the jobbers.

It is a well known fact that the merchant can buy much cheaper and have a wide range of selection when dealing with a reliable and completely stocked institution like this one. Their ability to buy in large quantities

creates a saving which they pass on to the retail merchant. Their complete service distinguishes this house above others of the ordinary kind in a similar line.

They have a host of patrons among the leading retail firms of this and the surrounding territory which is steadily increasing. This is attributable to their outstanding policy of filling all orders promptly and making expeditious delivery of the same.

In making up this Business Review we find no firm more worthy of special mention than this one and refer our readers to retailers using their well known and superior brands of goods. Adv.

WAUKEGAN BOILER WORKS**Boilers, Tanks and Electric Welding**

Located at 222 Market Street in Waukegan, this firm makes a specialty of marine and stationary boilers, tanks and stacks. They also do electric welding and sheet and structural iron work of all kinds. Phone 835.

This thriving firm conducts one of the most modern and up-to-date boiler shops and welding plants to be found in this part of the country.

The proper and necessary machinery is here employed, with the result that the reasonable charges for first class work has gained for them a large and satisfied patronage not only from the place where they are located, but from all the surrounding territory as well.

The Waukegan Boiler Works in Waukegan specializes in all grades of boiler work and the welding of cast-iron, bronze, brass and aluminum. The shop is a feature of great convenience to the motorists, garages,

manufacturers, and the farmers who can here secure economical repairs without costly and annoying delays.

They are especially well equipped in both skilled employes and modern mechanical appliances, for the care and repair of all styles of boilers. It makes no difference how large they may be, or how small, this efficient establishment can do the work and complete it in a way that will cause you to remember them the next time you have anything in their line.

In these times of civic and industrial economies, it is a matter of the greatest advantage to have such an efficient establishment to resort to in time of dire need, and the importance of having the services and advice of these skilled mechanics near at hand is a matter of no small value. Many of the articles repaired and put in shape by them are, to all intents and purposes, practically as good as new, which adds greatly to thrift and

economy.

They have proved themselves a source of more than ordinary convenience in the automobile line as well. In many emergency cases the motorist, through their rapid and efficient operations, is enabled to continue their journey with the minimum of delay and expense. They performed a wonderful service in a thousand and one ways.

Reasonable charges for high class work has been an important factor in the development of their business and has caused the public to have the most implicit faith in their ability. This they have never abused.

In making this review of our progress industrially, we are pleased to commend the management upon the efficiency of their plant, and we wish to direct all our readers to the Waukegan Boiler Works when in need of this class of service. Adv.

JOHN J. LIST**Home of the Lucky Wedding Ring**

Located at 34 South Genesee St. in Waukegan this reliable jewelry store stands ready and willing at all times to be of any possible service to you. Call in and get acquainted the next time you are in town. Phone 2674.

This is a jewelry store that is complete with everything that is the latest and best, and as a proof of our statement we suggest that you visit the establishment of this popular store. Here you will find everything there is in the jewelry line, and upon examination you will find that the goods are of the highest quality. Diamonds, silverware, golden ware, ivory, novelties and suitable presents for every occasion.

The John J. List Store in Waukegan is one of the most progressive establishments in the community and is meriting the large patronage it is receiving. Whatever you may wish in diamonds, watches and jewelry you will find that they have provided in this store a choice assortment

from which to make your selections. As regards quality you may rest assured that whatever you purchase here will be priced at a most reasonable figure for this establishment is in charge not only of a reliable business man, but one who has had wide experience in this field and knows the business from the ground up. All of those many articles of jewelry so dear to the feminine heart are offered in a great profusion of attractive patterns, and courtesy and accommodation marks their service.

In this stock is a wide variety from which to select in visiting cards, place cards, favors, everything for wedding and shower parties.

Another feature is the fine stationery, gift novelties, party favors and season cards.

Everybody does not appreciate the value to a city of having a strictly modern and up-to-date jewelry store which carries a complete stock on hands at all times. Since the time this well known store first opened to the people the local public has taken

it as a matter of course. To be able to get what you want in this line, to know that no matter what the occasion may demand in this respect, you can always get it at this establishment—that is a feature of the commercial efficiency of the community which makes it more attractive.

They have a special repair department in charge of experts and a specialty is made of watch, clock and jewelry repairing.

We wish to compliment them upon the high standard of efficiency they maintain in their establishment, the superior quality of the goods they handle and the admirable manner in which their establishment is operated.

Each member of the John J. List Store in Waukegan is at all times a booster for the city and all surrounding territory and they draw their large trade from the country for many miles around as well as from the city itself. Adv.

WISCONSIN'S OPPORTUNITY WITH ALFALFA

(Continued on Page Six)

acres of alfalfa to supply the requirements of three million head of cattle, besides hogs and sheep. Good progress is being made toward this goal. In 1924, Wisconsin farmers mowed 267,000 acres of alfalfa, the largest acre of this hay ever cut in the history of the state. In addition, an enormous acreage of new seedling was successfully established this same year.

Alfalfa Absent in Dairy Regions.

The shortage of alfalfa hay and clover is not peculiar to Wisconsin alone nor are the consequent feed bills. About 76 per cent. of the dairy cattle and 56 per cent. of all the nation's cattle are to be found in the states bordering and east of the Mississippi. This great live-stock region grows 95 per cent. of all the timothy and only 14 per cent. of the alfalfa. This section has become largely a land of timothy hay—the poorest feeding hay in the world for cattle.

In this area only about 9 per cent. of the hay acreage is high protein clover and 4 per cent. high protein alfalfa compared with 87 per cent. of low protein timothy and mixed hay. Largely in consequence of this "overproduction" of low protein hay, the six leading dairy states were reported in the Federal census of 1919 as having feed bills for that year as follows:

New York	83,000,000
Pennsylvania	52,000,000
Minnesota	23,000,000
Iowa	79,000,000
Illinois	64,000,000
Wisconsin	\$28,000,000

In the states bordering and east of the Mississippi River where over three-fourths of the dairy cattle are located, the acreage of protein-rich hays, like clover and alfalfa, is too small to supply live stock needs.

While in such states as Illinois and Iowa a portion of the feed bill is represented by intra-state shipments of corn for steer feeding, in most of the other states, the expenditures are largely for feeds rich in protein. Such feeds are high in price and will probably remain so until home-grown high protein feeds in a measure replace them. Low protein roughages favor high protein feed bills. An adjustment of the hay acreage is needed to solve the feed problem.

Inoculate for Vigorous Growth.

Where alfalfa has not been grown successfully before, either the seed or the soil should be inoculated. Inoculating cultures can be secured at very low cost through your county agent or experiment station and may be conveniently applied to the seed just before sowing.

Dirt may be collected from about the roots of the successful alfalfa or sweet clover plants bearing nodules. This soil should be dried slowly, powdered, and screened in a shady place. Then just before seeding moisten the alfalfa seed and apply this dirt to the seed, using about 12 or 15 pounds of the inoculated dirt for a bushel of the alfalfa seed.

When alfalfa is inoculated with the right kind of bacteria, it has in common with other legumes, the remarkable ability to use the nitrogen from the air as a fertilizer. This is accomplished through the action of the bacteria in the nodules which they form and where they take in and transform the nitrogen of the air into a growth producing fertilizer. This fact is the primary reason why legumes are so important and efficient in successful farming. Other farm crops like grains and grasses lack this ability and depend entirely upon the soil for their nitrogen supply. However, unless legumes are inoculated they are unable to secure nitrogen from the air and fail to grow.

Get the Nurse Crop Off Early.

Many a good stand of clover and sometimes alfalfa, is ruined by summer drought. Grasshoppers are serious in some years and may eat off all the available growth made the first season by new seedlings of alfalfa and clover. There is one way to play fairly safe on harm from grasshoppers and summer drought and that is to sow alfalfa with one bushel of early ripening grain, such as the Kherson (Wis. No. 7) oats or pedigree barley. Do not permit this grain to ripen but cut it for hay just as it heads out. To mature a good crop of oats or other grain requires from 600 to 900 tons of water which the plants will remove from each acre. Much of this soil moisture is utilized after the grain heads out and during maturity.

By cutting the grain for hay before the plants have begun to mature seed, an enormous quantity of soil moisture is saved and the crowding effect of the grain on the alfalfa seedling is removed. The alfalfa is then given an excellent opportunity to make a good growing start and a deep root growth to help it withstand

the hazards of summer drought as well as grasshopper injury.

Cutting the grain for hay is not always necessary but is generally essential where soil conditions are not entirely favorable for alfalfa and when grain lodges. Lodged grain of ten smother the seedling. When high priced alfalfa seed is used, cutting the nurse crop for hay is especially advised for with this plan you take little chance of failure if soil conditions are right or nearly so. Compare this method with that of sowing alfalfa with very late maturing oats or spring wheat, which take enormous quantities of moisture from the soil during the long ripening process and are usually cut for grain at the beginning of the hottest and driest weather. The crowding effect of late-maturing, rank-growing grains weakens alfalfa and other seedlings so that with the immediate coming of hot and prolonged dry weather, failure is apt to occur.

Eradicate Canada Thistles With Alfalfa.

The worst patches of Canada thistles, morning glories and almost all other weeds except quack grass may be eradicated with a thick stand of alfalfa. Alfalfa makes a much quicker start in the spring and also after cutting than do Canada thistles and many other plant pests, which is the main secret of its success as a weed eradicator. The soil must first be made very favorable for alfalfa by generous applications of lime and manure or fertilizers high in phosphates. It is best to plow the land in July or August, or at least as early in the fall as possible, so that the weeds may be subdued with frequent use of a spring tooth harrow or disk. This should be done especially in case quack grass is also prevalent throughout the field. The lime and manure or fertilizer should be applied in the fall on the plowed surface and worked in by cultivation for controlling the weeds.

NEWSPAPER ADVERTISING

(By J. W. Craig)

The success of newspaper advertising depends upon three things. First—good advertising copy and layout; second, the number of people it reaches; third, the number of times it reaches them. Therefore, consistency, good copy and circulation are the essentials of successful advertising.

The careful, consistent advertiser, who knows his goods and can impart this knowledge regularly to the readers of his advertising, does not know the meaning of failure. It is just as essential to advertise with regularity as it is to open the doors of your business institution.

A merchant should ask himself this question—"Why should people be interested enough in my store to come in and buy, if I have not enough interest in it myself, to advertise it?"

In every town, in every city, you will see several outstanding business houses. They are big and modern and enjoy the bulk of the town's business. How did they become big? Did they grow from a small shop to a large and modern store by keeping their business a secret, by hiding it under a bushel basket? Hardly. They did it by advertising. Their advertising built prestige, it built confidence, it created a desire to trade at that store. The more they advertised the more strongly were their customers sold on the idea that the store had what they wanted, that prices were fair and that the store stood back of every purchase. And

NORTH SHORE STUDIO

At last we have a first class studio located at 4 South Genesee Street in Waukegan. The manager was for 8 years head artist at the Melvin H. Fyke studios in Chicago. Phone 3740 for appointment.

"Absence makes the heart grow fonder," believes the optimistic lover. "Yes, of somebody else if you're not on the job," retorts the jilted cynic.

"You better take no chances and send a photograph to make things safe," is the advice of Mr. Klein whose photographic portraits daily call up the memories of dear ones gone from us for a while. Truly the one value of a portrait is a sentimental one, yet if you take the sentimental things out of life, there is not much left; the pleasures of loved ones and home and friends would be gone.

It is not strange either, that we are discriminating, very discriminating about these sentimental things of life—really much more than we are about the actual necessities of life. So it is with photographs and this photographer has had as his policy since he started business in this town to make photographs which would satisfy the most discriminating persons. He has succeeded.

This photographer is more than a photographer, he is an artist. That does not mean that he makes photographs which do not look like you. But it does mean that he makes photographs of you which show you at your best advantage. And you want your friends to have pictures to remember you by, which show you at your best.

This expert photographer has spent many years studying the principles of light, the technique of posing, of placing you so that just the right lines of your face and body will show up in the picture. He knows how to place the lights that the right effect of bright lights and shadows will be advantageously brought out. Photographers will tell you very little retouching is required if the picture is properly taken.

Another particular specialty at this studio is the photographing of children. Every Mother wishes that her child would remain a child forever. But it won't. The boy and girl will grow up. "The bird of time is on the wing." All too soon, they become men and women. But a fine photograph will preserve forever the memory of the children as they were. Have one taken today with the children posing as you like them best.

This community is to be congratulated on having such a really metropolitan studio here. The publishers of this edition know of no place where finer work is being done. It would be worth your while to have your picture taken if you have not already done so. Adv.

what is prestige and confidence worth to a merchant? It is worth the difference between success and failure. A merchant advertises to bring customers to his store. His newspaper advertising does this and no more. Once in the store it is then up to the management to inspire more confidence, to sell them merchandise he knows will be a credit to himself and his store. Salesmanship is as necessary as advertising, for advertising has done its part when the customer enters the store.

If you are not a subscriber to this paper, you should subscribe for it at once.

Waukegan, Ill.

A. L. BRUMUND CO.

Manufacturers of "Purity" Ice Cream

When buying ice cream buy "Purity" ice cream, manufactured at 125 L. Street in Waukegan. This is a very modern and sanitary institution in every respect. They are also dealers in pure milk and cream. Phone 74 Waukegan.

This well known producer of Ice Cream conducts one of the city's most substantial industries. Creating a product that is known near and far for its purity, this popular delicacy is served over the counters of retailers in a wide territory. The A. L. Brumund Company conduct a manufacturing and wholesale business that is deserving of the patronage of every member of the community.

Ice cream is no longer regarded in the light solely of a delicacy or a dessert. It is a food. During the World War ice cream was placed by the food administration in Class

Three as having an exceptionally high food value. It is said that one quart of ice cream is the nutritious equivalent of 5.2 pounds of potatoes, 2.8 pounds of eggs, 1.8 pounds of ham, or two quarts of lean beef. On this basis of comparison it is one of the cheapest food products on the market.

The cream used in the manufacture of this product is secured from the best herds and is of the highest test and purity. Every step in the manufacturing process is taken in the most sanitary way. By paying farmers the top price, this company is assured the choicest of cream. Only the purest of the flavors are also used, thus making the ice cream at once delicious and healthful.

The equipment of their factory is of the latest design, modern and up-to-date in every respect. The company specializes in cream for the

trade and does a large wholesale business in that field. It is, however, equipped for the prompt filling of special orders for parties, banquets, weddings and other social events.

The management of the business is in every way competent and capable to an unusual degree. Not only are the men at the head of it well schooled in the manufacturing end but they are also men of wide business experience and training. They are deserving of the support and co-operation of all the retailers in this section. "A Brick a Day" would be an appropriate slogan to be punctiliously followed. This Business Review congratulates this trade and citizens on the possession of such an enterprise as the A. L. Brumund Company and particularly on having within it men of such outstanding ability. Adv.

THE HEIN COMPANY

A Store For Women and Children

Mr. Davis, president of this popular store has installed the new two payment credit system here and it has met with much success. They are the first people in this line to adopt this very convenient way of paying in Waukegan. Call at their store at 105-7-9-11 North Genesee Street and see their stock. Phone 486.

This old and reliable department store is among the city's leading retail establishments and carries the most complete stock to be found in the city.

This is one of the firms of this section whose successful career in the commercial world has rendered them as a veritable landmark in the eyes of the public.

The ladies' ready-to-wear department displays a very attractive and complete stock which is selected from the foremost manufacturers of the

country in large consignments and placed before the public at prices which at once clearly denote real and true values. The buying public of this section has fully realized this important fact and annually look forward to their offerings in new and seasonable lines.

The patrons of this store do their shopping in its various departments with a feeling of satisfaction and the utmost confidence. They fully realize that the service and quality obtainable at this store today will be remembered in future seasons.

This popular house has selected its varied stocks with the sole idea of giving its customers the greatest possible values.

The buyers in the many departments are men of long experience in their lines and spend a portion of each season looking over the style centers of the country. Thus the

stocks at all times are kept thoroughly up-to-date and very complete.

This leading firm has won the enviable reputation of being the one place where the residents of both city and country can secure the highest class of merchandise of today. On your next shopping trip to the city include this store and you will find it much to your interest, both from the standpoints of economy and satisfaction.

The management is in the hands of competent and public spirited men, thoroughly familiar with all the complicated details of the business and we deem it proper that we commend this pioneer house of service upon the prominent position in the business world which it has attained as one of the most valued of the community's commercial assets. Adv.

FEEDING SPRING PIGS FOR MARKET

[By C. M. Vestal, Agricultural Experiment Station Purdue University]

1. Fattening on full feed of grain on pasture for early fall market.
2. Growing on limited feed of grain on pasture followed by full feeding for late fall or winter market.

The majority of spring pigs are marketed in the late fall and early winter, a period generally characterized on the hog market by heavy rains and low prices. On the other hand the small end of the crop is marketed in late summer and early fall at peak prices, taking one year with another.

Why does this condition prevail in marketing spring pigs?

How can the farmer take advantage of it?

There are two outstanding reasons why the condition exists. First the majority of farms are not adequately equipped for raising early spring pigs, and the large number of late pigs swells the late fall and winter market supplies. Second, inferior animals, poor feeding and mismanagement are contributing causes to delays in marketing many of the early pigs.

If the farmer is to take advantage of the situation he must be equipped to raise early farrowed pigs, must use good breeding stock and feed well. A slip in any one of these essentials will surely defeat his aim in obtaining the high market price.

It would be folly, however, to even suggest that every hog raiser attempt to put his spring pigs on the early market. There are factors other than those mentioned which must be considered in comparing the merits of early and late marketing of spring pigs. It is the purpose of this bulletin to consider some of these factors, and especially those relating to methods of feeding.

The general methods of feeding spring pigs for market in the corn belt states may be classed as follows:

1. Fattening on full feed of grain on pasture for early fall market.
2. Growing on limited feed of grain on pasture followed by full feeding for late fall or winter market.

Some advantages of the first method:

- (a) Market price of hogs is usually higher.
- (b) The spring pigs are out of the way before fall litters come.

Some advantages of the second

method:

- (a) Maximum utilization of forage crops.
- (b) Hogs may be used to harvest corn or follow cattle.

These, and perhaps other advantages are self evident but more information relating to gains, feed requirements, costs, and use of forage crops is needed to give a fair basis for comparing the merits of the two methods.

A series of feeding trials is in progress at this station to secure some information on these questions.

The results of seven trials which have been completed in the series are reported in this bulletin. Three of these trials were on clover, three on alfalfa and one on rape pasture. They were conducted in 1920, 1921, 1922, and 1923. The trials on clover and alfalfa were begun after the removal of a hay crop from the pasture lots. The grain rations used were as follows:

For the full feeding method—Shelled corn and 60 per cent. protein tankage self fed free choice.

For the limited grain method—Shelled corn 95 parts and tankage 5 parts by weight mixed and hand fed twice daily in limited quantity while on pasture, and shelled corn and tankage self fed free choice during the finishing period in dry lot.

March and April pigs which averaged 74, 62, 68 and 76 pounds were used in the various trials. They were fed to market weight of 219, 208, 220, and 221 pounds. The most of these pigs were raised on the Experimental Swine Farm. They were sired by Duroc Jersey boars and were out of Duroc Jersey and Poland China sows. During the suckling period they were self fed a mixed ration of 800 pounds corn, 20 pounds wheat shorts and 10 pounds tankage, and had access to blue grass and timothy pasture. From weaning time until the pigs were started in the experiment shelled corn, wheat shorts, tankage and a mineral mixture composed of 10 pounds wood ashes, 10 pounds 16 per cent. acid phosphate and 1 pound common salt, were fed free choice in self feeders. In most instances good clover or alfalfa pasture was used during this period. All of the pigs were weaned at eight weeks of age and were in good thrifty condition when put into the experimental lots.

Feed Hens Liberally

In a laying pullet feed will pass through the crop, stomach, gizzard, and five feet of intestines in less than four hours. This fact shows the necessity of feeding liberally late in the evening and early in the morning throughout the winter to shorten the night as much as possible and increase production.

LACKNER'S CAFE

Strictly 100 Per Cent. American Restaurant

Lackner's Cafe, located at 215 Washington Street in Waukegan, is a truly American restaurant which serves American food at reasonable prices. Phone 315.

This restaurant is recognized as a social center for motorists and the traveling public in general. It is also known as headquarters for "good eats."

Mr. Lackner, the manager of this establishment is a crank while visiting the markets and will not buy nor accept anything inferior in the line of food-stuffs. This coupled with the fact that they employ a chef of more than ordinary ability insures the choicest foods properly cooked.

The culinary department has been provided with the most modern equipment and utensils and everything is kept scrupulously clean, thoroughly in compliance with the sanitary laws.

And last but not least the attention and courtesy of the attendants is a feature that receives more than

passing notice from the patrons. From their extensive display of foods one may indulge in his or her own most favorite delicacies and dishes, getting as large or small portion as you wish.

At Lackner's Cafe in Waukegan can be seen patrons from every walk of life who make this popular restaurant their downtown eating place.

Their spacious quarters are elegantly appointed, with ventilation in compliance with the laws of health and lighted with a brilliancy that brightens every corner. The surroundings are comfortable, convenient and very pleasing.

In this entire section there is not another establishment that surpasses this well known eating place in service and satisfaction.

They are particularly well equipped for proper handling of foods and also for their display to the best advantage of their patrons.

With that business men and foresight which has won such wide popularity and patronage for the

READ THIS PAPER AND GET THE LATEST NEWS**FRANKLYN R. MULLER, INC.**

Stucco and Supplies

With offices and plant at 5 Madison Street in Waukegan this company is prepared to furnish anything in the way of asbestos stucco and flooring. If you are going to build or remodel, do not fail to investigate. Phone 10.

The Franklyn R. Muller, Inc., is rated as the best equipped plant of its kind in this country, and their famous asbestos stucco and flooring has met with universal approval and will be found on all up-to-date buildings.

This in part accounts for their successful business career. The rapidly increasing demand for asbestos stucco and flooring throughout the country is being met here easily on account of their plant being well equipped with the most approved appliances for this particular production. Their years of experience coupled with the practical knowledge of manufacturing, has won for them the recognition of the

entire country.

It is our most flourishing industry and is fully worthy of more than passing notice at our hands, for not only is it the leading concern engaged in its own particular field, but its product has gained a wide reputation for general excellence and is considered a standard product among the trade the nation over.

In appreciation of the inestimable value of the location of this establishment here the people are loyal in their support of this institution which attracts thousands of dollars annually to this community.

The real sincerity, high quality of materials, together with manufacturing efficiency and rare business acumen distinguishes this concern and it is rarely if ever equalled elsewhere in any line.

The Franklyn R. Muller, Inc., gives employment to our people, always has at heart the best interests of the community and continually

exert their influence for the best interests of their home town.

This industry has become so much a part of the every day life of the people of this community that some have come to think of it as a matter of course. It might be well to pause and take into consideration what this manufacturing establishment really means to the city where it is located. Its removal from the local field would be disastrous, but its maintenance means the uninterrupted continuance of the encouragement of all in the community, and the onward march of industrial, commercial and social development.

In this Business Review we are pleased to compliment the management of this concern for the efficient conduct of the business and meeting the needs of the problems of the hour in a most thorough manner. We predict for this modern establishment continued prosperity and a great future. Adv.

SPRING WHEAT PRODUCTION IN ILLINOIS

[Continued from page one]

thereafter as possible, yielded more grain than did the later seedings and the grain was usually of better quality.

Spring wheat may be advantageously used as a substitute for winter wheat when weather conditions in the fall have prevented sowing the latter. Usually it is grown as a substitute for oats and follows corn. Old corn stalks are infested with the fungus which causes wheat scab. It is advisable, therefore, either to choose another place to sow spring wheat or to carefully plow under the stalks.

The seed bed may be prepared by thoroughly disking and harrowing the ground if spring wheat is sown on land which the previous year was in some clean cultivated crop such as corn or soy beans. A better method, however, is to first plow the land and then pulverize and compact the soil with a disk and harrow. The grain may be sown either with a disk drill or an end-gate seeder. The disk drill is preferable.

While spring wheat is a cool weather plant, grown chiefly in the northern third of the state, it may also be grown with a fair degree of success on the fertile, well-drained soils of the central section extending south to an irregular and indefinite line drawn between Edgar and Pike counties.

Business Is Safe

When you shake hands with your competitor and mean it—when you can work hard in your business and love it—then business is safe.

When you advertise service and give it—when you can build a reputation and keep it—then business is safe.

When you can sense competition and not knock it—when you can fight competition and still boast it—then business is safe.

When you can meet opportunity and know it—and aim for what is right and then pray for it—then business is safe.—Wisconsin Press "Howler."

Bovine tuberculosis is especially dangerous for babies. Hence all cattle supplying milk or milk products to the public should be free from tuberculosis.

R. C. SHERMAN

General Insurance

With offices in the Waukegan National Bank Building in Waukegan, Mr. Sherman is prepared to take care of your insurance needs. If not convenient to call on him personally, call 994, and he will see that you are taken care of at once.

Among the most prominent Insurance Underwriters in this section is this well-known agency. To them a large element of the people in this community look for insurance service. Representing as they do some of the largest companies in business they are equipped to serve every need in their line. During their service to the public they have created an enviable record for honesty and efficiency and have built up a clientele of huge proportions as well as establishing a reputation as one of the most reliable and prominent members of their profession.

That they have succeeded in this to an extraordinary degree is evidenced by the fact that when one

thinks or speaks of insurance he unconsciously thinks of this agency. The two are indissolubly connected in the minds of the people of this city and vicinity. Not only does this firm perform the more material offices, connected with the writing of insurance, but they are at all times ready and glad to give friendly and even disinterested advice based on their wide experience in the field.

This agency places all kinds of insurance, including fire, health, accident, compensation, plate glass, storm, hail, explosion, steam boiler, liability and auto insurance and surety bonds. Every kind of insurance, that is usually found in an up-to-date agency is found here. The hundreds of patrons who make this their insurance home have found courtesy, accommodation and efficiency the guiding principles. All are enthusiastic in their admiration of the lofty principles that direct every transaction of R. C. Sherman.

In years long gone the business of the insurance salesman was to convince people of their necessity for insurance and to persuade them to secure that protection. Today the work is not so much educational as it is advisory. The salesman or agent from his knowledge and experience is expected to assist his clients in selecting the kind of insurance best suited to their needs—the necessity for such protection is now generally recognized. No one of whom we have any knowledge is better qualified to perform this important function than is the subject of this review. We, therefore, feel an unusual sense of satisfaction in directing your attention to them and recommending them to all.

Finally, in closing this review, we feel impelled to congratulate the community upon having a firm so capable as R. C. Sherman. Adv.

SINGER SEWING MACHINE CO.

Let A Singer Sew For You

This modern sewing machine company is located at 133 North Genesee Street in Waukegan. There you will find a complete line of Singer Sewing Machines. Phone 412 Waukegan.

The veil of gloom that has spread itself out before the young women of a few years ago is lifting. The dread of all things connected with household drudgery is rapidly being dispelled by the advancements of modern science. The day of doing all the family sewing by hand is gone. No longer need the wife sit up early and late making new clothes and repairing the old ones by the hand method of sewing. Today the modern machine stands out as one of the leading "wife saving" devices of this advanced age. From the old fashioned shuttle used by our grandmothers to the most recent high powered electric machines that are used by the thousands in factories the world over, science has recently been to work on this device.

Well can we remember the day that our grandmother used to take us by the hand and show us among her treasures, the first pair of trousers or the first dress that she made for our parents. We shudder to think of the many hours she must have put in on these garments. Hour upon hour—dead tired though she was—she sewed for all of her family. In a few minutes, today, the modern housewife can accomplish on a Singer sewing machine, the work that used to take hours and sometimes days. Can you imagine tying your wife or your mother at home for all day and late into the night doing the weekly sewing.

Much as we praise and admire the hand stitched articles which our friends spread out before us, we cannot help but wonder if after all—"Do they pay in the time that has been spent on them?" The care that must be exercised to make the garments neat in appearance, the regu-

larity with which each stitch must be made, the nervous strain that all of this entails, all of this is done by a famous Singer sewing machine with a very minimum of strain to the worker. One demonstration by the efficient workers of this company will convince the most exacting housewives that here is a machine that will many times over pay for itself in a short time.

A few years ago it would take an expert to do all the various kinds of sewing that these sewing machines handled by our local company will do in the hands of inexperienced as well as those who know how. Anyone can now be an expert seamstress.

This leading business recognizes not only the need of the home but those of the community as well. They stand forth on their reputation as successful home helpers as well as forward looking community builders. Our city could not want a better combination of qualities. Adv.

WARNER ELECTRIC COMPANY

Radio Sets and Electric Fixtures

Under the able management of H. F. Fosberg this firm has the exclusive agency for Apax cleaners, Meadow washers and grapevine mangles. With store at 133 North Genesee Street in Waukegan. They also do all kinds of house, factory and motor wiring. They also handle radio sets and parts and electrical fixtures. Estimates free. Phone 423.

The modern electric shop is daily becoming a more important factor in the commercial and social life of the community and this particular establishment is fully up to the expectations of the most exacting patrons. The management is thoroughly experienced in the electrical business and has gained a comprehensive knowledge in its various branches which is of inestimable value to the patrons. Here you will find all the latest electrical fixtures and appliances so necessary in the modern

American home.

Through their experiences they are qualified to assist you in selecting the proper lighting equipment for your particular home needs and as they carry most of these articles in stock they can serve you more economically as well as satisfactorily.

The Warner Electric Co. in Waukegan can supply you with every requirement for the lighting and distributing other electrical conveniences throughout your home. Remember the well lighted home of today gains distinction and strongly reflects the owners discrimination and taste.

In the construction of a home today the services of the electrician are as necessary as the plumber or painter.

In accordance with present day demands they are prepared to install your electrical fixtures with that built in effect so much desired in the better class of homes. They know

how to unite both utility and decorative schemes so as to blend harmoniously with the particular specifications of your home.

When ready to build or make alterations you will consult your best interests by turning your electrical problems over to these capable electricians. They are well equipped and can supply your needs in fixtures from their stock at a very reasonable cost. At anytime you are welcome to visit the store and look over their various lighting devices and fixtures.

In this business review of our social and commercial advancement we wish to call the attention of our many readers to the Warner Electric Co. in Waukegan and request them to consult these men upon the various phases of the line this firm embraces. Estimates cheerfully given. Just phone them. Adv.

GLOBE DEPARTMENT STORE

Everything For the Family

At 33 North Genesee Street in Waukegan is the modern home of this progressive department store. Here you will find a complete line of dry goods, ladies' ready-to-wear and gent's furnishings. Phone 5000.

Prominent among the leading business houses that have aided in the development of this section through its manner of providing the public a metropolitan service, this popular and dependable store continues to serve that class of people who seek to buy the better qualities of goods at the most reasonable prices. As one of the leading department stores in this part of the state you will find here most complete stocks, consisting of quality goods of standard reputation, which affords the people of this and the adjoining counties a real shopping center. While this store is located far from the metropolitan style centers of the

country, the modern establishment keeps fully abreast of the times and its various departments will be found complete with the popular models of the day.

Here you will notice that as soon as the leading authorities on fashions approve of a style or shade it is at once seen displayed in this store in wide variety of materials for the choice of the discriminating patrons of this section of the country.

They have always specialized in catering to the wants of all classes of people. While here can always be found the more exclusive lines approved by the higher masters of fashions, you have equal showing of the more conservative models that have met with popular approval.

Price, quality and service were the foundations upon which this store was founded and while the latest edicts of fashion in feminine attire

are found here earliest, the prices are always reasonable.

Your dollar always has more units of buying power at this store, quality and service considered and when an error occurs it is cheerfully corrected. In each and every department of this store you are accorded the same accommodating service, the same modern and up-to-date styles, and the same moderate prices. Through their superior service many of the unpleasant details attendant on a shopping trip are here eliminated.

In this Business Review of our commercial progress, we are pleased to compliment the management upon their advanced ideas and the high quality of the products they have seen fit to represent and we predict that in the future their business will continue to prosper and expand in this territory. Adv.

Advise Shippers to Candle Market Eggs

ESPECIALLY URGENT DURING SPRING AND SUMMER.

(Prepared by the United States Department of Agriculture)

Candle all eggs before shipment, and especially during the warm spring and summer months when spoilage is most likely to occur, is the advice given to egg shippers by the Bureau of Chemistry, United States Department of Agriculture, which is charged with the enforcement of the federal food and drugs act. "The loss resulting from spoilage of eggs shipped to distant markets may be greatly reduced by this precaution," say the officials. Candles as near as possible to the source of production will not only save transportation charges but will prevent waste of a valuable food product.

Federal inspectors have been instructed to be on the watch for interstate shipments of adulterated eggs. Under the food and drugs act eggs which have yolks stuck to the shell, moldy eggs, black spots, mixed rots, addled eggs, and any other eggs that are filthy, decomposed or putrid are adulterated. When such shipments are found they may be seized and the individuals responsible for shipments prosecuted under the law.

Many eggs that are suitable for immediate consumption will not stand shipment to distant markets. By candling, these eggs may be taken out and sold for local consumption, leaving only those that have a good chance to reach the market in edible condition.

A bulletin on candling eggs tells just how to distinguish between a good egg and one that is likely to spoil in transit. Write to the Bureau of Chemistry, United States Department of Agriculture, Washington, D. C., for a copy.

DID YOU EVER THINK IT OVER?

When someone stops advertising.
Someone stops buying.
When someone stops buying.
Someone stops selling.
When someone stops selling.
Someone stops making.
When someone stops making.
Someone stops earning.
When everybody stops earning.
Everybody stops buying.
Then the bread line.

WILLIAM SCHUMAKER

Builder of Better Homes

A modern and up-to-the-minute home builder, located at 209 Washington Park in Waukegan. When interested in building, consult this well known home builder. Phone Waukegan 2452.

There is no one other firm in this part of the country that is doing a greater and grander work than William Schumaker in Waukegan engaged in the work of building homes for the people. There is no satisfaction greater than the satisfaction of gradually making yourself independent. The first step to real independence is to own your own home. Once you own your own home, the roof above your head, the piece of ground beneath your feet and know you can pay for it, you may call yourself a thoroughly independent American citizen, and not before.

Every year the owning of a home has been made easier. Ownership of your home—a place that once paid for no man

can take from you, has a beneficial effect upon the mind of the father and mother, an effect greater, more important on the minds of the children that live in that home. Pity the child that is forever asking "where are we going to move to this time?"

In the entire bible there is no statement more pathetic than this: "Foxes have holes and birds of the air have nests, but the son of man hath nowhere to lay his head."

From the moral point of view and from the practical common sense point of view, for the sake of the mother, and above all, for the sake of the children, every red blooded man should strive to acquire and own a fitting home for his family. The money that you will pay in rent for quarters fit to live in will gradually pay for a home better and more satisfactory than the hired quarters you left behind. This has been proven a million times.

All mankind is alike at heart: "In

the evening when the sun goes down there's no place like home." Home ownership and independence are two words that are linked inseparably to the man whose roof is his own belongs the right to organize his personal and family life as he will.

There is a distinctive joy in owning your own home that few others possess. "Home" is a thought that grips the heart-strings of men, women and children. And besides, making your home in a house which is yours or gradually becoming yours, will be found the most economical, most satisfactory method of living.

Money spent for rent is gone forever—the money you put in a home is not spent—it is wisely invested. Think over this solemn duty, consult this firm and get busy. Mr. William Schumaker in Waukegan will assist you in every way as to building materials, plans or any phase you do not understand. Adv.

TRY AN AD IN THIS PAPER

THE BAIRSTOW MONUMENT CO.

Monuments and Memorials

You will find the office of this firm at 604 Hickory Street in Waukegan. Mr. Bairstow is a veteran at the monument business, having been at it for 50 years. The most of his experience having been at Rose Hill cemetery. Many are the fine monuments there that stand as a tribute to his work. At present he has under construction 3 large monuments, one of which goes to Grace-land cemetery in Chicago to mark the resting place of the late Edward P. DeWolf, formerly mayor of Waukegan. Another of which goes to Oakwood cemetery in Waukegan for the family of Edward C. Spacheldor. Phone 779.

The Bairstow Monument Co. also erected a beautiful family memorial costing \$2,000 at Ambry, Ill., which is a fine example of their high class work.

The subject of marble and granite memorials and markers is here exemplified in a most graceful and pleasing manner and before making your final selection it is to your interests to consult the management of this reputable firm. They are prac-

tical men in their line and through their years of experience have gained a knowledge which will be invaluable to you as to what is best fitted in their line to your particular need. This is one of the largest and most modern establishments of its kind in this section and since they first opened their doors for business have borne the reputation as the best place to purchase monuments and markers of all descriptions.

By their special equipment for carving and lettering they can produce work of unusual artistic merit not heretofore attained at such a minimum price.

It is the solemn duty of all at some time in life to secure the most appropriate means of marking that sacred spot where the loved ones lie in eternal sleep and what could be more permanent and lasting than these marble and granite stones which by their very silence inspire with respect all who view them. They are true sentinels which throw a protection of reverence about every grave.

Centuries of reverence for our

dead have stamped with their approval the enduring marble and granite memorials and to depart from this aged form of honoring of those who have "passed on" would be akin to acknowledging a waning interest in the sentiment which prompts our love and reverence.

These silent sentinels of stone have from time immemorial been used to mark the last resting places of the dead, and the carved stones in use today form the manifestation of this era's desire to continue the traditional custom.

Here they maintain their own drafting department which insures patrons the latest designs.

When ready to purchase a memorial or marker get in touch with this old and reliable firm. The manager will be pleased to figure with you on your needs at any time.

In this annual Business Review of our onward progress we wish to direct the attention of our many readers to the fact that at The Bairstow Monument Co. in Waukegan they will get what they want when they want it and at the right price. Adv.

Bossy Needs Care To Produce Milk

"The care and management of the family cow plays a greater part in the ability of the cow to produce a maximum flow of milk than is generally supposed," says A. C. Kimrey, extension dairy specialist for the North Carolina State College of Agriculture and Engineers. "For highest milk production the cow must be comfortable. One of the important things toward making her comfortable is a clean, dry place in which to stay. The stall should be cleaned and bedded each day, or new bedding put in, if not possible to completely renew the old. The cow will thus be kept clean and the stall dry and fresh at all times."

Mr. Kimrey recommends that the stall be so constructed as to allow for plenty of fresh air and sunlight. A damp, dark stall is a good breeding place for disease germs which not only injure the cow but will probably be injurious to the people who drink the milk. A properly built stall should be boarded up tight for four feet above the floor so as to protect the cow's body from drafts, especially when she is lying down. Above this wall there should be plenty of windows to allow for a free passage of air and light. The cost of building such a stall will be more than paid for in the increased milk production.

During the period before freshening, the cow should be fed so that she will be in good flesh at freshening. Then she will come with a high milk flow, states Mr. Kimrey. With proper care and management she will maintain this production through a longer period of time than under haphazard conditions.

GERMINATION OF EARLY HARVEST. ED SEED CORN

In 1921 seed corn was harvested at five stages as follows: blister stage, early milk stage, full milk stage, early dough stage, and late dough stage. This seed was stored in a warm dry room and germination tests were made during the winter.

Seed harvested in the blister stage yielded few live sprouts and all were very weak. The germination of seed harvested in the early milk stage was 58 per cent, and nearly half of the kernels that germinated produced very weak sprouts. Beginning with the full milk stage, far better results

were obtained. This harvest was between three and four weeks after the exposure of the silks just a little before the corn was ready for roasting ears. The percentage of germination was above 95. The sprouts were somewhat slower than those from mature kernels but fairly satisfactory growth was obtained from similar seed planted in 1925.

Except for noticeably more vigorous sprouts, grain harvested in the early dough and late dough stages gave results on the germination practically identical with that harvested in the full milk stage. The early dough stage corresponds to prime roasting ear stage. In the late dough stage kernels are beginning to dent. Seed harvested in either of these two stages produced wholly satisfactory results both on the germination and in field plantings.

Selecting seed corn at these early periods is of course not to be recommended as a general practice, but in case of emergency the corn grower need not hesitate to gather corn for seed as early as the roasting ear stage. It must be emphasized, however, that disappointment will very probably follow such a procedure unless favorable storage conditions are provided.

Grub in Head of Sheep Controlled by Pine Tar

The grub in the head of sheep is a larvae of a fly which lays its eggs in the nostrils of the sheep during the summer time. A little pine tar put on the nose of each sheep, that is, a little smeared on each side of the nose, next summer when the hot weather comes, will drive the fly away and help protect the sheep.

It is also a very good practice to plow a fresh furrow in the fields during hot days of June and July, when the flies are bothering. If you do so, the sheep will place their noses against the fresh soil and close the opening so that the flies will not be able to reach them. It is interesting to see how quickly sheep will arrange themselves along a furrow of this kind as soon as the fly appears.

This creature that you have found is not the true "gid," but the false gid. The true gid is the embryo of tapeworm.

The matter of getting rid of the grub in the heads of sheep would be a situation to be dealt with by a veterinarian.

There is seldom distressful overproduction of farm crops when good dairy cows are depended upon as the market, and they always pay a good price.

UP-STATE MOTORS, INC.

Chrysler Sales and Service

A car for every one's purse at 415 South Genesee Street in Waukegan. The model numbers being known as Chrysler 50, 60, 70 and 80. It is one of the fastest and most serviceable cars on the market today. Come in and see them, or call Waukegan 4400 for real information.

This is an automobile establishment that has become one of the foremost in its line in this section, not only because of its reliable and progressive business policies and experience in the automobile field, but because they represent the wonderful new line of Chrysler automobiles. Throughout this section the Up-State Motors, Inc., of Waukegan, is known as a "Motorists haven for skill and honest service."

The nationally famous Chrysler Six, in which the details of construction show more advanced ideas in design than were to be found in the first descriptions of the car are now on display.

This famous six has cylinders of

the L-head type, which are cast in one block with the crank case. Casting is designed so as to absolutely prevent any possibility of water passage becoming obstructed. The gasoline is distributed to the cylinders so well and so regularly, so completely is power utilized through the elimination of weight, reduction of friction and perfect balance of all the reciprocating mechanism, that this wonderful power plant is enabled to develop 68 horse power.

Automotive experts state that it is absolutely free from vibration. The combined result has made possible its maximum speed of 70 miles per hour from the small motor, with slightly more than twenty miles per gallon of gasoline, given throughout the most grueling tests.

The Chrysler is made in four sizes—The Model 50, a 4-cylinder car with 3-bearing crankshaft. The Models 60, 70 and 80 six-cylinder cars with 7-bearing crankshafts.

"hour" is not only their motto, but each car will more than stand that test.

This amazing result has been achieved only through the new application of recognized scientific research in design of construction. The Chrysler has a seven-bearing crankshaft without any shims at bearings. It is actually larger than the crankshaft of many cars with a gross weight twice that of this car. The extra size of the shaft, together with its seven-bearing support, eliminates crankshaft vibration. Mr. Chrysler states that no automobile engine of today delivers such a large percentage of generated power to the actual propelling of the vehicle as does this celebrated six.

The management at the Up-State Motors, Inc., at Waukegan is thoroughly conversant with auto values and the many details of sales and service. See them. Adv.

Copyright 1927. D. H. Malsan

A. G. TAYLOR

Groceries and Meats

Mr. Taylor is a veteran in this business, having been in business for 23 years. Besides having stores at the corner of Franklin and Ash Streets and at 402 South Utica Street, he has also been a member of the Taylor and Guthrie firm, whose store has been at 1210 West Washington St. in Waukegan for 12 years. He and Mr. Guthrie are also interested in the Peterson and Co. Store in Lake Villa which handles a complete line of groceries and meats. Phones: Franklin and Ash Street store, 140; 141 South Utica Street store, 776; West Washington Street store, 500-604, and Lake Villa store, 12.

This well known market is the one shop in this district, where the housewife knows she can secure the best in foods and at a reasonable price. The store is modern and up-to-date in every particular, clean and sanitary throughout, the business is conducted along progressive lines and we are proud to say that it is a credit to the commercial life of this section.

Here is your local market with the interest of your home and country at heart. Fair and straightforward in their business dealings, it is not strange they have reached such a success.

To be able and make certain of getting the best of fresh meats, groceries and allied products is a great boon to any city. At this market you will find the sales people have the ability of giving you exactly what you wish, and a large or small order receives the same courteous treatment. The management of this market sees that quality is high and that you receive always the choicest of everything.

The way this progressive market prepares its meats makes them not only health protecting, but health giving. That this up-to-date market has met with the universal approval of the public, is evidenced by the large number of people who trade at this efficient establishment.

This is the place where the highest quality prevails at the lowest possible cost. All that is needed is a trial to convince the most exacting.

The public is thus assured of a market of the very highest grade right here at home and thus it merits the consideration and liberal support of both farmers and town folks.

The manager, Mr. Taylor, will be found to be courteous and accommodating at all times, and has been closely allied with the large business interests of this section for some time.

He has been instrumental in seeing that the farmers always receive the top market price for produce. And in conclusion we wish to state that his market is to be commended for the high character of work being executed by them and the special efforts they have made to give the people of this section a service unexcelled.

Come in today and get acquainted. Adv.

GRAND AVENUE LUMBER AND SUPPLY CO.

Lumber and Building Material

Under the able management of R. P. Pinsky, president, and Glen C. Richardson, secretary, this firm has offices and yards located at 1213 Grand Ave. in Waukegan. Give them a trial. Phone 16.

With a vision of greater city and community always in mind this popular firm which operates one of the best lumber establishments in this section of the state has become an important factor in the development of this county. While it has ever been their object to obtain a fair and honest profit from their extensive dealings in lumber and building materials, the guiding influence of this company has always been the determination to furnish the highest grade of goods at prices so reasonable that the extension and beautification of the city and county could progress rapidly and in great leaps and

bounds. Lumber, lathe, hardwood floors, doors, windows, and all other demands of the builder are furnished by this progressive firm. By purchasing to advantage when the market is right and employing only the most experienced help they are able to offer this high grade of goods at prices so reasonable as to encourage the beautification and extension of homes and enterprises.

Their building service is free and always at your disposal and if you have any plans in mind the service department of the company will gladly go over them with you. They have scores and scores of plans and their ideas are endless and they have the knack that comes only from special talent for one's work and long experience of putting the right thing in the right place. You are as close to

them as your telephone. They will submit plans and figures for you in your own home or write them or when in town stop at their office and they will cheerfully provide you with estimates as well as plans, without any obligations.

But their service does not end there. They keep you in touch with highly competent contractors who do a tremendous contracting business. If you will consult with them—talk over your plans, you will find it much to your advantage for they will not only be able to figure to save you money, but to include modern conveniences.

In making this review of our on-ward progress we desire to compliment this institution as one that has kept in touch with the spirit of the times and refer it to all of our readers. Adv.

This firm of stone contractors are capable of supplying any of your needs in the stone line. They handle a complete line of cut stone, both plain and ornamental. Also a line of Indiana limestone. Call at 19 East Madison Street in Waukegan and see them, or phone 1615.

It is the general purpose of this review to give the local people and those of surrounding country, an idea of the progress and general excellence of the various products of local plants. We deem it very appropriate to bring your attention to Priestly and Don in Waukegan.

By using their products a better building is produced. A building in which to live or work, if properly built and of proper materials, will not only last longer, but will function much better. A comfortable building is warm in winter and cool

PRIESTLY AND DON

Dealers In Cut Stone

in summer. It will not deteriorate, nor will it burn down. A modern building that stays modern and an attractive one and of distinctive beauty.

Conservation in our national resources has been sounded by the newspapers and legislative halls. The public has risen together and demanded legislation along these lines.

It is not every community that has the advantage of location such as this progressive concern whose activity is exclusively in these interests.

By their large production they will be in position to furnish large quantities of building stone for the coming year.

The advantages of building with stone is self evident as it reduces the insurance, lasts forever and the first cost is the last cost. It requires

no painting or upkeep and in the long run is the cheapest.

Industrial progress particularly in this section has been benefited by them. There is nothing more important than the continued development of the building industry and the fact that Priestly and Don in Waukegan is in a position to furnish the best grades of CUT BUILDING STONE and locally aids in maintaining the volume of building and expansion in the city and surrounding country.

The management has had much practical experience in this industry and is counted among those who are identified with our manufacturing and commercial progress. They deserve your liberal support and merit the reputation they have attained as being one of our leading industries. Adv.

Control of Bee Disease Is Seen

AMERICAN FOUL-BROOD CAN BE CONTROLLED BY WATER-FORMALIN SOLUTION.

(Prepared by the United States Department of Agriculture)

Widespread interest has been aroused throughout the beekeeping industry by the apparent success of some recently discovered disinfectant methods in the treatment and control of American foul-brood. Disinfectants such as an alcohol-formalin solution are being used with fair success, and eliminate to a great extent the large losses previously caused by the necessary destruction of all combs infected with this disease of the brood of bees.

The use of the alcohol-formalin solution as a disinfectant is a step in advance in the control of the disease, says the United States Department of Agriculture, but apparently there is still room for improvement which will eliminate the danger of occasional cases of failure. For that reason, and because of the great interest in the subject, the bee culture laboratory started preliminary work early in 1924 for the purpose of making an exhaustive study of the efficiency of various disinfectants, including the commercial alcohol-formalin solution as well as water-formalin solutions.

Results of Tests.

A discussion of the results of the tests completed to date has been published in Department Circular 284, which is now ready for distribution. It was hoped that the results of the investigation by laboratory methods would form a basis for practical work in the apiary. As the work has developed, numerous difficulties have been encountered which indicate that the problem of the perfect sterilization of American foul-brood combs is neither simple nor yet fully solved.

The results obtained with various dilutions of alcohol and of a alcohol-formalin solution as the carrier for 20 per cent. of their volume of formalin are not sufficiently complete to warrant conclusions as to their relative efficiency. All of these solutions are unsatisfactory, in that they do not completely sterilize all sealed cells in 48 hours. A 20 per cent. solution of formalin in water, without alcohol, is slightly less efficient than the alcoholic solutions in sterilizing

in 48 hours the contents of sealed cells, because of its failure to penetrate many of the cappings; but it sterilizes all open cells in that period.

Satisfactory Results.

In view of the culture results obtained, however, a 20 per cent. solution of formalin in water was found to be the most satisfactory disinfectant for sterilizing infected combs, with regard both to germicidal action and low cost, provided the proper precautions are taken. All honey should be extracted, all brood cappings should be completely removed, and the combs should be treated at least twenty-four hours, or forty-eight hours if it is found desirable to wash them in water after treatment.

Care must be taken not only with the process of disinfecting combs infected with American foul-brood, no matter what solution or method is used, but equal or greater care must be exercised in the treatment of the diseased colonies themselves to eliminate the danger of recurrence of disease from that source. The successful sterilization of the combs will otherwise be of little avail.

A copy of the circular may be secured, as long as the supply lasts by writing to the United States Department of Agriculture, Washington, D. C.

Bovine Tuberculosis Is Fast Being Eradicated

Bovine tuberculosis is now being eradicated from the herds in the United States. In some states the infection of bovine tuberculosis is found in 16 per cent. of all the cattle. This is the case in the state of New York. Most of the Southern states have less than 1 per cent. and some have less than one-half of 1 per cent. It will require many millions of dollars, however, to eradicate the disease. Some four million dollars are being spent annually and the work has just started. In New York state thousands of infected cattle are shipped and slaughtered where many of them are condemned and tanked. The South is exceedingly fortunate, because this disease has been kept out of the various Southern states by live stock sanitary laws. Also many states have been testing most of the milk cows and pure-bred cattle and destroying all of the reactors.

Read this paper and get the latest news.

The question is often asked, "Which is the best breed to raise?" All are good breeds and are capable of giving good money returns if the owner will take the proper interest in them.

S & D Transfer Company

Local and Long Distance Hauling

Best equipped transfer and moving service in Waukegan. Furniture and piano moving a specialty at 219 Clayton Street in Waukegan. Call 2613 Waukegan, for local service.

One of the greatest conveniences of the modern life is the efficient and careful transfer company. It has been demonstrated that the truck in the best way for handling the moving problems and this firm is one that specializes in giving the best service to the many patrons it serves in this capacity.

Realizing the necessity of this type of service and knowing that the public was entitled to the best there was to be had, large motor trucks have been provided. These trucks are modern in all respects and of large capacity. By the proper packing of your furniture they are able to haul very large loads and also able to pack in such a manner that you will not need to fear of having any of your furniture marred or damaged.

The modern moving service has proven a great convenience to the householder of today. No longer need he worry about hiring carpenters to build crates, then hunt a

drayman to haul the goods to the depot. Now all that is needed is to call the transfer firm and they will look after all the details and will deliver your goods in a city one hundred miles distant in twenty-four hours. This firm makes a specialty of long distance moving and the handling of pianos and other heavy articles. You can rest assured that when you turn your moving problems over to this firm everything will be looked after just as carefully as if you were doing it yourself. You need have no hesitancy in turning your moving over to this firm in its entirety.

The men employed by this firm are experts in this line and careful in the handling of your furniture, they know how to pack to save every inch of space and they know how to drive to avoid damage to your goods in transit.

This paper takes great pleasure in directing your attention to this modern moving service and believe them absolutely reliable. The manager, Mrs. Stevenson, is an efficient business woman ready to promote anything for public improvement. Adv.

CORN AND HOG RATIO IN OHIO

(J. I. Falcóner)

There is usually a more or less close relation between the prices of corn and hogs. The average ratio for Ohio for the last 15 years has been 1:11.5, which is to say, that hogs have sold by the hundred at a price equal to the price of 11.5 bushels of corn. The prices used are the farm prices of Ohio corn and of Ohio hogs as given by the United States Crop Reporting Service. During this period the ratio varied from 6.7 in October, 1919, to 20.0 in March and April, 1926. In 1910 the ratio was wide, indicating profit in pork production. There was a wide ratio again in 1916, in 1921 and 1922, and again in 1926. In June, 1925, the ratio was 9.7, by March, 1926, it had reached 20.0.

At the present time to relation between the price of hogs and corn is very favorable to feeding. A study of the figures for a period of years shows that it has generally been from four to six years from one period of wide margin to another. This would seem to indicate that the favorable ratio will continue through 1926.

Soy beans are a good hay pasture, feed crop and soil improvement crop for most sections. The crop may be grown successfully on acid soil, but if the field has not grown this crop previously, it is necessary to inoculate for best results.

SILAGE FOR DAIRY CATTLE

The value of silage was first realized by dairy farmers for nowhere is the silo so much a necessity as upon the dairy farm. And no dairy farm is complete in its equipment that does not have at least one silo for winter feeding and one with a smaller diameter for summer feeding.

The characteristics of good corn silage make it preeminently a feed for dairy cattle. It is palatable, succulent, bulky, beneficial to the digestive tract, and economical. These are among the leading characteristics of the ration which is essential to the largest and most economical flow of milk. In fact, most dairy farmers in the corn belt realize that to secure the largest possible profits from a herd of cows they must feed corn silage. In regions where corn cannot be grown successfully for silage, many dairy men have silos in which they cure other crops.

Experiments carried on at the different experiment stations show conclusively that silage is far superior to shuck corn or hay or hay in milk production. Silage fed cows produced from eleven to thirteen per cent. more milk than cows fed fodder from the same acreage.

Effects of Silage on Milk. Contrary to the opinion formerly held the milk from silage fed cows is not inferior in flavor or odor to the milk from cows fed dry feed. The condensed milk companies which formerly did not favor milk from silage fed cows, are now advising their patrons to put up silos.

Great care should be taken, however, to prevent the odor of silage from contaminating the freshly drawn milk which takes up odors very quickly. It is best to feed the silage after milking and just what will be eaten up clean at that feed. The silos should be shut off from the barn proper. The idea still held by some, that corn silage will destroy the teeth and digestive tract of the cow and induce such disease as tuberculosis, is erroneous.

Grub Out Dead Trees

Midwinter is the best time to grub out dead trees in the orchard and saw off large dead branches. These should be at once worked up into stove wood. Apple or cherry wood makes excellent fuel for the fireplace or kitchen stove. If removed from the orchard at this time the hazard of their spreading blister canker or borers to the live trees is avoided.

AN AD PLACED IN THIS PAPER WILL BRING RESULTS

VASIL DINEFF

Coffee and Tea House

At 661 South Genesee Street in Waukegan is a very reliable coffee and tea house. They carry a complete line of coffee, tea and spices at all times. Phone 2985.

This is an institution that is enjoying a large patronage on account of the very excellent service they are giving the public in their special field of endeavor.

The coffees sold by this place are imported from the best fields of South America and far away fields of Java and Mocha, and when you get coffee from their place it has the aroma of the tropics. The proprietor secures his coffee from the largest importers in the country, and being an excellent judge of coffee he is a discriminating buyer.

The coffee house is becoming one of the necessary establishments in the business life of every well-or-

ganized city, as people generally have come to realize that it takes a person who has had much experience in this special line to be able to buy good coffee.

The place is equipped with the latest improved machinery for the proper roasting of coffee, and with the best mechanical equipment for grinding it to any refinement to suit the most discriminating purchaser.

If you have never ordered coffee from this place you should give it a trial as you are missing one of the means to the proper enjoyment of the perfect meal. They are of our leading business men who are conducting an establishment that adds to the efficiency of the town as a trading center. They also carry a line of teas and spices.

Their coffee, tea and spice business is the most extensive in this sec-

tion of the country, their popular brands being sold wherever coffee and high grade teas are used.

The splendid business transacted by this firm and the demand for their products is taxing the capacity of the company, and is a distinct tribute to the management who operates this progressive company, as it has built up a business in its special line which is truly commendable.

There are no more public spirited citizens in the community than the management of this well known establishment and in making this review of the onward progress of this section it is natural to wish to compliment them and to direct your attention to this establishment as one of the reliable business institutions of the community which has added to the development and progress of this part of the state. Adv.

JAMES MORROW AND SON

Dodge Brothers Cars and Graham Brothers Trucks

Have you seen the new Dodge Brothers Senior Six? It is now on display at 202 South Genesee Street in Waukegan. Also a complete line of Dodge Brothers four and Graham Brothers trucks. Phone 228.

The New Dodge Brothers models embody improvements which permanently distinguish Dodge Brothers Motor Cars as among the easiest riding automobiles on the market regardless of price.

The New Dodge Brothers Senior Line is a line of medium priced sixes that will dominate the six field as the Dodge Brothers Four has for thirteen years. They are built in three different models—the Senior Sedan, the Senior Cabriolet Roadster, and the Senior Coupe.

The Dodge Brothers Senior Line may be a new six to you, but it is an old one in them. They have been tested and retested, leaving nothing undone in creating "America's Perfect Six."

The engine, a six cylinder L-head

has a 3 1/4 inch bore and 4 1/2 inch stroke with 223.98 cubic inches displacement. The seven bearings have a total length of eleven inches and crankshaft weighs 69 pounds. This assures absolute bearing stability.

All Senior models are equipped with Hydraulic Brakes, single-plate clutch with compound leverage, underslung rear springs, starter and generator six volts and separate units, clear vision weather-proof one-piece windshield with crank type regulator and equipped with a fine custom-built body with the best of appointments. A ride in the Senior will convince you. Just call on James Morrow and Son in Waukegan.

Dodge Brothers' commercial car has taken its place as one of the essential features of latter day equipment. It is popular both with business men and farmer and has come into wide favor because it sustains their reputation for efficiency and dependability and it stood up under every test which it has been subjected to by all classes of purchasers.

Graham Brothers Motor trucks handled by this efficient dealer are made in various sizes for commercial use. The engines used in Graham Brothers trucks are the same as those used in the Dodge Brothers motor cars, thus assuring the owners of these trucks excellent service at any Dodge Brothers service station in the way of parts. Another feature here is the fact that the service men of the Dodge Brothers garage are always familiar with the Graham Brothers trucks and thus are able to assure owners more satisfactory service.

The manager, Mr. Morrow, insists that the very best attention be given to every patron and as a consequence people from every point of the compass are praising the excellent service at this popular establishment. Adv.

WAUKEGAN CAB CO.

TELEPHONE 90 AND 658

Taxi and Livery Service

A modern taxi and livery service, located at 206 Washington Street in Waukegan. They will take you any place and bring you back at prices which would surprise you. When in need of their service call Waukegan 90 and 658.

One of the greatest necessities of the commercial life of today is the modern and rapid service of the public taxi and livery service. Brevity is the soul of business now and rapid transit is an important factor in its transaction.

The Waukegan Cab Company who recognize the need of such transportation, has since the beginning maintained a service that has been most satisfactory.

They serve the residents of the rural districts and surrounding villages as thoroughly as they do their many patrons here in the city.

A large sum of money has been expended in securing modern equipped

cabs with easy riding qualities and in sufficient number to insure a frequent and permanent service.

The taxicab is a most essential element not only in the business life of a city but in the social field as well. In fact it has a hundred and one uses for which as a convenience it could not be replaced today. It has become so strongly allied with our hurried commercial and social life that people wonder how they used to get along without its instantaneous service.

Their cabs are driven by men who are veterans at the wheel and dextrous in heavy traffic. They are selected only after a thorough test as to judgment and experience. They are under strict orders as regards speed and had weather conditions. They are instructed to exercise the same care in handling passengers as is the rule at the wheel.

In their efforts to best serve the

public they have made a thorough study of the needs of this section of the country and in the equipment have spared neither time nor expense. As a result of their splendid metropolitan service the general public has responded as it always does when its requirements are complied with and this company is one of the most thriving concerns of its kind to be found in the entire state today.

Their response to a phone call is almost instantaneous and for this reason they have become known as "the busy man's first thought." In his daily movements. By the methods of this company you are safely and swiftly transported to the desired objective. Their rate has been placed at the minimum—service and safety considered.

It is a pleasure for us to direct the attention of the public to the sudden and superb service accorded by the Waukegan Cab Co. Adv.

T. J. STAHL AND COMPANY

Stahl's Service Satisfies

With offices at 226 Washington Street in Waukegan this firm handles all kinds of real estate and insurance. They also make loans on real estate. If you have property to sell, or want to buy, call 237, and their representative will call on you.

To successfully deal in real estate it will be found that experience as to actual values and good judgment are the first requisites. You should consider such important matters well before making any transaction. In this line we know of no institution being held in higher esteem than the prominent and reliable real estate and insurance company, who are the merited subjects of this business sketch.

The services rendered the home builder by T. J. Stahl & Co. in Waukegan assists in the development of this community in a marked

degree. Whether you wish to buy, build, trade or sell, they will be of invaluable service to you in your transaction. Their years of experience have sharpened their sense of values and conditions, which is at your disposal.

If you have any money you would like to invest wisely with a view to the largest returns, call at this office, as at all times they have an exhaustive list of good town properties or farms at very attractive prices. Do not hesitate to consult them on any phase of the business. Their services will ever be found courteous, concise and complete and founded upon the most reasonable terms. They are known for their public spirit and efforts in the best interests of clients and this is responsible in a large part, for their continued progress in the community.

Their insurance department is a well conducted feature of this company. They represent only the strongest and best companies in their insurance department. They now write annually a large volume of fire insurance and can take care of your needs in the most approved manner.

In this Business Review we wish to compliment this reliable business house on their commendable and painstaking methods and the well merited success achieved that has brought them a large and satisfied clientele located in all parts of the county. When in need of advice feel free to call at their office and talk it over. You will find them thoroughly conversant with every feature of the service. Adv.

HAROLD N. BLASIUS CO.

Awnings, Tents and Camp Outfits

A ready protection from sun or storm is offered by this popular tent and awning company. Located at 123 Washington Street in Waukegan, they have been serving the county since 1913. Phone 2087.

This prominent and extensive manufacturing firm specializes in tents, awnings and covers, and have a large and satisfied patronage throughout the entire state.

The real sincerity, high quality of material and manufacturing efficiency is equalled only by the fact that since their organization, this firm has designed and manufactured "the best in tents and awnings." The name, Harold N. Blasius Co., is synonymous with the most dependable quality in tents, awnings, truck covers, tarpaulins, horse covers, storm aprons, hay stack

and machinery covers. The complete satisfaction which their varied products is giving under every conceivable operating condition is perhaps the best proof of the quality built in this product.

As the world's greatest authorities have approved recent inventions in equipment, they have been immediately adopted by this company, and this, coupled with the maintenance of one of the most up-to-date plants, is rendered all patrons on custom work.

The company has made the tent and awning business their own particular business. Therefore any community is fortunate in having such an institution among its industries.

An interesting feature and one which fills a long-felt want, is their

new system of waterproof and mildew proof duck for use in the manufacture of their products.

The company is one of the most substantial concerns engaged in this manufacture in the country and its phenomenal growth is the result of persistent work on the part of its officials.

In this Business Review of the onward progress of this city and vicinity we feel called upon to compliment this large progressive concern upon the manner in which it conducts its industry and to say that it has been a decided factor in the industrial life of the community.

No matter what you want made in their line and of their materials, write Harold N. Blasius Co. in Waukegan and they will assist you in any way possible. Adv.

Turning Corn Into Dairy Feeds Urged

SURPLUS CROP FED TO COWS WILL RELIEVE FARMER.

Farmers who are worrying about the surplus of corn and the relatively low price of their product just now can secure as much as \$1.25 a bushel by turning this corn into dairy feeds and market the dairy products. "By marketing their surplus corn in the form of dairy products," says M. D. Munn, president of the National Dairy Council, who has been conferring with leaders in the dairy industry and bankers on the question, "this corn will return the farmer about \$1.25 a bushel based on the average price of dairy products in 1925. By so doing we will not upset the balance of grain produced by having meal mush, bread or muffins in place of a bushel of wheat. At best we can only eat a given amount of bread and cereals, and an increased consumption of one form of bread necessarily decreases the consumption of another."

While corn meal mush and milk is

pulverized and healthful and should be freely eaten, it does not constitute an effective way of consuming the surplus corn. Milk and its products are the most healthful foods we have, and by consuming more of these people will have better health, be more efficient and at the same time directly assist in relieving the farmer of his burden of surplus corn providing they will feed it to the dairy cows in a properly balanced ration.

"If the public is really willing and anxious to help in relieving the farmer of this corn surplus burden," says Mr. Munn, "he can best assist by increasing the consumption of milk, butter, ice cream and cheese and at the same time be more healthful and efficient. The properly balanced ration for the dairy cow includes corn meal, corn gluten feed, together with ground oats, barley, bran, cottonseed meal, beet pulp, etc. This corn gluten feed is a by-product from the manufacture of starch and sugar from corn. Therefore the consuming public can further assist by using more corn sugar and less imported cane sugar."

If you are not a subscriber to this paper, you should subscribe for it at once.

Waukegan Marmon Sales

Marmon Sales and Service

See the new Marmon 8 at the ed. show room of the Waukegan Marmon Sales at 716 South Sheridan Road in Waukegan. It is America's truly fine small car. Phone 432.

For over a quarter of a century the Marmon Motor Car Company, whose model plant is located in Indianapolis, Indiana, has been building a high grade line of motor cars. Before you purchase a car of any type or class we urge you to see the new Marmon models, especially the Little Marmon 8 at the Waukegan Marmon Sales in Waukegan.

The Little Marmon 8 is the result of years of study, tests and experiments and has become widely known as "America's first truly fine small car." When you ride in the Little Marmon 8 you will say, "That's it" and why. Because it is an ideal car from every angle. Its entirely different performance has results based on entirely new engineering developments.

The fastest acceleration ever known due to new discoveries in line-eight carburetion and scientific design. The New System of Equidistant "down-draft" manifolding keeps end cylinders from being starved.

When a driver can obtain 18 to 22 miles per gallon, with oil consumption practically negligible, can have a lightning-quick gear shift, which handles remarkably easy in all phases of driving and a car that rides as easy as one twice its weight—you can truly say it is "America's Ideal Car."

The easy riding qualities are obtained partly in the extremely low-slung design. Then too there is the built-in Lavejoy Hydraulic shock absorbers, and the longest springs in proportion to wheel-base of any car in the world. The springs are anchored to the frame with heavy rubber knuckles instead of shackles.

The Little Marmon 8 is a companion to the large Marmon (series 75). Marmon also builds heavier and higher priced cars that are worth your while to investigate. The Waukegan Marmon Sales in Waukegan, local dealers in this section, will be glad to demonstrate the Little Marmon 8 or others at any time. The Marmon Motor Car Company made no mistake in selecting them to represent the Marmon cars in this territory. Adv.

NEW SWINE RATION SAVES MUCH MONEY

"Swine suffer much more frequently from unbalanced, inefficient rations than do any other class of live stock," says F. H. Morrison, nationally known authority on animal nutrition at the Wisconsin College of Agriculture.

He accounts for this in the fact that hogs are fed largely on grain which is poor both in protein and mineral matter, and that they eat relatively little roughage, except when on pasture. He says that the so-called "standard ration" for growing pigs, composed of corn and tankage is inadequate for developing thrifty fall litters—skin milk or other dairy by-products are available at weaning time.

Morrison, with J. M. Fargo of the university swine department, has developed a ration, which has given surprising results in making fall pigs grow as well as spring pigs. "This ration," Morrison says, "is simply a combination of corn, tankage, chopped alfalfa hay, and last—but not

least—linseed meal. This combination has been tested on hundreds of pigs, and we are certain of the results," he declares.

"The experiments brought out that pigs fed on the corn and tankage ration gained slightly less than a pound a day, while those fed the efficient combination, given above, gained 1.15 pounds, on the average. This difference meant that the pigs fed this new ration reached the market weight of 200 pounds 29 days before those fed on the ration of corn and tankage alone—thereby saving about a month's labor in feeding and caring for the pigs."

"Still more important was the saving in feed," he went on. "The pigs given only corn and tankage required 417.9 pounds of corn and 47.1 pounds of tankage for each 100 pounds gain—while those fed the efficient combination, needed only 378 pounds of corn, 31.1 pounds of tankage, 19.6 pounds of chopped alfalfa hay, and 19.6 pounds of chopped alfalfa hay, and 19.6 pounds of linseed meal to make the same gain—a saving of 16.7 pounds of feed in putting on each 100 pounds of pork."

The Jersey Black Giants are considered very excellent for general farm flocks as they have the size which makes them excellent for the purpose of roasters and capons.

THE HUBERT CO., INC.

Roofing of All Kinds

At 24 North Genesee Street in Waukegan you will find asbestos and asphalt shingles, tile, slate roofing, asbestos and asphalt and tar and gravel built-up roofs. Roofing may be applied over old shingle roofs. For information call Waukegan 667.

This popular business house is one of the concerns of this section of the state that is continually buzzing with activity and whose work has met with the commendation of everyone.

They specialize in roofing on new homes or re-roofing. The materials used by this concern are the latest scientific development in the roofing world, having all the tests, including the test of time. The chief advantages of their roofing are that it is fire-resisting, never leaks, lasts longer than shingle roofs and presents an appearance from an architectural standpoint that is very pleasing to the most critical.

They are dealers in all kinds of roofing and are roof specialists in they will show you samples and give

either new or old work. Home builders as well as contractors are every day realizing more and more that a roof is a distinctive part of an attractive home and can either "make or break" its lines of beauty.

This company is favorably known because of their roofing work done in the past. They specialize in built up and prepared roofings.

Their name all through this locality stands for reliability, quality and honesty. They represent the best roofing manufacturers in the United States. They make a specialty of repairing and repainting all kinds of roofs and are famed in this section for the excellent roofs which they produce and build.

Their business integrity is known far and wide. When they give you a guarantee it is a guarantee IN FACT, backed up by experience, skill and reputation.

Call, write or telephone them and they will show you samples and give

you estimates on your house or any building you want roofed or re-roofed.

They have covered many roofs in this section of the state and the work has met with the commendation of the purchasers in every case. To everyone interested they can give these references and will show you the roofs as they stand today.

Their popular roofings are economical in cost and attractive in appearance and the designs are in-laid instead of being printed and are for use on any roof where an artistic effect is desired and are coming into general use for residences, churches, garages, stables, pavilions and various buildings.

We are pleased in this Special Edition to refer all our readers to this Company and compliment the manager upon their business activities. Adv.

WYLLIE'S BOOT SHOP

Shoe the Family At Wyllie's

In his new location at 14 North Genesee Street in Waukegan, with a larger room, Mr. Wyllie hopes to be able to better serve the public than ever before. Bring the family in and give him a trial. Phone 790.

There are many and various ways of keeping down the annual expense in raising a large family and among them is the items for footwear. This shoe house long ago conceived the idea of placing before the public a good dependable, well made all-leather shoe at the very lowest possible price.

The volume of business thus created by Wyllie's Boot Shop in Waukegan is a most gratifying return and has encouraged them to continue the policy. That these facts are fully appreciated by the people not only in the city but in the surrounding country as well, is strongly attested by the large and increasing patronage.

Another feature in their success

is the fact that their line of shoes are built from various odd and regular shape lasts, so that no matter what kind of an odd shaped foot you may have they are sure to have a shoe that will fit you comfortably and still conform to the latest styles in construction.

This method insures satisfaction and this system is absolutely necessary in the modern shoe store of today and will be readily understood when you stop to think that no two pairs of feet are exactly alike and that your own right foot differs from your left. This should be sufficient proof that to provide comfort the shoes must be scientifically constructed.

The whole world knows that a person suffering from ill-fitting shoes can not be 100 per cent. efficient in their work. By dealing here you have the satisfaction of knowing that every member of your family is comfortably shod at the minimum of ex-

pense. When you put your feet in their hands your shoe troubles vanish. One pair of their Correct shoes will thoroughly convince you of the skill and the lasting comfort that can be yours.

If you go out of this store with a shoe that does not fit, it is your own fault and not the salesperson's. It will be because you deceived the salesman.

The Wyllie Boot Shop in Waukegan carries a most comprehensive stock of shoes in the latest styles, finish and colors and can save you a large sum of money annually on the entire family.

In this annual review of our commercial progress we deem it both fitting and merited to direct the attention of our large army of readers to this popular shoe house where they are served scientifically as well as economically. Adv.

HODGE AGENCY

New York Life Insurance

The John Hodge Agency in Waukegan known throughout this section of the state of Illinois maintains their offices in the Waukegan National Bank Building in Waukegan.

Being one of the most popular life insurance companies in the country, they have policies with very attractive features and never failing protection. A man without life insurance in this modern day is like a "man without a country." Everyone should be insured these modern days.

Life insurance offers the advantages of protection, but also usually meets the requirements of some future day. It is a business investment, a worthwhile way to save your money. You can easily pay for a child's college education by carrying a policy on them for the amount of the educational cost. In this way the cost is strung over a period of years. Most business men carry insurance and if in debt (to the amount of their obligations) so in

case of death their loved ones have no debts hanging over their heads. The farmer should also protect their loved ones in like manner and more especially if in debt. When the man, the head of the family is taken away he cannot be replaced, but insurance will leave an income for the family.

Not long ago some statistics on estates were taken and it was found that in money left after death by Americans, 87 per cent. came from insurance and only 13 per cent. from other sources. There is no question but what this is the day and age when insurance is the essential necessity of every individual.

The John Hodge Agency in Waukegan has an enviable record of years of service to the people. They have proven through years of satisfactory service that your patronage has been well merited. In so far as today that your loved ones will be taken care of—tomorrow may be too late. Adv.

THOS. J. KILLIAN

Oil-O-Matic Heaters and General Electric Refrigeration

The General Electric Refrigerator is the product of the leading research organization in the world. It marks fifteen years intensive research. It is more simplified and very quiet and requires no servicing or oiling. It is both economical and clean in its operation. It comes in various sizes suitable for any home. Stop at 1603 Sheridan Road in Waukegan or phone North Chicago 671 for further particulars.

"Married life is wonderful," said the two months husband, "But, oh, how I hate to get up in the morning and fire the furnace, and tend to it when I get home at night, and bank it again for the night just before I go to bed."

That's the wail of not one husband, but husbands everywhere. Everyone that is human loves a home, the spirit of home, the warmth of home. Yet spiritual warmth depends on physical warmth, and physical warmth requires the drudgery of every husband's home life—firing the furnace.

And sometimes, it is not only the husband's drudgery, for indeed wives have been known to don gloves and soiled aprons and actually go down into the basement and fire the furnace. And sometimes the dinner burned while they were doing it, all of which does not add to the wonderfulness of married life.

The problem has been solved. Science has eliminated forever the need of firing furnaces either early in the morning, or when coming home from work, or even before bedtime. Science's gift is the new Oil-O-Matic heater, manufactured by the Williams Oil-O-Matic Heating Corporation and sold right here in this community by this enterprising local dealer, Thos. J. Killian, in Waukegan.

This is not an experiment, something you may invest in with great anticipation and then have it fail completely. It has been tested and tried with confirmed success for six years, tried in the best homes and business places of our country. It

is easy to install—can be connected with the heating plant you now have. It is dirt cheap, and it eliminates all attention whatsoever to the firing of furnaces, to coal bills and dirty basements. It is the one thing necessary to make your home an ideal one.

But the advantage of having one of these Oil-O-Matics in this community does not lie only in the benefits of the marvelous device itself. Almost equal advantage lies in the fact that this enterprising dealer, Thos. J. Killian, in Waukegan, carrying the Oil-O-Matic is giving real service in this community.

They also carry the oil recommended for this heater, suitable equally for homes and business places. They will give you the best payment plan possible.

Such a business is indeed a service to the community. It makes possible better homes and what greater service can there be in any community? Adv.

ELECTRICITY FOR FARMS

More than 10,000 Indiana farmers are using electricity for light and power. These farmers are employing electricity in the development of their homes and in the solution of their labor problems. They are finding electricity to be a most convenient, satisfactory form of power both for the home and for the larger operations. The rural people are simply secured for the country home and the farm the conveniences and the power used so universally, successfully, and economically in city homes and industrial plants.

If electricity is of service and importance on 10,000 farms in the state it should be available on many more of the 207,000 farms in Indiana. On many thousands of these farms exists the same needs and demands as for those which have been fortunate enough to secure electricity.

Why do not more farmers use electricity? How can electricity be furnished to Indiana farms at a reasonable cost? How can Indiana farms make a profitable use of electricity? How can electricity be adapted to farm power needs?

With the hope of securing answers to these questions electric light and power companies have given financial support to Purdue University for an extensive series of investigations and studies on problems related to electricity in agriculture. Purdue University, through the Engineering and Agricultural Experiment Stations, is undertaking this important project and is assigning workers, equipment, and funds in order that the best and most helpful information may be secured at the earliest possible moment.

Public utilities have encountered many difficulties and objections to an extensive development of rural electric lines. Farmers are in doubt as to the practicability of a more general use of electricity and the obligations they can afford to incur.

The state experiment stations have done but a limited amount of work and are unable to answer many questions regarding the extent to which electricity can be used economically as a source of light, heat, and power on the farm.

New Uses of Electricity. New uses of electricity on the farm are being developed constantly. These are being adapted by farmers who have electric service as soon as proven practical by experiment. A comparatively recent use which has been developed is that of lighting poultry houses to increase winter

egg production. Another use still in the experimental stage is that of brooding chicks, using electricity as a source of heat. Considerable experimental work is also being carried on to determine the value of early hatched chicks with ultraviolet light to prevent leg weakness.

The development of electric refrigerators is a matter of great interest to the farm wife. These machines, equipped with automatic controls, make possible the maintenance of low temperatures for keeping cooked foods, milk, eggs, meat, etc. The lack of proper refrigerator facilities restricts the most economical use of the food supply and it is only natural that farm women should feel a deep concern in this comparatively new use of electricity.

Economy of Using Electric Energy. The economy of the use of electricity in comparison with other forms of energy is one about which little is known at the present time. It is the answers to this problem, however, which will ultimately determine to what extent electricity may be used on the farm. Some uses of electricity on the farm can be justified by a matter of satisfaction alone. The great majority, however, cannot be and must be made to pay their way. Data for various operations such as incubation is being secured. The maximum rate at which electricity can be used for incubation in comparison with coal and oil will be established. Similar data is being secured for other uses.

Source of Electricity. The source of electricity naturally is one of the problems uppermost in the minds of those wanting to secure it. Engine driven plants, wind driven plants, small water power plants, and rural electric lines suggest themselves as possible sources of current.

As shown by statistics, over 50 per cent. of the farmers using electricity on Indiana farms today are using individual plants. The majority of these plants are 32-volt, engine driven, battery plants. Current is used largely for lighting and some small motor work such as driving a washing machine and water pump. Besides this type of plant three other types of plants are made in which the generator is driven by an engine. A 32-volt non-battery plant, 110-volt non-battery plant, and 110-volt battery plant are also manufactured. At the present time the number of the plants of these types is a very small portion of the individual plants of the state.

Wind electric plants using a 32-volt generator and battery may be found occasionally in the state. Such a plant has been installed at Purdue University for experimental

purposes for more than three years. In May, 1925, a new type of wheel was installed on the tower. This wheel consists merely of two blades which resemble in appearance the propeller of an aeroplane.

Cost of Electricity. The problems of cost is of prime importance and for that reason is receiving considerable attention. It involves the following factors:

1. Interest on the investment in generating plant and distributing circuits.
2. Depreciation on the above.
3. Maintenance of the same.
4. Cost of fuel and supplies.
5. In the case of the central station, cost of reading meters and clerical help.

Adapting Electric Drive to Farm Machinery.

The problem of driving farm machinery with electric motors is one which has had considerable influence on the slow development of the use of electric power on the farm. Farm machinery, as equipped at the present time, except in a very few instances is not suited to electric drive. The belt speed of a motor is high and that of the equipment to be driven relatively low. A wide variety of conditions must be met from driving a slow speed corn sheller to a very high speed wood saw. To do this with one motor operating at a constant speed means that some provision must be made to reduce the driving speed of the motor to that demanded by the equipment to be operated. It is not always possible to do this simply by placing a larger belt pulley on the driven machine but frequently requires that a set

of gears or counter shaft be used to reduce the driving speed. The possibility of standardizing belt speeds of various farm machines is being considered, but this will not affect existing machinery.

Another factor which has a direct influence on this problem is the power requirement of the larger belt driven machinery. Motors required to drive a thrasher or ensilage cutter must have a rating of at least 15 H. P. The cost of such motors and the rates required for their intermittent use have tended to discourage the use of electric power for the heavier belt work. By developing smaller threshing machines, ensilage cutters and feed grinders, motors of smaller rating may be used. It will then be possible for one man to increase the amount of work which he can do himself and thus have to rely less on hired labor.

The problem of getting satisfactory hired labor on the farm and in the home has become increasingly difficult. The use of electricity enables the farmer to utilize his time more effectively and eliminate the need of using so much extra labor. The electrically equipped farm and home not only help solve the labor problem but makes the home more satisfying and attractive to the family.

"Get the gopher," is the slogan this spring. These farm posts are having a more difficult time than they did a few years ago when their chief danger was from the little rifles shot by farm youngsters. Now the farmer himself is "taking a shot" at killing the gophers.

BAKE-RITE BAKERY

The Best of Bread and Bakery Goods

With sales room at 27 North Genee Street in Waukegan this prominent bakery is equipped to give you the best of bread and pies. Also a full line of cakes and fancy pastries. Phone 970.

When it comes to offering baked goods to the public this firm is not to be slighted and it is safe to wager that what they have to offer their customers is the best in quality and price.

In the great experiences of life there are none which recall more pleasant memories than the days of youth, when the boy or girl got into mother's bread box just after the bake. Times have changed and many today do not get to experience this joy of life unless they patronize this institution which is the nearest approach to the old family bread box

in these days of the complexity of civilization.

They make a specialty of furnishing baked goods for gala events, cakes, buns and pastries of all kinds and make a specialty of furnishing wedding cakes and pastries.

They operate a strictly modern retail service, which covers most of the surrounding country.

Their baked goods are the very best that money will buy. They are baked under the most wholesome conditions and the very best grade of flour, pure shortening, sugar, salt, milk and other ingredients, mixed and baked under clean sanitary conditions by skilled workmen.

All goods are sold in the very freshest of condition and those who have never tried the products from this bakery are missing one of the

accompaniments of the perfect meal, as hosts of people are praising the work of this bakery and are demanding this bakery's products at all times.

As a consequence the business is spreading far and wide over this section of the country, and in this review of our progress we are glad to give commendable mention to their activities and to predict even greater expansion in the future. The genial manager has had a long experience in this line and is well versed in all its many features, and this review embracing as it does the most salient features of our forward progress, we wish to compliment them upon the valuable service they are rendering to the local public. Adv.

and is designed for every purpose, principally autos, having a size for every make of car.

They render a "Real Battery and Electric Service" and are among the most efficient storage battery and electric men in this part of the state. Also a complete starting, lighting and ignition service.

By hard work and the determination to master every detail of the electrical and battery business, the mechanics have become versed in all the technical parts of every make of battery until today they hold the name of "Expert Battery Men," and no matter what problem you may have in connection with the operation of your battery, they can work out the solution that will operate to your best advantage, no matter what make of battery you are using.

Their equipment is the latest product of the advanced electrical

So much for that letter. Let us now turn to the other piece of mail matter, the Congressional Record. In this we find Senator Stanfield of Oregon saying:

"The most conspicuous examples of the principle of free press are the country newspapers of America. An able magazine of opinion of New York has carried at its masthead the sentiment: 'The destiny of the great republic rests with the country editors of America.'"

"In a peculiar sense, the country editors of the nation hold a vital relation to the welfare of the great republic. They function intimately in the homes of our people, who are at once both their neighbors and their friends. In the aggregate, they speak to the largest constituency of the nation."

It all comes down to this: Reader interest is the vital factor. The country newspaper is read. It not only goes into homes where every item is read, it goes into the homes of neighbors—who are not subscribers.—Walter Scott Meriwether in the Mississippi Sun, Charleston, Miss.

Plan for Success With Caponizing Operation

To be successful with capons and caponizing, it is absolutely necessary to keep the chicks free from vermin. Chicks infested by mites will not withstand the shock of the operation, while a vigorous chick will scarcely notice it.

While caponizing may be done successfully almost any time of the year, May and June are the better months for it. These, with proper care, should make eight or ten-pound capons by the holiday season. The later ones must be kept over till the latter part of the winter or early spring.

The correct weights for caponizing depend upon the breed—the Mediterranean at about one pound, the American breeds at from one and three quarters to two pounds, the Asiatics and English from two and a half to three pounds.

The chicks must be kept without feed or water for 24 or 30 hours before the operation. This makes the operation more successful and is better for the birds.

Does Advertising Pay?

J. K. Groom, of Aurora, Ill., said advertising the evening service of his church had increased attendance collections and more than paid for itself but that both had dropped back to original proportions when the advertising was discontinued.

NORTH SHORE-WAUKEGAN AUTO RADIATOR CO.

Expert Radiator Repairing

At 12 South Sheridan Road in Waukegan will be found a most complete and modern radiator company. They are experts on smashed fenders and bodies, new radiator cores, fenders and bodies installed. Work called for and delivered anywhere. Phone 748.

Metropolitan service of the very highest order is offered the people of this section by this well known firm.

They repair radiators—in fact, the service is complete and "Service" is their motto.

Re-coring of radiators is a very important business and they are equipped scientifically to do this work correctly. Their men are experts on the work and their prices are most attractive. They can be reached by phone, letter or personal call and are known for their prompt and efficient work.

When it comes to radiators and repairs you will find this establishment complete, and you will readily learn why it has come to be known as the house of quality and service. The best of quality, and the highest class of service and the most reasonable price possible are features that bring them an ever increasing patronage.

Leaking Radiators are expensive, dangerous and should be repaired at once. A leaking radiator is the cause of many serious troubles to which a car is exposed. Scored cylinders, burned out bearings, burned up cars are some of the results of a leaking radiator. At the first appearance of a leaky radiator you should call the North Shore-Waukegan Auto Radiator Co. in Waukegan.

The prices are of the most pleasing character and the promptness of

the satisfying kind, getting the work done when promised.

They have completed many jobs that comprises some of the big ones in the automobile line. These speak for themselves and by their record they are known and the business is increasing.

The manager has always been a booster for his home city and through his commendable policies and his untiring efforts to meet every demand of the present day public he has merited the leading position that he now occupies in the business world of this section of the state.

In this edition we wish to compliment this firm upon the prominent position attained in the business life of the county, and upon the modern and satisfactory work which is executed. Adv.

ABILITY BATTERY CO.

Better Built Batteries

A modern electrical and battery company, located at 716 South Sheridan Road in Waukegan. They make and install their own makes of batteries and are all guaranteed. Phone Waukegan 432.

The electrical equipment in our modern automobile is the most vital part of it. In the electrical research field there has been no greater advancement than in the storage battery. Therefore it takes the services of an automobile electrical engineer, when there is some trouble in starting, lighting or the ignition.

The widely known Ability Battery Company made no mistake when they selected this establishment for their service station for this section. They are justly proud of this very different battery and will make demonstration to prove its long life. This battery is probably the foremost storage battery of the age

and is designed for every purpose, principally autos, having a size for every make of car.

They render a "Real Battery and Electric Service" and are among the most efficient storage battery and electric men in this part of the state. Also a complete starting, lighting and ignition service.

By hard work and the determination to master every detail of the electrical and battery business, the mechanics have become versed in all the technical parts of every make of battery until today they hold the name of "Expert Battery Men," and no matter what problem you may have in connection with the operation of your battery, they can work out the solution that will operate to your best advantage, no matter what make of battery you are using.

Their equipment is the latest product of the advanced electrical

world, and was chosen by them to give the best results. Repairing and charging of batteries is one of the most efficient services rendered by this concern.

The Ability Battery Co. in Waukegan also make a specialty of farm lighting battery work. The next time you are in need of farm lighting battery repairing or recharging try this local concern. Their work always pleases and they have a number of customers all over this section who make their establishment headquarters when in need of farm lighting or repair.

They carry a complete stock of radio batteries of all types and sizes. In this Annual Farmers' and Business Men's Review we are glad to refer all our readers to the many advantages of dealing here and to the progressive methods of the efficient manager. Adv.

WHYTE FURNITURE COMPANY

Everything For the Home

Under the capable management of Charles L. Whyte, this home furnishing company is located at 219 West Washington Street in Waukegan. They handle a complete line of furniture and home furnishings. Phone 1081.

This is an establishment which for years has been the one particular reliable house, making the furnishing of homes at the most reasonable cost the sole aim.

The Whyte Furniture Company have justly earned the position they occupy as one of the foremost home outfitters in this section of the state. This has been brought about through their combining unequalled quality and metropolitan service. Truthfully it can be stated that no business in this section maintains a better heritage or has a higher standing in this line than this well known firm.

All the particular brands of goods in these lines that are known as the

standard of quality, those are the brands that will be found in this stock. The people of this city and surrounding territory have long since learned to depend on this firm to have "what they want when they want it," and also that this concern is the one that will keep "Good Quality at Reasonable Prices."

This popular establishment is a store "of the people and for the people"—a business that has prospered on a plan that aims to give mutual pleasure, satisfaction and benefit, in supplying at reasonable prices the necessities, conveniences and comforts of home life.

Through long experience they have gained a thorough knowledge of furniture values and by means of this they are enabled to select stock with three points in perfection—comfort, beauty and durability. This combination embraces the most beautiful in finish and the most durable quality of the furniture makers' skill.

It matters not whether you wish to select furnishings for the entire house or only a piece or two, you will be served here most satisfactorily and economically.

In the rug department may be seen the most beautiful line of floor coverings in this section. The colorings and combinations are really artistic, and the latest designs assured. The people in charge of this department are thoroughly familiar with every phase of the business and you can depend upon what they tell you regarding your particular needs to harmonize with your home surroundings.

Thoroughly conversant with the operation of this business, in each of their departments they have always stood ready to lend advice and personal assistance to all patrons and we are pleased to direct your attention to this establishment and commend them on the admirable manner in which it is operated under the motto: "Quality and Service." HOLLAND FURNACE CO.

Holland Furnaces Make Warmth

IS CO.

This modern furnace company is located at 408 Corey Ave. in Waukegan. They have one of the best furnaces on the market today (The Holland). Estimates on all work cheerfully given at all times. Phone Waukegan 1014.

This is an authorized factory branch of the Holland Furnace Co. of Holland, Mich., the largest and most extensive manufacturers of furnaces in the world. It is the one furnace whose popularity is nation-wide and is sold at a price no higher than those of inferior makes.

The Holland Furnace is an aristocrat among furnaces and is strictly in a class by itself. It provides the most approved means of supplying an even temperature throughout every room in the house at the minimum cost.

Please remember that the installation of each and every furnace is a subject of more importance to the company than the furnace itself.

Therefore, every Holland furnace manufactured must be installed by Holland expert installers. These engineers are skilled in the art of fitting the furnace to your home.

It is a standing rule of the company that every Holland patron must be pleased. The Holland bond—the pledge of the world's largest furnace company—is your protection.

Install a Holland heating system equipped with a new humidifier and your home will have all that is possible to possess in healthful, clean, economical and convenient heating.

The Holland furnace company maintains over 580 factory branches manned by heating experts, trained and employed on full time. Their furnaces are never sold by dealers.

In these days when time and thought are being extended to devise additional comfort and happiness, just think of the Holland furnace as a spirit of genial warmth that carries content and good cheer

outfits

rest for the... waterproof and miller drudgery accompanying the manufacture of old style heating methods.

The unusual popularity of the land Furnace adds more than its share as a selling feature of your building. In the permanent home and its economy features added to the result of ing in doctor bills will soon pay of its itself.

Holland furnaces make the on-friends. Considering its combined features of economy and convenience you cannot longer afford to be without one. You will only live once—Why not, with your family enjoy the utmost in home comfort while here.

This factory branch is in a convenient location. Call and take the matter up with them, they will be pleased to furnish facts and figures that will interest you. Adv.

Real Use Found For Sunflowers

CROP USED SUCCESSFULLY BOTH FOR SILAGE AND FOR ITS SEED FOR OIL.

The sunflower bids fair to become a regular farm crop in the light of experiments conducted by the Ontario Agricultural College in Canada and various state stations. It has been used successfully both as a silage crop and for its seeds as feed and for their oil. Southern Illinois joined the sunflower procession when its own crop failed and there have been favorable reports on the sunflower crop from that section. The Ontario Agricultural College report says:

"The average results of the analysis of the sunflowers compare very favorably with those of corn, being particularly rich in protein and fat."

Distinct Advantage. The Montana station reports: "When digestible nutrients, yield per acre, drought and frost-resisting qualities of the sunflower are compared with corn, it is readily seen that sunflowers have a distinct advantage over corn for silage purposes in the higher mountain valleys of the West or in other sections of the United States or Canada with similar climatic conditions."

The station at Alberta, Canada, reports: "From our experiments we are quite in favor of the use of sunflowers for silage."

British Columbia reports: "All the animals take to the sunflower silage quite readily and their flow of milk is normal and absolutely satisfactory."

Not Equal to Corn.

Oregon reports that sunflowers make good silage but are not the equal of corn. Pennsylvania says that the milk flow is not as well maintained on sunflowers as on corn. New Hampshire says the cows did not relish sunflower silage at first but took to it readily a little later. West Virginia reports sunflower silage as a success. Colorado station says its herd went through the winter on sunflower silage as well as on corn silage. Seedsmen now stock the principal commercial types of sunflower seed.

Sudan Grass Found Best Emergency Crop for Hay

At the Iowa experiment station sudan grass has proved to be the best nonleguminous emergency hay and pasture crop. It may be seeded after corn planting, as it is very drought resistant. About 15 to 20 pounds of seed per acre sowed broadcast or drilled is the general practice. The seedbed is prepared as for corn. If a seed crop is wanted, drill in rows wide enough to permit of cultivation and use 5 to 10 pounds of seed.

The crop is not available for pasture until about July 1 and ceases to be productive after the first frost. There is no advantage in seeding before the middle of May or later than July 26.

Two cuttings gave higher yields of hay of better quality but there was great difficulty experienced in drying it. The better way is to cut when the seed is in the soft, dough stage and pasture the aftermath. Cut with a mower and cure in the swath. A binder may be used successfully when only one hay crop is made. Sudan and soy beans grow successfully when mixed.

John R. Fulton

Real Estate and Loans

Mr. Fulton renders a modern real estate business at 19 North Genesee Street in Waukegan. He is at your service at all times. Phone Waukegan 3562.

Ever since Mr. Fulton began operations in the county he has been at the service of its patrons at all times, willing and anxious to give any information desired and assuring all persons that no obligation was incurred merely by the asking of questions. Courtesy and accommodation have been the bywords of its progress and the hundreds of clients who have consulted and purchased real estate at this office are enthusiastic for this commendable policy which has ever been increasing the patronage of this establishment.

When you receive a policy from this well known office of insurance experts you can rest assured that your property is amply protected in some of the largest insurance companies of the world. A careful selection of companies and a clean and straight forward manner of doing business has won this office a large clientele in this part of the state. They make a continual study of the

insurance needs of the people of all the surrounding territory and are able underwriters. No matter what problem you may have in the insurance line all you have to do is to call him over the phone or drop in at his office and he will readily solve it for you.

Their operations in the real estate field have been of a most extensive nature and show that they have the ability to bring to a successful conclusion real estate operations both big and little. No matter whether it is a farm or city property that you have disposition of you will find that they're in touch with buyers who have the money and are ready for business.

The John R. Fulton Agency has always evidenced a true interest in the progress and prosperity of this part of the state and have at all times been willing and ready to lend aid to every proposition that promised the betterment of the home community. They have been among local boosters who are responsible in a large measure for the progress of this section of the country. Adv.

FARM FACTS ENCOURAGING

When one considers that, for the year 1926-27, the gross income from all American agricultural products was \$12,668,000,000; when one considers that, as a result of the squeezing out of the water of democratic inflation from the agricultural fabric during the orderly process of return to normalcy from the abnormal conditions of war, this income slumped to \$9,217,000,000 for the year 1921-22; when one considers that the gross income during the present crop year is estimated, on the basis of latest crop reports, at \$12,115,000,000—one must arrive at the conclusion that farming is not in such a sorry state as the pessimists would have the general public believe.

For even if the present crop year, promising a total income of twelve and a half billions of dollars, could stand by itself, without relation to a background of depression, it would properly be rated as a prosperous year for a majority of the tillers of the soil in this country.

The darkest spot in the present picture is the south, where the falling price of cotton has seriously reduced the purchasing power of an extensive region. The conditions are not all they should be in some of the spring wheat territory from western Minnesota to eastern Montana where the crop was spotted and much of it poor, due chiefly to drought during the early part of the growing season. The last two months, in addition, have witnessed disastrous floods and storms in the south and in certain valleys of the middle west.

Leaving these areas of depression out of consideration, a majority of the farmers will do about as well financially during the present year, and perhaps a little better, than they were accustomed to do before the war. In the reckoning of the farmers, however, the present crop year cannot stand as an isolated season, but must be appraised as a part of the whole period of post-war readjustment.

Following the collapse in prices of farm products in 1921, the American farmer undertook a drastic readjustment of production, endeavoring to get his leading enterprises once more into profitable balance with the markets. The wheat acreage was reduced from 64 million acres in 1921 to 52 million acres in 1925. The number of cattle was reduced from 67 million head in 1921

to 60 million head in 1925. According to the census, about 19 million acres of crop land were permitted to go out of cultivation between 1920 and 1925. Such land, for the most part, reverted to the estate of pasture areas.

This process of readjustment was effective, and the progress of agriculture toward economic recovery has assumed a rapid rate. Agriculture is gaining steadily in stability, despite difficulties experienced as a result of the Meadon inflation policy operative under the Wilson regime.

The relative "purchasing power index," a figure arrived at by comparing the price of farm products (30 items) and the prices of non-agricultural commodities was 85 in July, 1926, as against only 69 in 1921, at the close of the period of democratic inflation. Thus the farmer's dollar will buy nearly one-fourth more than it would in 1921.

Hay, potatoes, beef, hogs, eggs, and and horses are above last year's levels, with most other products holding their own. The position of the live stock industries is a feature of strength underlying the present situation. Improvement in the economic situation of the American farmer is very satisfactory, with the farm budget, generally speaking, well balanced. Any fair appraisal must warrant the conclusion that the agricultural situation, viewed in its entirety, is steadily improving.

The observer recently stated that "the stage is set in the corn belt for perhaps better times than it has seen in several years," and there is occasion for optimism, rather than pessimism, in the entire agricultural outlook.

WHERE FIELD BEANS ARE PRODUCED IN QUANTITY

Michigan, California, New York, and Idaho lead in field bean production. Although Minnesota has considerable areas of land well suited to field bean production, the acreage has increased very slowly. In 1923 and 1924 it averaged 10,000 acres with an average yield of 10.5 bushels per acre. An increase in acreage to 25,000 will provide only what is needed for consumption within the state. Conditions for growing this crop are not so favorable in some of the nearby states as in Minnesota. A good market can probably be found in these states for any surplus produced here.

RECHTENWALD AND BALL

Duntile Cement Products

At 1744 Sheridan Road in Waukegan you will find the office of this progressive firm. They specialize in Duntile cement blocks and other cement products. It will pay you to get acquainted. Phone 4281.

Their Duntile concrete blocks are in great demand throughout the country and are most popular with those contractors who have had a wide experience in the use of these products. The economy, safety and architectural supremacy of their cement blocks are acknowledged facts and need no comment here. Let us add, however, that they are prepared to take care of all demands.

They manufacture Duntile blocks and columns and all other kinds of plain or ornamental work for house, barn or other structure. In fact, it can truthfully be said that "anything made of cement" can be secured of them; and you may rest assured that the product will be of the highest quality.

Within a radius of many miles this firm is known as one of the most extensive firms in its line, and as builders of concrete blocks for building purposes that are absolutely waterproof. The process which the establishment uses is the method which insures their guarantee that they will be of high quality.

Farmers should be especially interested in this firm. Their Duntile concrete blocks will permit farmers to build better houses, barns, and out-buildings. When you build with their concrete blocks your building is fireproof, will last for all time, there is no up-keep, your insurance rates are lower and the building, whether house, barn or out-building, will look as well twenty years from now as it does today. Farmers of this vicinity are urged to consult with this firm on these matters and are certain to find such a consultation to their advantage.

Though experts in their line, this firm has always been very reasonable in their prices and the people of their community have found it worth while to consult with this firm before contracting elsewhere. Special service and comprehensive information will be given customers at all times whether the request be in person or over the telephone.

This policy of goods of high quality, service of the most pains taking kind, and very reasonable prices, has brought this concrete works a large patronage and the confidence of the people of the county.

The management of the establishment is of the well-known business men and manufacturers of the county who have always taken an active interest in our onward progress; they are among the valued citizens. We wish to compliment Rechtenwald & Ball in Waukegan upon their success and progress of the company. Adv.

PETERSON AND WEEKS COMPANY

General Contractors

With offices at 1117 Washington Street in Waukegan this firm is prepared to execute any kind of construction work according to the very latest scientific methods. Whether your needs be large or small, give them a trial. Phone 1005.

In a review of the business interests of the community there is no one concern more worthy of extended mention than this one.

Here the public has at its disposal the services of men who possess the know how and who obtained their manufacturing and business education in the school of practical experience. From the inception of the enterprise, quality has been the aim and the standard of excellence has been maintained from the beginning.

The force of this business is very extensive and is equipped with the latest equipment for production of high class work.

The name stands for quality, reliability and progress in this line in this section of the country and as the

advances of the periods have marked improvements this firm has adopted these late scientific products as rapidly as they were approved by the trade.

They have won a warm place in the heart of the public through the excellent work they have executed in every branch of the contracting and building business. The public has come to understand that when a contract for this class of work goes to this firm it is executed according to specifications and a satisfactory job is certain.

This firm is not merely building contractors but are known far and wide as construction specialists. They are well informed and widely experienced on all classes of construction work and throughout the wide territory in which they operate they are considered as authority upon construction matters. Their service includes expert work on every kind of construction work and they are equipped to handle the largest

contract or even a small job. In the matter of any class of construction work you will do well to consult with them. The public officials of this part of the nation have found that they can save the taxpayers much money by entrusting many jobs of construction work to this firm.

Anyone desiring or expecting to want anything in the above lines should consult them, call around and look over their designs and get their prices. They will be pleased to show you whether you desire to purchase just at this time or not. It is a pleasure for us to point out this concern as one of the leading industries of this section and to say it has always been eminently fair and honest as well as progressive and up-to-date and that they have won for themselves the reputation of being the leading concern engaged in the special field of endeavor, and to point out the advantages of transacting business with them. Adv.

MADISON BEAUTY AND BOBBING SHOPPE

Hair Cutting by Men Bob Experts

This is a shop for women and children only. They specialize in shampooing, marcelling, scalp treatments, facial treatments, manicuring and hair dyeing. Permanent waving by experts. Call at 108 North Genesee Street, or 208 Madison Street in Waukegan, and give them a trial. Phone 2090. George E. Gehring, Proprietor.

Here will be found a most distinctive beauty shoppe which has gained merited patronage from among the more discriminating matrons and misses of not only the city but from the smaller towns and surrounding country as well. Study and experience on the part of the operation here places the Madison Beauty and Bobbing Shoppe at Waukegan in the rank of professionals in their line and thoroughly competent to advise patrons as to the treatment which will best respond to your own particular case.

They are especially skilled and equipped for the modern care of the hair, such as cutting, trimming, mas-

saging, shampooing, marcelling and permanent waving, as well as the highest grade facial treatments known to the cosmetician's art.

No matter how discriminating the patron may be the most advanced modes of beauty culture received here will prove both surprising and satisfactory.

A permanent waving specialist has come to the defense of the country girl and her city sister, saying "It is not vanity that makes a woman desire wavy hair, it is natural impulse." "Everyone had curly hair and it was curlier in damp weather than when it was dry. The rain that today takes the curl in it in the old days and it does today when the hair is restored to natural functioning."

"Hair after the permanent wave process, is nearly restored to its natural conditions and responds thereafter to the natural heat of the body and natural moisture of the atmosphere. On an ex-

tremely dry day a damp brush will increase the curl instead of taking it out. These things all go to prove that nature will assist the permanent wave."

It is openly admitted by skin specialists that activity of the body lends brightness to the face and makes one appear young, still there are signs of age that appear even with a healthy active body, and at this shop the give-away lines and flabby muscles are remedied. The treatment chosen here is the one which is the best suited for each case.

Both the social and business women of today have demanded the full value of correct personal appearance. The modern beauty shop of today is no small item in the commercial life of the community. The artists at this place will multiply your good points and materially decrease your bad ones. Appointments can be made in any of their busy departments by phone. Adv.
